

# What are the effects of pollution?

- Air pollution can make people and animals feel sick.
- It can make you cough, make your eyes water or cause asthma attacks.
- Air pollution also can pollute streams and lakes, and cause a cloudy haze in cities called smog.

Help the eastern bluebird find its way home without running into air pollution!

# Getting There With Clean Air!

**Why is clean air important?**  
Clean air helps to keep kids, trees, squirrels and birds healthy. Take a deep breath of clean air. It feels good, doesn't it?  
No one wants to breathe stinky, dirty air, not even a skunk!

## Find the sources of air pollution

- Factory smoke stacks
- Cars with only one passenger
- Smoke from home chimneys
- Burning yard waste

## Find the solutions to air pollution

- Taking the bus to school
- Using a push mower
- Planting a tree
- Riding a bike
- Tuning up a car at Bob's Tune-Up Shop
- Recycling bottles and cans
- Going for a walk
- Taking the City Shuttle
- Hanging laundry to dry
- Riding a skateboard
- Using solar panels
- Walking to the grocery store
- Roller skating
- Carpooling

# Cross out the POLLUTION. Color the SOLUTIONS!
