Ms. Huma N. Reisorcez
The Hanover Insurance Group
440 Lincoln Street
Worcester, MA 01653

Dear Ms. Reisorcez:

I am pursuing my Bachelor of Science degree in Actuarial Mathematic at Worcester Polytechnic Institute, and will be graduating in May 2010. While attending the Career Fair this past Fall, I learned about internship opportunities with Hanover Insurance Group and am very interested in an actuarial summer internship. Through my academic and project experiences, I know that I am a qualified candidate to assist your quantitative research needs.

During my freshman year, I passed the SOA/CAS Exam P. My mathematical skills are solid and I continue to strengthen them through courses such as Risk Theory, Interest Theory, and Life Contingencies. In Financial Management, I gained excellent financial comprehension by assessing the NPV, IRR, and PI. I have utilized normal distribution to estimate expected results in experiments through my exposure to statistics. I understand that this internship calls for strong team and leadership skills; through my participation in the Emerging Leaders program at WPI, I strengthened my communication skills and learned how to apply motivational theory to inspire a group.

My career aspirations are to work in the property and casualty fields. An internship with The Hanover Insurance Group would allow me to apply my academic knowledge while assisting your department in assisting your quantitative assessment on current trends of the market. I welcome the opportunity to speak with you at your convenience and can be reached at 508-831-5260 or at cdc@wpi.edu. Thank you for your time and consideration.

Sincerely,

Sol Away
