Ms. Urna Enterveuw
WebGen Systems Inc.
41 Linskey Way
Cambridge, MA 02142

Dear Ms. Enterveuw:

Please accept my application for the opening of WebGen System's Energy Operator, a position I found posted on WPI's job posting network. This May, I will be graduating with my Bachelor of Science in Electrical and Computer Engineering from Worcester Polytechnic Institute. I am looking for a job where I can feel pride in assisting in the mission of reducing the amount of excess use and waste of energy.

As a member of an interdisciplinary team working on my junior project, the Interactive Qualifying Project, we were required to live in London for two months commuting to work in the Borough of Merton's city offices. During the work week we would speak and work with borough personnel and officials to develop a method of collecting energy consumption data for many department buildings in the Town of Mitcham. It is from this experience that I have developed a commitment for working in the field of energy conservation, particularly that of buildings. It would be an honor for me to work as WebGen System's Energy Operator, where my characteristics of being a hard worker and a leader, can be seen in my GPA of 3.6 and my involvement in several honor societies on campus, would be an asset in furthering the excellence of WebGen System.

My theoretical and practical knowledge of electrical and network communication systems through my work on various projects, would allow me to excel at the technical aspects of this position. I have strong organizational skills and a deep comprehension of technical matters due to my education here at WPI.

I have enclosed my resume and am available for an interview at your convenience. If you have any additional questions, I can be reached at cdc@wpi.edu or 508-831-5260. Thank you for your time and I look forward to hearing from you.

Sincerely,

Robin Redbird
