Off Campus Accommodations Assessment

Prior to entering into any formal agreement for, or occupation of, physical space/accommodations (the "Accommodation") as a Project Center in the Global Projects Program, the Project Center Director, GEO staff member, or other designated WPI affiliate (i.e. Local Coordinator, Program Provider, etc.) with authority over that Project Center, must complete this survey and send COMPLETED forms to the GEO. Your responses will be reviewed, and if necessary, a follow up meeting will be scheduled, if more information or clarification on any points is required. Please complete all questions to the best of your ability. The intent of this form is not to provide an exhaustive risk analysis for housing but rather it is to provide a framework for choosing the best housing available while taking into consideration factors of risk, accessibility and comfort level.

Part Five: Safety and Security		
WPI depends on its Center Directors and Program Leaders to source safe, accessible and appropriate accommodation for its students. Please consider the following guidance when selecting appropriate accommodation for WPI students from a safety and security perspective.		
 Is the outside of the property, including entrances and exits, well-lit? Does the area around the building appear to be clean and safe? Is there a 24/7 security guard or concierge? When you have a receptionist/doorman 24/7, you can sleep better knowing that unwanted guests are being greeted at the door and turned away. Is the front door always locked? Are latches and locks to all guestrooms functional? Are there security cameras? Where are they located and how long is the footage saved? Consider how security, cleaning, and other staff who may interact with WPI students are hired and vetted. Have you read the accommodation information regarding security concerns and limits to liability against theft of guest valuables, in-room safes? 		
Does the facility have safety features (i.e. functioning locks on doors and windows, safetc.?) Comments:	e in a bedroom	

What concerns have you related to safety and security for this property?

Part Six: Fire Safety

Think Fire Safety

Please consider the following guidance when selecting appropriate accommodation for students from a fire safety perspective:

- Is the property address clearly visible from the street to assist with emergency response?
- Does the property have a fire emergency plan (including evacuation assembly areas)? Is it posted in public areas?
- Are there at least two ways out from any level or floor of the building? And if so, is the second exit clear of obstruction, accessible to students and well maintained?
- Does at least one window in all guestrooms open without barrier (bars, etc.)?
- Is there an outdoor fire escape for students housed above the first floor? If not, will a portable fire escape ladder be effective in an emergency?
- Are the property's smoke detectors, sprinklers, fire extinguishers and fire alarms in proper working order? Consider asking the building manager when the last time the equipment was checked. Do you need to consider purchasing portable smoke detectors for the group?
- For properties where gas, oil, wood, or other fuel is being used for heating or cooking, are carbon monoxide detectors visible and in proper working order?
- Does the electrical wiring seem to be well maintained and in working order?

Does the feature have fire safety features (i.e. smoke detectors, fire escapes, extinguishers, or sprinklers)?

Comments:

Are there any concerns related to fire safety? (i.e. faulty electricity, etc.)

Part Seven: Summary

Are there any other details that you feel are important to share with students about this property and the surrounding location?
