*Live your values*

Strategic Futuring is a facilitated method of envisioning ourselves in the future and developing an action plan with vision driven goals, strategies and accountability to turn that vision into reality. The process is designed for:

- ❖ First or Second-Year students transitioning into college who are ready to clarify goals for their college experience
- ❖ Students transitioning from college to career who desire to discover their unique value in order to better promote themselves
- ❖ Anyone who wants to accelerate their path to success

Come hear about the Strategic Futuring Seminar, a process tool for individuals:

- ❖ Learn to think about and assume responsibility for the future beyond the next few years - minimizing fear of the future
- ❖ Learn how to shift their approach and actions away from reacting and responding toward being proactive and inventive
- ❖ Improve decision-making skills to leverage challenges and opportunities being presented in the current and unfolding economic conditions.
