Section 1 – WPI and IGSD Procedures

INTRODUCTION

Congratulations! You are beginning to prepare for one of the most meaningful experiences that you will encounter while at WPI. In order to ensure that you have a successful experience, the *Going Global at WPI Handbook* has been compiled from a number of sources to provide as much practical information as possible that may be applicable to all project sites. The Handbook was prepared to inform the student who has been accepted to participate in the Global Perspective Program during the 2010/2011 academic year.

Worcester Polytechnic Institute has been practicing innovative, project-based technological education for over 30 years. WPI requires all undergraduates to complete a series of projects, including one in which they examine how science or technology interacts with societal structures and values - the Interactive Qualifying Project. Because of its commitment to a global perspective, the university offers its students opportunities to complete this unique degree requirement at locations around the world. WPI operates more than ten international project programs where students, with resident faculty advisors, live and work full time solving real-world problems for public and private agencies and organizations. WPI sends more engineering and science students overseas for experiential learning than any other U.S. college or university; during the 2010-2011 academic year, approximately 625 WPI students -- including over half of the junior class -- will travel to a global project site to complete one of these interdisciplinary projects.

A successful off-campus experience does not just occur; it requires careful consideration of things you will need to do before you leave, and while at your off-campus site. The Interdisciplinary and Global Studies Division (IGSD) has developed this document to outline these considerations.

For the mutual protection of WPI, the students, and their families, the obligation assumed by each must be carefully defined and understood. You should recognize the fact that you have entered into a contractual agreement with WPI that states the obligations and responsibilities of both the university and yourself. This Handbook was created as the document that should be read carefully and thoroughly to avoid misunderstandings.

The following text is taken from the NAFSA: Association of International Educators' website. NAFSA is the predominant professional association in the world dealing with international education, and the section of the Association that deals specifically with study abroad currently known as the Education Abroad Knowledge Community. A committee of study abroad professionals (the Interorganizational Task Force on Safety and Responsibility in Study Abroad) developed the following document and is included here for your reference. Please keep in mind that while WPI's off campus program is unique in its structure, the University is committed to uphold the standards of the profession.

Responsible Study Abroad: Good Practices for Health and Safety

Statement of Purpose

Because the health and safety of study abroad participants are primary concerns, these statements of good practice have been developed to provide guidance to institutions, participants (including faculty and staff), and parents/guardians/families. These statements are intended to be aspirational in nature. They address issues that merit attention and thoughtful consideration by everyone involved with study abroad. They are intentionally general; they are not intended to account for all the many variations in study abroad programs and actual health, safety and security cases that will inevitably occur. In dealing with any specific situation, those responsible must also rely upon their collective experience and judgment while considering their specific circumstances.

I. Responsibilities of Program Sponsors

The term "sponsors" refers to all the entities that together develop, offer, and administer study abroad programs. Sponsors include sending institutions, host institutions, program administrators, and placement organizations. To the extent reasonably possible, program sponsors should consider how these statements of good practice may apply. At the same time, it must be noted that the structure of study abroad programs varies widely. Study abroad is usually a cooperative venture that can involve multiple sponsors. Because the role of an organization in a study abroad program may vary considerably from case to case, it is not possible to specify a division of efforts that will be applicable to all cases. Each entity should apply these statements in ways consistent with its respective role.

In general, practices that relate to obtaining health, safety and security information apply to all parties consistent with their role and involvement in the study abroad program. Much of the basic information is readily available and can be conveyed to participants by distributing it and/or by referring them to, or utilizing materials from, recognized central sources. Statements of good practice that refer to the provision of information and the preparation of participants are intended for parties that advise, refer, nominate, admit, enroll, or place students. Statements of good practice that suggest operating procedures on site apply to entities that are directly involved in the operation of the overseas program.

It is understood that program sponsors that rely heavily on the collaboration of overseas institutions may exercise less direct control over specific program components. In such cases, sponsors are urged to work with their overseas partners to develop plans and procedures for implementing good practices.

The use of letters is provided for ease of reference only and does not imply priority.

Program sponsors should:

- A. Conduct periodic assessments of health and safety conditions for their programs, and develop and maintain emergency preparedness processes and a crisis response plan.
- B. Provide health and safety information for prospective participants so that they and their parents/guardians/families can make informed decisions concerning preparation, participation and behavior while on the program.
- C. Provide information concerning aspects of home campus services and conditions that cannot be replicated at overseas locations.

- D. Provide orientation to participants prior to the program and as needed on site, which includes information on safety, health, legal, environmental, political, cultural, and religious conditions in the host country. In addition to dealing with health and safety issues, the orientation should address potential health and safety risks, and appropriate emergency response measures.
- E. Consider health and safety issues in evaluating the appropriateness of an individual's participation in a study abroad program.
- F. Determining criteria for an individual's removal from an overseas program taking into account participant behavior, health, and safety factors.
- G. Require that participants be insured. Either provide health and travel accident (emergency evacuation, repatriation) insurance to participants, or provide information about how to obtain such coverage.
- H. Conduct inquiries regarding the potential health, safety and security risks of the local environment of the program, including program-sponsored accommodation, events, excursions and other activities, prior to the program. Monitor possible changes in country conditions. Provide information about changes and advise participants and their parents/guardians/families as needed.
- I. Hire vendors and contractors (e.g. travel and tour agents) that have provided reputable services in the country in which the program takes place. Advise such vendors and contractors of the program sponsor's expectations with respect to their role in the health and safety of participants.
- J. Conduct appropriate inquiry regarding available medical and professional services. Provide information about these services for participants and their parents/guardians/families, and help participants obtain the services they may need.
- K. Develop and provide health and safety training for program directors and staff, including guidelines with respect to intervention and referral that take into account the nature and location of the study abroad program.
- L. Develop codes of conduct for their programs; communicate codes of conduct and the consequences of noncompliance to participants. Take appropriate action when aware that participants are in violation.
- M. In cases of serious health problems, injury, or other significant health and safety circumstances, maintain good communication among all program sponsors and others who need to know.
- N. In the participant screening process, consider factors such as disciplinary history that may impact on the safety of the individual or the group.
- O. Provide information for participants and their parents/guardians/families regarding when and where the sponsor's responsibility ends and the range of aspects of participants' overseas experiences that are beyond the sponsor's control.

In particular, program sponsors generally:

- A. Cannot guarantee or assure the safety and/or security of participants or eliminate all risks from the study abroad environments.
- B. Cannot monitor or control all of the daily personal decisions, choices, and activities of participants.
- C. Cannot prevent participants from engaging in illegal, dangerous or unwise activities.

- D. Cannot assure that U.S. standards of due process apply in overseas legal proceedings or provide or pay for legal representation for participants.
- E. Cannot assume responsibility for actions or for events that are not part of the program, nor for those that are beyond the control of the sponsor and its subcontractors, or for situations that may arise due to the failure of a participant to disclose pertinent information.
- F. Cannot assure that home-country cultural values and norms will apply in the host country.

II. Responsibilities of Participants

In study abroad, as in other settings, participants can have a major impact on their own health and safety through the decisions they make before and during their program and by their day-to-day choices and behaviors.

Participants should:

- A. Assume responsibility for all the elements necessary for their personal preparation for the program and participate fully in orientations.
- B. Read and carefully consider all materials issued by the sponsor that relate to safety, health, legal, environmental, political, cultural, and religious conditions in the host country(ies).
- C. Conduct their own research on the country(ies) they plan to visit with particular emphasis on health and safety concerns, as well as the social, cultural, and political situations.
- D. Consider their physical and mental health, and other personal circumstances when applying for or accepting a place in a program, and make available to the sponsor accurate and complete physical and mental health information and any other personal data that is necessary in planning for a safe and healthy study abroad experience.
- E. Obtain and maintain appropriate insurance coverage and abide by any conditions imposed by the carriers.
- F. Inform parents/guardians/families and any others who may need to know about their participation in the study abroad program, provide them with emergency contact information, and keep them informed of their whereabouts and activities.
- G. Understand and comply with the terms of participation, codes of conduct, and emergency procedures of the program.
- H. Be aware of local conditions and customs that may present health or safety risks when making daily choices and decisions. Promptly express any health or safety concerns to the program staff or other appropriate individuals before and/or during the program.
- I. Accept responsibility for their own decisions and actions.
- J. Obey host-country laws.
- K. Behave in a manner that is respectful of the rights and well being of others, and encourage others to behave in a similar manner.
- L. Avoid illegal drugs and excessive or irresponsible consumption of alcohol.
- M. Follow the program policies for keeping program staff informed of their whereabouts and well being.

N. Become familiar with the procedures for obtaining emergency health and legal system services in the host country.

III. Recommendations to Parents/Guardians/Families

In study abroad, as in other settings, parents, guardians, and families can play an important role in the health and safety of participants by helping them make decisions and by influencing their behavior overseas.

Parents/guardians/families should:

- A. Be informed about and involved in the decision of the participant to enroll in a particular program.
- B. Obtain and carefully evaluate participant program materials, as well as related health, safety and security information.
- C. Discuss with the participant any of his/her travel plans and activities that may be independent of the study abroad program.
- D. Engage the participant in a thorough discussion of safety and behavior issues, insurance needs, and emergency procedures related to living abroad.
- E. Be responsive to requests from the program sponsor for information regarding the participant.
- F. Keep in touch with the participant.
- G. Be aware that the participant rather than the program may most appropriately provide some information.

MANDATORY PAPERWORK

The following documents must be submitted to the IGSD office by the stated deadline before you leave WPI for your off-campus project experience. If any forms are missing, you will be in jeopardy of not being allowed to participate at off-campus programs.

Paperwork Deadline

All paperwork for China E10 & A10 must be in the IGSD by **Wednesday, April 14, 2010 before 3:00 p.m.**

Participant Statement of Agreement

Once accepted to the Global Perspective Program at WPI, every student is required to submit to the IGSD along with his or her housing deposit a signed and dated "Participant Statement of Agreement". The text of that document is included below for your convenient referral. Of course, you may request a photocopy of your signed "Participant Statement of Agreement" at any time.

I understand that my participation in the WPI Global Perspective Program is subject to my agreement to accept and abide by the following conditions of participation:

A. Financial Responsibility

- 1) I understand that my deposit of \$400 is used to secure my place in the program and will be credited toward my housing cost.
- 2) I understand that charges for any damages to housing, WPI property on site, the property of our host institutions, or project sponsors will be charged to my WPI account. When responsibility for damages to housing cannot be assigned to an individual student, all students in the housing unit will be charged an equal share of the cost. I also realize that an official hold will be placed on my records until all payment responsibilities are satisfied.
- 3) I agree to pay all housing charges as requested. The accounting office normally bills housing costs at program sites at the time of the usual billing for Spring, Fall, and Summer terms.

B. Withdrawal, Cancellation, or Dismissal

- 1) I understand that the \$400 acceptance deposit is fully refundable up to 120 business days before the beginning of the program. Notice of withdrawal must be made in writing to the Interdisciplinary and Global Studies Division. Withdrawals after this time are subject to forfeiture of the entire deposit, plus any unrecoverable portion of the housing costs or other program expenses advanced on my behalf.
- 2) WPI makes every effort to deliver every program offered. However, many circumstances beyond our control could affect the welfare and safety of our participants. WPI, therefore, reserves the right to cancel a program in the event of changes that adversely affect our ability to deliver a quality academic program in which we can reasonably safeguard the health, safety, and well-being of all participants. In the event of cancellation by WPI, all deposits, tuition, and housing costs will be fully refunded.
- 3) Students who are dismissed from a program for any reason will receive no refund of any costs involved and are subject to charges for any unrecoverable housing costs or program expenses advanced on their behalf.

C. Behavioral Responsibilities

- 1) I understand that all policies governing acceptable behavior as printed in The Policies section of *The Campus Planner & Resource Guide* apply to me during my participation at an off-campus program site. Failure to abide by these policies, either before or during my participation in an off-campus program, can result in disciplinary action, up to and including my immediate dismissal from the program. I recognize that the authority for adjudicating alleged violations of the WPI Code of Conduct while at an off-campus program site lies with the on-site WPI representative in accordance with basic due process.
- 2) I further understand that as a WPI student at an off-campus program site, I represent my institution and my country and will behave as an ambassador for both. I understand that grounds for dismissal may also be found in behavior disruptive to the group as a whole, or offensive within the host culture: disruptive sexual behavior, or behavior deemed offensive to the host culture; or disruptive, violent, or destructive behavior in student housing.
- 3) I understand that WPI must take steps to ensure that no offensive, disruptive or potentially dangerous conduct occurs while WPI students and faculty are abroad. Accordingly, WPI reserves the right to dismiss a student from the program on the basis of any observed conduct or behavior which causes WPI concern for the safety and well-being

of students or others. The Dean of Interdisciplinary and Global Studies shall have the authority to make the final decision on dismissal from the program.

D. Academic Responsibilities

- 1) I understand that my participation in this program is subject to successful completion of all required preparation classes. I agree to attend all required orientation and re-entry meetings.
- 2) I understand that if I am placed on academic probation, I am no longer eligible to participate. The withdrawal refund policy stated above will apply.
- 3) WPI reserves the right to withdraw acceptance to students who are subsequently placed on academic warning. The withdrawal refund policy stated above will apply.

E. Medical Issues

- 1) I understand that there are certain risks inherent in travel to an off-campus program site and WPI cannot assume responsibility for all of my activities or medical needs. I understand that it is my responsibility to carry medical insurance that is valid at the off-campus site for the length of my stay.
- 2) I accept all financial responsibility for any medical treatment I receive while at the program site and understand that to obtain medical care abroad it is usually necessary to pay when the care is administered and seek reimbursement from my insurance company when I return home.

F. Legal Issues

- 1) I understand that as a non-citizen in a foreign country, I will be subject to the laws of that country. The use or possession of illegal drugs or other substances in violation of the laws of the host country or The Policies section of *The Campus Planner & Resource Guide*, before or during my participation in the program, can result in disciplinary action, up to and including my immediate dismissal from the program and legal action under the laws of the Commonwealth of Massachusetts and / or the laws of the host country.

G. Travel Issues

- 1) I understand that I am responsible for making my own travel arrangements and for arriving at the program site on the designated arrival date and remaining until the official departure date.
- 2) I understand that while WPI encourages students to travel during their free time, the university can take no responsibility for my safety during independent travel. I further understand that I must inform the faculty-in-residence of my travel plans.

H. Federal Compliance Issues

- 1) I understand there are Federal regulations regarding the export of information to foreign countries or foreign citizens, with which all of us at WPI must comply. WPI's emphasis on engineering programs makes us particularly sensitive to these regulations. If I take a laptop computer (or other type of computer digital storage device, I hereby assure WPI that I will not have any restricted information on that device as such action may be considered an export.

I have read, understand, and agree to abide by the above stated conditions of participation.

Participant Signature	date	site	term
-----------------------	------	------	------

Printed Name	student number	date of birth*
--------------	----------------	----------------

**If participant is under 18 years of age, both parents and/ or legal guardian must also read and sign this form.*

I am the parent or legal guardian of the above Participant, have read the foregoing Participant Statement of Agreement Form (including such parts as may subject me to personal financial responsibility), and will be legally responsible for the obligations and acts of the Participant as described in this Participant Statement of Agreement Form, and agree, for myself and for the participant, to be bound by its terms.

 Signature of Parent / Guardian Date

X

 Signature of Parent / Guardian Date

Travel Information Form (Appendix A)

The IGSD must have completed Travel Form from each student on file before the student leaves for their site. The office keeps a copy of this itinerary and we send a copy with the faculty advisor. By doing this, the IGSD staff, the advisor and the local coordinator knows when and where every student will arrive and will alert them if a problem arises.

Any students traveling outside the United States to a WPI project site must supply the IGSD with a scanned copy of the information pages of their passport. Electronic copies will be sent with the faculty advisor and kept on file in the IGSD. If a passport is stolen or lost while outside the U.S., having copies of this document will greatly facilitate having new travel documents issued.

Students should understand that they are responsible for making their own travel arrangements and for arriving at the program site on the designated arrival date and remaining until the official departure date. If you are traveling by air, you must have confirmed reservations. Flying stand-by is not acceptable.

Students and their families should also understand that while WPI encourages students to travel during their free time, the university can take no responsibility for the student's safety during independent travel. The student must inform the faculty-in-residence of any travel plans.

Students may not take vacation days off from their project work, even if they have the permission of their project mentor. If they have an urgent family or academic or job related need to travel away from the project site on a project work day, they should consult with the faculty member in residence before making any travel plans.

Health Update and Records Release Form (Appendix B)

The IGSD must have a completed Health Update and Records Release Form on file for each student before the student leaves for her site. The IGSD keeps a copy and sends a copy with the faculty advisor in case of an emergency. The student should list any medical conditions that could affect the student while off-campus (i.e. epilepsy, diabetes, depressive episodes, etc.) Also, the student must list any changes in their health not noted on medical records on file with WPI Health Services. Medical allergies must be listed, as well as prescription medications.

The IGSD strongly recommends that every student who plans to travel outside of the United States should read closely all information put forward by the Center for Disease Control specific to the geographic area where they will be going. This information is included in this handbook.

When traveling abroad it is a good idea to take a supply of your prescription medications sufficient to last for the entire length of the trip. Prescription medicines should always be kept in the original containers with the prescription label intact to avoid problems with customs officials. It is also important to take along a copy of the prescription from your physician, clearly written, in generic terms, and with an indication of the condition being treated.

Two people need be listed as emergency contacts. These contacts should be people empowered to make a medical or legal decision on behalf of the participant (i.e., parent, guardian, living adult relative). Contact information for each must also be provided to the IGSD on this form: name, relationship, address, phone (home and work), and email.

Participants and their families should understand that there are certain risks inherent in travel to an off-campus program site and WPI cannot assume responsibility for every activity or medical need. It is the student's responsibility to carry medical insurance that is valid at the off-campus site for the

length of the stay. Students must accept all financial responsibility for any medical treatment received while at the program site. Students should understand that to obtain medical care abroad, it is usually necessary to pay when the care is administered and they will have to seek reimbursement from their insurance company when they return home.

All students traveling off-campus to participate in a WPI program are required to carry medical insurance that is valid at the program site for the entire length of the program. The IGSD must have the name of your insurance provider and your subscription number. It is the responsibility of the student to make sure that they are covered for the entire length of the program while they are off-campus.

Voluntary Acknowledgement Form

All participants are required to sign a Voluntary Acknowledgement Form that is kept on file in the IGSD. The text of the form is below for your convenient referral. We hope that by asking participants to read and sign such a form that we remind them of the nature of their participation and the responsibilities which are assumed by the individuals.

ACKNOWLEDGEMENT and RELEASE

I acknowledge that I am voluntarily participating in the _____ (the "Program"), which is being offered by Worcester Polytechnic Institute (WPI). I further acknowledge that WPI has provided me with adequate information about the Program, both verbally and through written materials, and that I have read and understand such information. I agree to comply with any immunization or medical treatment necessary to participate in this program. I also acknowledge that any laptop computer (or other form of computer or digital storage device) that I may take abroad cannot contain any restricted information as such action may be considered an export subject to Federal control and regulation.

Assumption of Risk and Release of Claims. Knowing the risks described, and in consideration of being permitted to participate in the Program, I agree, on behalf of my family, heirs, and personal representative(s), to assume all the risks and responsibilities surrounding my participation in the Program. To the maximum extent permitted by law, I release and indemnify Worcester Polytechnic Institute, and its officers, employees and agents, from and against any present or future claim, loss or liability for injury to person or property which I may suffer, or for which I may be liable to any other person, during my participation in the Program (including periods in transit to or from any site in country where the Program is being conducted).

I HAVE CAREFULLY READ THIS AGREEMENT AND FULLY UNDERSTAND ITS CONTENTS.

Participant Signature

date

Printed Name

date of birth*

*If participant is under 18 years of age, both parents and/or legal guardians must also read and sign this form.

I am the parent or legal guardian of the above Participant, have read the foregoing Acknowledgement and Release Form (including such parts as may subject me to personal financial responsibility), and will be legally responsible for the obligations and acts of the Participant as described in this Acknowledgement and Release Form, and agree, for myself and for the Participant, to be bound by its terms.

Date

X

Signature of Parent / Guardian

Scan of Passport

You are required to bring your passport to the IGSD office so that staff can scan a copy of the face and information pages. IGSD keeps this on file.

International Student Identity Cards (ISIC)

All WPI students completing course requirements abroad are required to get the ISIC. As you have been charged the \$24.00 cost of the card, it makes the most sense to get yours from the IGSD. If you choose to purchase a card elsewhere you will forfeit the \$24.00. In some countries, the student discount network is highly developed, and an ISIC will entitle students to reduced entrance fees at museums and theaters, special rail or bus passes, and even discounts at hotels and shops. While it cannot be guaranteed that you'll get discounts wherever you go, the ISIC is the most accepted card for international access to all student discounts that are available.

With the ISIC, you gain access to a 24-hour, toll free help line that can provide aid in the case of a medical, financial or legal emergency while abroad. You can call the ISIC Help Line from the United States at (877-370-4742). Outside of the United States, call collect 715-342-4104. The call is free, but be prepared to provide your card number to the ISIC Help Line.

The most important reason for the ISIC requirement is the additional insurance coverage that you get. The ISIC provides a basic sickness and accident insurance policy to students while traveling outside the United States. ISICs also provide students with emergency evacuation insurance, if due to injury or sickness, a legally licensed physician certifies the severity of your condition is such that you must be evacuated for medical treatment. In addition, cardholders are eligible to have expenses covered for the repatriation of remains in the unlikely event of death while abroad. (For more specific coverage information, contact American Home Assurance Company 70 Pine St. New York, New York 10270).

Again, the cost of this card is built into the expenses associated with going off-campus and does not require additional fees to be charged to the student. However, students must supply the IGSD with two photos in order to process the card. These photos can be taken at the IGSD Office.

You are required to come to the IGSD, located in the Project Center, to fill out an application form for the ISIC and turn in your photos (extra passport photos will suffice as well, but please keep in mind the need to carry two other passport photos with you when traveling). IGSD staff will process your card, which will be given to you when all mandatory paperwork mentioned previously has been completed and turned in to the IGSD. If you need the number from your ISIC to book your flight, a photocopy of your card can be provided to you at your request. For more specific information about discounts, go to www.isic.org.

ATC Laptop Form (Appendix C)

WPI will provide one laptop per team if you request it. You do not have to use a WPI laptop – you are welcome to take your own. If you do, however choose to sign out a WPI laptop, you will need to complete the form and turn it in to the IGSD with the rest of your mandatory paperwork.

WPI POLICIES AND SERVICES FOR STUDENTS AT OFF-CAMPUS SITES

Informal Hearing Procedure at Off-Campus Residential Program Sites

Students at off-campus residential program sites, accused of violating the WPI code of conduct or any other WPI policy as outlined in the annual Campus Planner and Resource Guide shall be accorded an informal on-site hearing before a WPI representative designated by the dean of Interdisciplinary and Global Studies Division. The following guidelines will be applicable.

(a) Students will be informed of the complaint pending and the time, date and location of the informal hearing, in writing, at least two (2) days prior to the hearing. This notice should include a full description of the incident, names of witnesses, if any, and a reference to the section(s) of the campus code allegedly violated.

(b) The informal hearing shall be conversational in nature and non-adversarial.

(c) Before the hearing, the student shall be given the opportunity to consult with an on-site advisor of their choice or a member of the WPI community.

(d) During the hearing, the WPI representative shall elaborate on the nature of the complaint and present any evidence or witnesses in support of that complaint.

(e) The accused student shall have an opportunity to respond to the complaint and present any evidence or witnesses in response to the complaint.

(f) The WPI representative will make a determination of the student's responsibility for the complaint based on the outcome of the informal hearing.

(g) If the student is found responsible, the WPI representative must contact the dean of students or her/his designee to review the student's past record, if any, before a sanction is determined. The WPI representative must then consult with the Dean of Students Office and the director of global operations in the Interdisciplinary and Global Studies Division to determine an appropriate sanction for the offense.

(h) All decisions shall be final and not subject to appeal on site. The decision may be appealed to the dean of Interdisciplinary Studies Division once the student has returned to the WPI campus. Appeals may be submitted in writing to the dean of the Interdisciplinary and Global Studies Division within five (5) days of the start of classes of the term following the off campus project experience. The appeal must be specific and contain a full description of the basis for the appeal. Grounds for an appeal must be based on one or more of the following criteria:

- a. Failure to follow the procedures outlined in the Campus Planner and Resource Guide;
- b. Inappropriate gravity of the sanction in relationship to the offense;
- c. That no reasonable person could conclude, on the basis of the evidence presented, that the accused was responsible.

The appeal will not be reviewed until after the start of the term following the off campus project experience when all parties involved have returned to the WPI campus.

(i) If the on-site WPI representative determines that continued presence at the project center by the student would constitute a danger to the safety of persons or property on the premises of the project center, a recommendation for interim suspension may be made to the vice president for student affairs or his/her designee.

Note: WPI's Academic Honesty Policy and the procedures described therein also apply to the off campus residential programs. The WPI representative must communicate with the dean of Interdisciplinary and Global Studies Division and Dean of Students Office before taking action.

WPI Housing

If you live in a WPI residence hall, it is your responsibility to notify Residential Services of your intended absence.

Mail Services

All students going off-campus must go to Central Mail to fill out the appropriate card to have their mailboxes closed and their mail forwarded. Failure to do so will result in mail staying in the student's mailbox for the entire term. All students must now be responsible for their own mailbox and mail by signing a forwarding card at Central Mail.

Protocol for PCs for Off-Campus Project Centers

Students who participate in the Global Perspective Program are offered the opportunity to borrow laptop personal computers from WPI. This is not an entitlement to students, but rather a privilege extended to students. It is expected that the following protocol will be followed and the proper responsibility will be assumed by the students taking advantage of this opportunity. WPI does not have an unlimited supply of laptop computers to loan to students. If student teams are unable or unwilling to comply with the dates specified by the Academic Technology Center (ATC), the ATC reserves the right to refuse to accommodate that request. One PC per project team for each site as available:

After you have turned in the completed ATC Team form to the IGSD, at least one member of your group (although we suggest the entire group so that everyone takes equal responsibility for the equipment) is required to go to the ATC and reserve a laptop BEFORE pick-up on the specified date.

Procedure

1. Each team will fill out an ATC Team Form (Appendix C). Kelly Donahue (from the IGSD) will send approved names to ATC. Every team member must meet all IGSD paperwork deadlines before names are sent to the ATC.
2. Person(s) responsible for PC will be required to register at the ATC and sign a statement accepting responsibility for the PC.
3. Person(s) responsible for PC should have the tightest travel schedule. Arrangements can be made for one person to pick up the PC and another member of the team to return the PC but, BOTH people must register when the reservation is made with the ATC.
4. It is strongly recommended that everyone in the group sign the ATC's reservation form. The ATC will hold only signing parties financially responsible for damage beyond normal wear and tear and/or any fees incurred.

Reservations

1. Make your reservation early for your PC. You must go to the ATC to make your reservation with your WPI ID card. At the time of reservation you must be specific about the dates and times of pick-up and return of the equipment and about your hardware requirements. Be as specific as possible about what you will be using the PC for: (e.g. word processing, spreadsheets, data analysis, etc.) PCs are reserved on a first-come, first-served basis. Avoid last minute changes as they may not be able to be accommodated.
2. If two people are responsible (one for pick up, one for return) BOTH must go to the ATC to register before leaving campus. If arrangements have been made for a faculty member to return the PC, then the faculty member must send confirming email to Mary Beth Harrity (mharrity@wpi.edu) before the PC will be released.

3. Modems, ethernet cards and other miscellaneous hardware are in limited supply and must be requested at the time the reservation for the PC is made.
4. Upon request, the ATC can provide external drives that can be attached to the laptop.
5. Pick-up and return deadlines will be strictly enforced. If the laptop computer is not returned to the ATC on the agreed upon date, your group will be charged a \$50 per business day late fee.

Software

1. All PCs will be loaded with Windows, MS Office, Explorer and communications software. The ATC does not provide or load software other than this.
2. If students load their own software it must be removed prior to returning the PC to the ATC.
3. If you significantly alter the original configuration of the laptop (e.g. install a different operating system), your group will be charged a \$50 software re-installation fee.

Picking up the PC

1. You must have your WPI ID card in order to pick up the PC assigned to you.

Acceptable Use Policy Regarding Computers (WPI laptops, sponsor PC's, internet use)

At a minimum, you must adhere to the WPI Acceptable Use Policy (<http://www.WPI.EDU/Pubs/Policies/>) whether using WPI computer resources or your housing provider or sponsor's resources. Your housing provider or sponsor may have more restrictive computer and web use policies and those must be followed. It is your responsibility to determine what your housing provider or sponsor's policy is and to comply with it. Using a housing provider or sponsor's network(s) or computer(s) for recreational use (defined as non-project related use – on or off the web) is not permitted. Violators will be subject to disciplinary actions.

General Policies and Important Things to Remember

- There can be *no overnight guests* in any accommodations acquired and provided by WPI for use by the Project Center students.
- Charges for any damages to housing, WPI property on site, the property of our host institutions, or project sponsors will be charged to your WPI account. When responsibility for damages to housing cannot be assigned to an individual student, all students in the housing unit will be charged an equal share of the cost. An official hold will be placed on all records until all payment responsibilities are satisfied.
- If you are dismissed from a program for any reason, you will not receive a refund of any costs involved and will be subject to charges for any unrecoverable housing costs or program expenses advanced on your behalf.
- All policies governing acceptable behavior as printed in The Policies section of *The Campus Planner & Resource Guide* apply to participants at an off-campus program site. The authority for adjudicating alleged violations of the WPI Code of Conduct while at an off-campus program site lies with the on-site WPI representative in accordance with basic due process.
- You must always keep the resident faculty advisors informed of your whereabouts. If you plan to travel during the term, you must give your advisor a written itinerary.
- **The IGSD will notify your parents if you fail to return from a weekend excursion at the predetermined time. If you are delayed you MUST contact your resident faculty advisor to inform them that you are safe.**
- As a WPI student at an off-campus program site, you represent your institution and your country and will behave as an ambassador for both. Grounds for dismissal may also be found in behavior disruptive to the group as a whole, or offensive to the host culture: disruptive sexual behavior, or disruptive, violent, or destructive behavior in student housing.
- You may not take vacation days off from your project work, even if you have the permission of your project mentor. If you have an urgent family or academic or job related need to travel away from the project site on a project work day, consult with the faculty member in residence before making any travel plans.

Violations of any of these policies can result in disciplinary action up to and including immediate dismissal from the program.

Travel Documents and Competencies

Passports

Who needs a passport?

A U.S. citizen needs a passport to depart or enter the United States and to depart and enter most foreign countries. U.S. Immigration requires you to prove your U.S. citizenship and identity when you reenter the United States.

If you are not a U.S citizen, contact the embassy or consulate of the country you are planning to travel to, as well as the U.S. Embassy in order to receive specific entry instructions. International students should consult with Mr. Tom Thomsen, Director of the International Students and Scholars Office, about these issues. His contact information is listed under the heading WPI Offices.

Beware of a passport that is about to expire. Certain countries will not permit you to enter and will not place a visa in your passport if the passport is valid for less 6 months. If your passport is expiring in less than the 6 months, you will need to get a new one. If you return to the United States with an expired passport, you are subject to a passport waiver fee of \$100, payable to U.S. Immigration at the port of entry.

It is your responsibility to acquire your passport. The IGSD does not administer this process for students.

How to get your passport

1. You can get passport photos taken at the U.S. Post Office, or other local stores such as CVS.
2. Pick up a passport application form from the U.S. Post Office, or download from: http://travel.state.gov/passport/passport_1738.html
3. Turn in all required documentation to the nearest federal post office with the appropriate fee.

For Immediate Release

April 2, 2002

**STATEMENT BY PHILIP T. REEKER, DEPUTY SPOKESMAN
U.S. Passports Will No Longer be Issued Abroad**

All passports, except those required for urgent travel, will be issued in the United States using the new more secure photo-digitized imaging system.

Effective April 8, 2002, American citizens residing or traveling abroad, who require issuance of a U.S. passport, will be issued the latest, state-of-the-art passport. It incorporates a digitized image with other enhanced security features. Because this technology is not available at U.S. embassies and consulates, overseas passport issuance is being transferred to the National Passport Processing Center in Portsmouth, New Hampshire.

Travel documents in the post-September 11 world have become even more important. The new passport has many features that make it one of the most secure travel documents produced anywhere in the world. Getting these more secure passports into circulation will help minimize the misuse of American passports by criminals, terrorists, and others.

This new procedure will increase processing time at U.S. embassies and consulates, but the Department is committed to ensuring that American citizens receive secure documents in a timely manner. American citizens overseas are encouraged to apply early for renewal of expiring passports.

U.S. embassies and consulates will continue to issue passports that are needed for urgent travel. However, such passports will be limited in validity, and cannot be extended. Bearers will be required to exchange, at no additional cost, their limited-validity passport for a full-validity digitized passport upon completion of their urgent travel.

Information on applying for a U.S. passport, passport application forms and requirements, and other travel-related information can be accessed through the Department of State's web site at: <http://travel.state.gov>.

Visas

A visa is an endorsement or stamp placed in your passport by a foreign government that permits you to visit that country for a specified purpose and a limited time. You should obtain all necessary visas before you leave the United States, because you will not be able to obtain visas for some countries once you have departed. Apply directly to the embassy or nearest consulate of each country you plan to visit. Passport agencies *cannot* help you obtain visas.

If you are doing your project in Thailand or Namibia, your faculty advisors and the IGSD will help you obtain your non-immigrant visas. In order to take advantage of this, you must be prepared to give the IGSD your passport, a completed visa application (available in the IGSD office) and a passport picture, by the date that your advisors determine. The IGSD will send all documentation with one cover letter to the appropriate embassy to expedite the visa process for your group. The single entry visa fee of has been built into your housing charge.

If you are not a U.S. citizen, it is your responsibility to determine what other documentation you will need to file to obtain your visa.

How to Take Money

You should take a sufficient amount of living/spending money with you. The IGSD recommends the following modes of carrying money.

Travelers Checks

Rather than carrying large amounts of cash, it is always safer to take most of your money in travelers' checks. Remember to record the serial number, denomination, and the date and location of the issuing bank or agency. Keep this information in a safe and separate place. In case your checks are lost or stolen, you can get replacements quickly with this information.

Credit Cards

Some credit cards can be used worldwide, even for cash advances. However, be sure to monitor your charges carefully, so as not to exceed your limit -- do not forget to account for the exchange rate! Leave all unnecessary cards at home. Record the numbers and expiration dates for the cards you take in a separate place. Always report the loss or theft of your credit cards immediately to the issuing companies and notify the local police.

ATM info:

Making withdrawals from an ATM is generally considered to be the easiest and least expensive way of accessing money while abroad. The biggest advantage is that regardless of the size of your withdrawal, you will receive the wholesale exchange rate which banks use. ATM networks like the Global ATM Alliance, Cirrus and PLUS are used widely around the globe, although you should be sure to verify that your network operates in the country to which you're going. The following websites provide links to ATM locator services for each network:

<http://www.mastercard.com/us/personal/en/cardholderservices/atmlocations/index.html>

<http://visa.via.infonow.net/locator/global/jsp/SearchPage.jsp>

http://www.scotiabank.com/cda/content/0,1608,CID8040_LIDen,00.html

Before you leave, you should contact your bank to let them know where you will be and for how long. Many banks view activity such as withdrawals in another country as an alert to possible fraudulent activity on your account. Telling them ahead of time, may prevent your accounts from being frozen -- a massive inconvenience when you're abroad.

Things to consider when using ATMS abroad include the following:

1. Be sure you know the numeric equivalent of your PIN if it contains letters as well as numbers. ATMs abroad may only provide numbers.
2. Some ATMs (especially in Europe) do not accept PINs longer than 4 numbers. You may wish to contact your bank to change your PIN if it is longer than four digits.

There are of course fees associated with using most ATMs, and some of these can be significantly higher than the fees you are used to paying in the U.S. You should check with your bank (be sure to ask if they assess extra fees for international ATM use), and plan for these extra expenses in your budget.

Finally, be sure to keep your ATM card and your money in a safe place. When withdrawing cash from an ATM be sure to do so in a well lighted, safe location so that you decrease your profile as a potential target for theft.

Source: www.independenttraveler.com

Foreign Currency

Before departing, it is recommended that you purchase some foreign currency to use for buses, taxis, food, phones or tips when you first arrive. You can purchase several currencies at the airport, but be advised that they only carry major currencies and that exchange windows may be closed depending upon your time of departure. You may be able to purchase foreign currency at one of your local banks. Do not change all of the money you plan to take while still in the U.S. The exchange rate is always better in the host country.

Section 2 - Health & Safety

Safety Policies

When traveling to an off-campus project site, there are a number of precautions you should follow in order to travel safely:

- Do not leave your bags or belongings unattended at any time. Security in airports and train stations are instructed to remove or destroy any unattended baggage. Do not agree to carry or look after packages or suitcases for individuals you do not know well. If someone approaches you to make such a request, tell security immediately. Make sure that no one puts anything in your luggage without your knowledge. Take all questions from airport personnel seriously and do not make jokes in response to security questions.
- Safeguard your passport! Your passport is the most valuable document you will carry abroad. It is your best form of identification and confirms your citizenship. You must guard it carefully. Do not lend it to anyone or use it as collateral for a loan of any sort. You will need it when you check into hotels, embassies or consulates, or when cashing travelers' checks. Some countries require that you carry it with you at all times as a means of identification. When you carry your passport, hide it securely on your person. Do not leave it in a handbag, book-bag, backpack or in an exposed pocket.
- Never keep all of your documents and money in one place or suitcase. You should make a list of all of your important numbers - your passport information as well as credit cards, travelers' checks and airline ticket numbers. Leave a copy at home, and carry a copy with you, separate from your valuables.
- **Always keep the resident faculty advisors informed of your whereabouts. If you plan to travel during the term, you must give your advisor an itinerary in writing. All student need to be accounted for every weekend whether you are traveling or not, see Appendix D.**
- **The IGSD will notify the parents of students who fail to return from a weekend excursion at the predetermined time. If you are delayed you MUST contact your resident faculty advisor to inform them that you are safe.**
- Have sufficient funds or a credit card on hand to purchase emergency items such as train or airline tickets.
- Always be careful about traveling alone.
- **All WPI students who are participating in the China E/A 2010 Project Program are expected to behave in a manner so as to not put themselves at risk.**
- **All students have an obligation to look out for each other and themselves. This means that if one student observes another engaging in risky behavior, that student should report the behavior to either of the faculty advisors. The faculty advisor must then address the issue with the student at risk. Repeated behavior identified as risky will be cause to be sent home.**
- Be as inconspicuous in dress and demeanor as possible. If the host country nationals do not wear baseball caps and sneakers, you will stand out as a foreigner if you do.
- Do not flash money or documents in public places. Be discreet in displaying your passport.

AVOIDING TRAVEL RISKS

Prepared By:
William L. Granahan CIC,LIA,CMC, Senior Consultant
J.H. Albert International Insurance Advisors, Inc.
Two Chestnut Place
72 River Park
Needham Heights, MA 02494-2631

Planning and Preparing:

Do not display provocative luggage tags, overly patriotic displays or any other indications that you are from the United States;

Do not pack anything that could be construed as a weapon, including knives, nail files, razors or other sharp instruments;

Arrive at the airport at least three hours in advance of your flight.

Air and Ground Travel:

Dress casual and look like a traveler; do not dress like a “flamboyant” US patriot;

Spend little time in foreign airports or public transportation areas that carry a high risk of or invite terrorist attacks;

Avoid air, rail and local ground carriers from countries where terrorist groups are based or have grievances;

Avoid flights or trains with intermediate stops, especially stops in hostile countries, which would allow terrorists to board;

In the Country;

Avoid countries, areas of countries and regions, even for leisure travel on weekends, that are hostile or likely to be hostile to Americans;

Study and understand the customs and political environment of the country(s) you are visiting;

Be prudent in your choice of eating and drinking establishments;

Avoid political discussions, confrontation and arguments;

Do not reveal personal information to casual acquaintances;

Beware of overly friendly or flirtatious persons;

Always travel in groups of two or more people;

Should you find yourself present during a coup, uprising or riot, remain in a safe harbor, such as your hotel or residence, that is not apt to be a military target;

Carry the phone number and address of the American Embassy and local police – and a cell phone if possible;

Return to your apartment or living quarters at a reasonable, early hour every night.

Safety Tips from the U.S. Department of State

Crime in many parts of the world seems to be increasing.

Visitors should take common sense precautions:

- Safety begins when you pack. Leave expensive jewelry behind. Dress conservatively; a flashy wardrobe or one that is too casual can mark you as a tourist. Use travelers' checks, not cash. Leave photocopies of your passport personal information page and your airline tickets with someone at home and carry an extra set with you.
- Use a money belt or a concealed money pouch for passports, cash and other valuables.
- In a car, keep doors locked, windows rolled up and valuables out of sight. A common trick is for a thief to reach through a car window and grab a watch from a persons' wrist or a purse or package from the seat while you are driving slowly or stopped in traffic.
- When you leave your car, try to find a guarded parking lot. Lock the car and keep valuables out of sight.
- When walking, avoid marginal areas of cities, dark alleys and crowds. Do not stop if you are approached on the street by strangers, including street vendors and beggars. Be aware that women and small children, as well as men, can be pickpockets or purse-snatchers. Keep your billfold in an inner front pocket, carry your purse tucked securely under your arm, and wear the shoulder-strap of your camera or bag across your chest. To guard against thieves on motorcycles, walk away from the curb, carrying your purse away from the street.
- Use official taxi stands rather than cruising taxis. Illegal taxis can be decoys for robbers.
- Whenever possible, do not travel alone. If you travel in isolated areas, go with a group or a reputable guide.
- Avoid travel at night.
- Money exchangers on the street pass off counterfeit U.S. dollars and local currency. Credit card fraud is growing.
- Do not take valuables to the mountains or on excursions.

Any U.S. citizen who is criminally assaulted should report the incident to the local police and to the nearest U.S. embassy or consulate.

The U.S. department of State has produced a website specifically for students going abroad. This site provides student specific travel tips and advice, and we strongly encourage you to visit it: www.studentsabroad.state.gov.

Drugs and the Legal System

When you are in a foreign country, you are subject to its laws. Learn about local laws and regulations, preferably before you arrive on site, and obey them. Deal only with authorized outlets when exchanging money or buying items such as airline tickets and travelers checks. Adhere strictly to the local laws because the penalties you risk are severe.

About 3,000 Americans are arrested overseas each year. Of these, approximately one-third are held on drug-related charges. Despite repeated warnings, drug arrests and convictions are still a common occurrence. Many countries have stiff penalties for drug violations and strictly enforce drug laws. You are subject to foreign, not U.S. laws while overseas, and you will find, if arrested, that:

- because you are subject to local laws abroad, there is very little that a U.S. consul can do for you if you encounter legal difficulties
- few countries provide jury trial
- most countries do not accept bail
- prisons may lack even minimal comforts: bed, toilet, wash basin
- officials may not speak English
- nutrition is often inadequate
- physical abuse, confiscation of personal property and inhumane treatment are possible

In other words, it is not worth imprisonment or extradition to break local laws. Be mature. Remember that laws are established for reasons (and you don't need to agree with those reasons), and that you are a guest, and should behave as such.

WPI Code of Conduct

As articulated in the Drug and Alcohol Policy in the WPI Code of Conduct, students may not possess, use, or distribute illicit drugs or possess drug related paraphernalia. If there are any complaints or evidence of illicit drug use, your Faculty Advisor(s) and the Director of Global Operations in the IGSD will initiate and follow the steps outlined in the "Informal Hearing Procedure at Off-Campus Residential Program Sites" to fairly investigate and adjudicate the matter. Drug policy violations are taken very seriously and could result in sanctions up to and including dismissal from the program.

Preparing for Your Trip to China

Before visiting China, you may need to get the following vaccinations and medications for vaccine-preventable diseases and other diseases you might be at risk for at your destination: (Note: Your doctor or health-care provider will determine what you will need, depending on factors such as your health and immunization history, areas of the country you will be visiting, and planned activities.)

To have the most benefit, see a health-care provider at least 4–6 weeks before your trip to allow time for your vaccines to take effect and to start taking medicine to prevent malaria, if you need it.

Even if you have less than 4 weeks before you leave, you should still see a health-care provider for needed vaccines, anti-malaria drugs and other medications and information about how to protect yourself from illness and injury while traveling.

CDC recommends that you see a health-care provider who specializes in Travel Medicine. [Find a travel medicine clinic](#) near you. If you have a medical condition, you should also share your travel plans with any doctors you are currently seeing for other medical reasons.

If your travel plans will take you to more than one country during a single trip, be sure to let your health-care provider know so that you can receive the appropriate vaccinations and information for all of your destinations. Long-term travelers, such as those who plan to work or study abroad, may also need additional vaccinations as required by their employer or school.

Although yellow fever is not a disease risk in China, the government requires travelers arriving from [countries where yellow fever is present](#) to present proof of yellow fever vaccination. If you will be traveling to one of these countries where yellow fever is present before arriving in China, this requirement must be taken into consideration.

Be sure your routine vaccinations are up-to-date. Check the links below to see which vaccinations adults and children should get.

Routine vaccines, as they are often called, such as for influenza, chickenpox (or varicella), polio, measles/mumps/rubella (MMR), and diphtheria/pertussis/tetanus (DPT) are given at all stages of life; see the [childhood and adolescent immunization schedule](#) and [routine adult immunization schedule](#).

Routine vaccines are recommended even if you do not travel. Although childhood diseases, such as measles, rarely occur in the United States, they are still common in many parts of the world. A traveler who is not vaccinated would be at risk for infection.

Vaccine-Preventable Diseases

Vaccine recommendations are based on the best available risk information. Please note that the level of risk for vaccine-preventable diseases can change at any time.

Vaccination or Disease	Recommendations or Requirements for Vaccine-Preventable Diseases
Routine	Recommended if you are not up-to-date with routine shots such as, measles/mumps/rubella (MMR) vaccine, diphtheria/pertussis/tetanus (DPT) vaccine, poliovirus vaccine, etc.
Hepatitis A or immune globulin (IG)	Recommended for all unvaccinated people traveling to or working in countries with an intermediate or high level of hepatitis A virus infection (see map) where exposure might occur through food or water. Cases of travel-related hepatitis A can also occur in travelers to developing countries with "standard" tourist itineraries, accommodations, and food consumption behaviors.
Hepatitis B	Recommended for all unvaccinated persons traveling to or working in countries with intermediate to high levels of endemic HBV transmission (see map), especially those who might be exposed to blood or body fluids, have sexual contact with the local population, or be exposed through medical treatment (e.g., for an accident).
Typhoid	Recommended for all unvaccinated people traveling to or working in East Asia, especially if visiting smaller cities, villages, or rural areas and staying with friends or relatives where exposure might occur through food or water.
Rabies	Recommended for travelers spending a lot of time outdoors, especially in rural areas, involved in activities such as bicycling, camping, or hiking. Also recommended for travelers with significant occupational risks (such as veterinarians), for long-term travelers and expatriates living in areas with a significant risk of exposure, and for travelers involved in any activities that might bring them into direct contact with bats, carnivores, and other mammals. Children are considered at higher risk because they tend to play with animals, may receive more severe bites, or may not report bites.
Japanese encephalitis	Recommended if you plan to visit rural farming areas and under special circumstances, such as a known outbreak of Japanese encephalitis, see country-specific information .

Malaria

Areas of China with Malaria: Rural parts of Anhui, Yunnan, Hainan provinces. Rare cases occur in other rural parts of the country <1,500 m (<4,921 ft) during May–December. None in major river cruises and urban areas.

If you will be visiting an area of China with malaria, you will need to discuss with your doctor the best ways for you to avoid getting sick with malaria. Ways to prevent malaria include the following:

- Taking a prescription antimalarial drug
- Using insect repellent and wearing long pants and sleeves to prevent mosquito bites
- Sleeping in air-conditioned or well-screened rooms or using bednets

Some areas of China have resistance to certain antimalarial drugs. See the [Malaria Risk Information and Prophylaxis, by Country](#) chart to find out which antimalarial drug is appropriate for the area you plan to visit in China. For information that can help you and your doctor decide which of these drugs would be best for you, please see [Drugs to Prevent Malaria](#).

To find out more information on malaria throughout the world, you can use the [interactive CDC malaria map](#). You can search or browse countries, cities, and place names for more specific malaria risk information and the recommended prevention medicines for that area.

Malaria Contact for Health-Care Providers

For assistance with the diagnosis or management of suspected cases of malaria, call the CDC Malaria Hotline: **770-488-7788** (M-F, 9 am-5 pm, Eastern time). For emergency consultation after hours, call **770-488-7100** and ask to speak with a CDC Malaria Branch clinician.

A Special Note about Antimalarial Drugs

You should purchase your antimalarial drugs before travel. Drugs purchased overseas may not be manufactured according to United States standards and may not be effective. They also may be dangerous, contain counterfeit medications or contaminants, or be combinations of drugs that are not safe to use.

Halofantrine (marketed as Halfan) is widely used overseas to treat malaria. CDC recommends that you do **NOT** use halofantrine because of serious heart-related side effects, including deaths. You should avoid using antimalarial drugs that are not recommended **unless** you have been diagnosed with life-threatening malaria and no other options are immediately available.

For detailed information about these antimalarial drugs, see [Information for the Public: Prescription Drugs for Malaria](#).

More Information About Malaria

Malaria is always a serious disease and may be a deadly illness. Humans get malaria from the bite of a mosquito infected with the parasite. Prevent this serious disease by seeing your health-care provider for a prescription antimalarial drug and by protecting yourself against mosquito bites ([see below](#)).

Travelers to malaria risk-areas in China, including infants, children, and former residents of China, should take one of the antimalarial drugs listed in the box above.

Symptoms

Malaria symptoms may include

- fever
- chills

- sweats
- headache
- body aches
- nausea and vomiting
- fatigue

Malaria symptoms will occur at least 7 to 9 days after being bitten by an infected mosquito. Fever in the first week of travel in a malaria-risk area is unlikely to be malaria; however, you should see a doctor right away if you develop a fever during your trip.

Malaria may cause anemia and jaundice. Malaria infections with *Plasmodium falciparum*, if not promptly treated, may cause kidney failure, coma, and death. Despite using the protective measures outlined above, travelers may still develop malaria up to a year after returning from a malarious area. You should see a doctor immediately if you develop a fever anytime during the year following your return and tell the physician of your travel.

Items to Bring With You

Medicines you may need:

- **The prescription medicines you take every day.** Make sure you have enough to last during your trip. Keep them in their original prescription bottles and always in your carry-on luggage. Be sure to follow security guidelines, if the medicines are liquids.
- Antimalarial drugs, if traveling to a malaria-risk area in China and prescribed by your doctor.
- **Medicine for diarrhea**, usually over-the-counter.

Note: Some drugs available by prescription in the US are illegal in other countries. Check the US Department of State Consular Information Sheets for the country(s) you intend to visit or the embassy or consulate for that country(s). If your medication is not allowed in the country you will be visiting, ask your health-care provider to write a letter on office stationery stating the medication has been prescribed for you.

Other items you may need:

- Iodine tablets and portable water filters to purify water if bottled water is not available. See A Guide to Water Filters, A Guide to Commercially-Bottled Water and Other Beverages, and Safe Food and Water for more detailed information.
- Sunblock and sunglasses for protection from harmful effects of UV sun rays. See Basic Information about Skin Cancer for more information.
- Antibacterial hand wipes or alcohol-based hand sanitizer containing at least 60% alcohol.
- To prevent insect/mosquito bites, bring:
 - Lightweight long-sleeved shirts, long pants, and a hat to wear outside, whenever possible.
 - Flying-insect spray to help clear rooms of mosquitoes. The product should contain a pyrethroid insecticide; these insecticides quickly kill flying insects, including mosquitoes.

- Bed nets treated with permethrin, if you will not be sleeping in an air-conditioned or well-screened room and will be in malaria-risk areas. For use and purchasing information, see [Insecticide Treated Bed Nets](#) on the CDC malaria site. Overseas, permethrin or another insecticide, deltamethrin, may be purchased to treat bed nets and clothes.

See other suggested over-the-counter medications and first aid items for a [travelers' health kit](#).

Note: Check the [Air Travel section](#) of the [Transportation Security Administration](#) website for the latest information about airport screening procedures and prohibited items.

Other Diseases Found in East Asia

Risk can vary between countries within this region and also within a country; the quality of in-country surveillance also varies.

The following are disease risks that might affect travelers; this is not a complete list of diseases that can be present. Environmental conditions may also change, and up to date information about risk by regions within a country may also not always be available.

[Dengue](#), [filariasis](#), [Japanese encephalitis](#), [leishmaniasis](#), and [plague](#) are diseases carried by insects that also occur in East Asia. [Tickborne encephalitis](#) occurs in forested regions in northeastern China and in South Korea. Protecting yourself against insect bites ([see below](#)) will help to prevent these diseases.

Respiratory infections (origins often undefined) are common in travelers to East Asia.

Highly pathogenic avian influenza (H5N1) continues to cause outbreaks in domestic and wild bird populations and has caused human cases in several East Asian countries. Avoid all direct contact with birds, including domestic poultry (such as chickens and ducks) and wild birds, and avoid places such as poultry farms and bird markets where live birds are raised or kept. For a current list of countries reporting outbreaks of H5N1 among poultry and/or wild birds, view [updates from the World Organization for Animal Health \(OIE\)](#), and for total numbers of confirmed human cases of H5N1 virus by country see the [World Health Organization \(WHO\) Avian Influenza website](#).

[Measles](#) remains endemic in the region, and infection has occurred in adopted children from China and in travelers to the region. Influenza may occur during all months of the year.

Do not swim in fresh water (except in well-chlorinated swimming pools) in East Asian countries.

[Schistosomiasis](#) (*Schistosoma japonicum*) is present in focal areas in China, especially in the Yangtze River basin. [Leptospirosis](#) is a risk, especially in tropical areas of China and South Korea.

[Rabies](#) is widespread in China (not Hong Kong) and Mongolia.

Staying Healthy During Your Trip

Prevent Insect Bites

Many diseases, like [malaria](#) and [denque](#), are spread through insect bites. One of the best protections is to prevent insect bites by:

- Using insect repellent (bug spray) with 30%-50% DEET. Picaridin, available in 7% and 15% concentrations, needs more frequent application. There is less information available on how effective picaridin is at protecting against all of the types of mosquitoes that transmit malaria.
- Wearing long-sleeved shirts, long pants, and a hat outdoors.
- Remaining indoors in a screened or air-conditioned area during the peak biting period for malaria (dusk and dawn).
- Sleeping in beds covered by nets treated with permethrin, if not sleeping in an air-conditioned or well-screened room.
- Spraying rooms with products effective against flying insects, such as those containing pyrethroid.

For detailed information about insect repellent use, see [Insect and Arthropod Protection](#).

Prevent Animal Bites and Scratches

Direct contact with animals can spread diseases like rabies or cause serious injury or illness. It is important to prevent animal bites and scratches.

- Be sure you are up to date with tetanus vaccination.
- Do not touch or feed any animals, including dogs and cats. Even animals that look like healthy pets can have rabies or other diseases.
- Help children stay safe by supervising them carefully around all animals.
- If you are bitten or scratched, wash the wound well with soap and water and **go to a doctor right away**.
- After your trip, be sure to tell your doctor or state health department if you were bitten or scratched during travel.

For more information about rabies and travel, see the [Rabies chapter](#) of the [Yellow Book](#) or [CDC's Rabies homepage](#). For more information about how to protect yourself from other risks related to animals, see [Animal-Associated Hazards](#).

Be Careful about Food and Water

Diseases from food and water are the leading cause of illness in travelers. Follow these tips for safe eating and drinking:

- Wash your hands often with soap and water, especially before eating. If soap and water are not available, use an alcohol-based hand gel (with at least 60% alcohol).
- Drink only bottled or boiled water, or carbonated (bubbly) drinks in cans or bottles. Avoid tap water, fountain drinks, and ice cubes. If this is not possible, learn how to [make water safer to drink](#).
- Do not eat food purchased from street vendors.

- Make sure food is fully cooked.
- Avoid dairy products, unless you know they have been pasteurized.

Diseases from food and water often cause vomiting and diarrhea. Make sure to bring diarrhea medicine with you so that you can treat mild cases yourself.

Avoid Injuries

Car crashes are a leading cause of injury among travelers. Protect yourself from these injuries by:

- Not drinking and driving.
- Wearing your seat belt and using car seats or booster seats in the backseat for children.
- Following local traffic laws.
- Wearing helmets when you ride bikes, motorcycles, and motor bikes.
- Not getting on an overloaded bus or mini-bus.
- Hiring a local driver, when possible.
- Avoiding night driving.

Other Health Tips

- To avoid infections such as HIV and viral hepatitis do not share needles for tattoos, body piercing, or injections.
- To reduce the risk of HIV and other sexually transmitted diseases always use latex condoms.
- To prevent fungal and parasitic infections, keep feet clean and dry, and do not go barefoot, especially on beaches where animals may have defecated.

After You Return Home

If you are not feeling well, you should see your doctor and mention that you have recently traveled. Also tell your doctor if you were bitten or scratched by an animal while traveling.

If you have visited a malaria-risk area, continue taking your antimalarial drug for 4 weeks (chloroquine, doxycycline, or mefloquine) or seven days (atovaquone/proguanil) after leaving the risk area.

Malaria is always a serious disease and may be a deadly illness. If you become ill with a fever or flu-like illness either while traveling in a malaria-risk area or after you return home (for up to 1 year), you should seek **immediate** medical attention and should tell the physician your travel history.

Important Note: This document is not a complete medical guide for travelers to this region. Consult with your doctor for specific information related to your needs and your medical history; recommendations may differ for pregnant women, young children, and persons who have chronic medical conditions.

Health Issues: HIV and AIDS information

Acquired immunodeficiency syndrome (AIDS) is a severe, often life-threatening, illness caused by the human immunodeficiency virus (HIV). The incubation period for AIDS is very long and variable, ranging from a few months to many years. Some individuals infected with HIV have remained asymptomatic for more than a decade. Currently, there is no vaccine to protect against infection with HIV. Although there is no cure for AIDS, treatments for HIV infection and prophylaxis for many opportunistic diseases that characterize AIDS are available.

The universal precaution to prevent infection of either AIDS and/or HIV is to assume that everyone you meet has these diseases. While this may seem extreme, there is no way to judge from looking at someone whether or not they have been exposed to these illnesses or if, in fact, they are infected.

HIV infection and AIDS have been reported worldwide. The number of persons infected with HIV is estimated by WHO to be approaching the range of 18 million worldwide. Because HIV infection and AIDS are globally distributed, the risk to international travelers is determined less by their geographic destination than by their sexual and drug using behaviors.

Transmission and Prevention Information

The global epidemic of HIV infection and AIDS has raised several issues regarding HIV infection and international travel. The first is the need of information for international travelers regarding HIV transmission and how HIV infection can be prevented.

HIV infection is preventable. HIV is transmitted through sexual intercourse, needle or syringe sharing, by medical use of blood or blood components, and perinatally from an infected woman to her baby. HIV is not transmitted through casual contact; air, food, or water routes; contact with inanimate objects; or through mosquitoes or other arthropod vectors. The use of any public conveyance (e.g., airplane, automobile, boat, bus, train) by persons with AIDS or HIV infection does not pose a risk of infection for the crew or other passengers.

Increased risk for contracting AIDS and HIV

Travelers are at risk if they:

- have sexual intercourse (heterosexual or homosexual) with an infected person;
- use or allow the use of contaminated, unsterilized syringes or needles for any injections or other skin-piercing procedures including acupuncture, use of illicit drugs, steroid or vitamin injections, medical/dental procedures, **ear or body piercing, or tattooing**;
- use infected blood, blood components, or clotting factor concentrates. HIV infection by this route is a rare occurrence in those countries or cities where donated blood/plasma is screened for HIV antibody.

People should avoid sexual encounters with a person who is infected with HIV or whose HIV infection status is unknown. This includes avoiding sexual activity with intravenous drug users and persons with multiple sexual partners, such as male or female prostitutes. Condoms, when used consistently and correctly, prevent transmission of HIV. Persons who engage in vaginal, anal, or oral-genital intercourse with anyone who is infected with HIV or whose infection status is unknown should use a condom.

Advice from the CDC: General Travel Precautions

The following web address should be accessed for health information specific to where you will be traveling: <http://wwwn.cdc.gov/travel/default.aspx>. We strongly encourage all students to review these guidelines, advice and suggestions carefully. If vaccines are recommended then you should consult with your own personal health care professional (who has knowledge of your medical history) to determine what the best course of action is for you. The IGSD cannot provide medical advice. Any opinions expressed by students, advisors, or center directors with regard to medical issues are only opinions and should not be taken as authoritative.

The preventive measures you need to take while traveling depend on the areas you visit and the length of time you stay. All travelers should take the following precautions, no matter the destination:

- Wash hands often with soap and water.
- Because motor vehicle crashes are a leading cause of injury among travelers, walk and drive defensively.
- Avoid travel at night if possible and always use seat belts.
- Always use latex condoms to reduce the risk of HIV and other sexually transmitted diseases.
- Don't eat or drink dairy products unless you know they have been pasteurized.
- Don't share needles with anyone.
- Never eat undercooked ground beef and poultry, raw eggs, and un-pasteurized dairy products. Raw shellfish is particularly dangerous to persons who have liver disease or compromised immune systems.
- Drink only bottled or boiled water, or carbonated (bubbly) drinks in cans or bottles. Avoid tap water, fountain drinks, and ice cubes. If this is not possible, make water safer by BOTH filtering through an "absolute 1-micron or less" filter AND adding iodine tablets to the filtered water. "Absolute 1-micron filters" are found in camping/outdoor supply stores.
- Eat only thoroughly cooked food or fruits and vegetables you have peeled yourself. Remember: boil it, cook it, peel it, or forget it.
- If you visit an area where there is risk for malaria, take your malaria prevention medication before, during, and after travel, as directed. (See your doctor for a prescription.)
- Protect yourself from insects by remaining in well-screened areas, using repellents (applied sparingly at 4-hour intervals), and wearing long-sleeved shirts and long pants from dusk through dawn.
- To prevent fungal and parasitic infections, keep feet clean and dry, and do not go barefoot.

To Avoid Getting Sick

- Don't eat food purchased from street vendors.
- Don't drink beverages with ice.
- Don't eat dairy products unless you know they have been pasteurized.
- Don't share needles with anyone.
- Don't handle animals (especially monkeys, dogs, and cats), to avoid bites and serious diseases (including rabies and plague).
- Don't swim in fresh water. Salt water is usually safer.

What You Need To Bring with You

- Long-sleeved shirt and long pants to wear while outside whenever possible, to prevent illnesses carried by insects (e.g., malaria, dengue, filariasis, and Japanese encephalitis).

- Insect repellent containing DEET (diethylmethylnoluamide), in 30%–35% strength for adults and 6%–10% for children.
- Over-the-counter antidiarrheal medicine to take if you have diarrhea.
- Iodine tablets and water filters to purify water if bottled water is not available. See Do's above for more detailed information about water filters.
- Sunblock, sunglasses, hat.
- Prescription medications: make sure you have enough to last during your trip, as well as a copy of the prescription(s).

After You Return Home

- If you have visited an area where there is risk for malaria, continue taking your malaria medication weekly for 4 weeks after you leave the area.
- If you become ill after travel—even as long as a year after your trip—tell your doctor the areas you have visited.

CDC Information for China:

<http://wwwn.cdc.gov/TRAVEL/destinationChina.aspx>

Section 3 – Site Specific Information for China

This guide has been produced to provide you with some basic information about travel to and living in China. You will receive more information throughout the preparation term.

Dates

E 2010: You are expected to be in China by the arrival date below, and to stay in China until the departure date. Do not plan to arrive later than June 27, nor to leave earlier than August 21. When planning your travel, note that one typically arrives in Shanghai two calendar days after leaving the US!

A2010: You are expected to be in China by the arrival date below, and to stay in China until the departure date. Do not plan to arrive later than August 18, nor to leave earlier than October 14. When planning your travel, note that one typically arrives in Shanghai two calendar days after leaving the US!

<i>E term Arrival:</i>	<i>Sunday June 27, 2010</i>
<i>E term Departure:</i>	<i>earliest possible departure date is Saturday, August 21, 2010.</i>
<i>A term Arrival:</i>	<i>Wednesday, August 18, 2010</i>
<i>A Term Departure:</i>	<i>Thursday, October 14, 2010</i>

Housing in China

WPI students will be living in international student residence halls at Huazhong University of Science and Technology. The rooms have air conditioning, a refrigerator, and a bathroom, and are usually double or multiple occupancy. You may or may not be able to cook in your rooms but there are many locations in the area at which you can eat well and inexpensively. When you travel to other cities for project activity, the hotel arrangements will be made by the company you work with, at the company's cost.

There is a convenient and inexpensive laundry service available in your residence halls. You will have internet access and telephone service in your room. The phone number will be available when you check into the room. If there are problems with the dormitory, please notify the manager and your advisors.

Consistent with WPI's Residence Hall policy there are no pets allowed in project center housing. Violation of this policy can result in your termination from a residential project center.

Your **mailing address** will be as follows; please note that it can take several weeks for mail from the US to be delivered:

**c/o Mr. Wuzhou Li, Mechanical Engineering School
East-3 Building
Huazhong University of Science and technology
1037 Luoyu Road
Wuhan, 430074
China**

Calling Home

Calling home from a foreign country can be a challenging experience; phones may not be familiar and the costs of calling overseas using the local phone system can be very high. For these reasons, it is highly recommended that you carry some sort of calling card. Calling cards that allow inexpensive calls to the US are widely available in China.

Money Issues

Purchasing Chinese Yuan (RMB) in the US is very expensive; we don't recommend it. Traveler's checks are always a safe bet, although you usually have to go to a bank with your passport to exchange them. A credit card and ATM card can be used to get cash in large cities such as Beijing and Shanghai as well as Wuhan. Since the lodging and project expense related travel costs are paid by WPI, and since food is relatively cheap small amounts of cash should be sufficient to meet your needs.

Arrival in China

If you arrive at Shanghai on Sunday, June 15, Professor Rong (or a person assigned by him) will meet you at the airport and arrange for you to get to the hotel. The hotel information will be available before your departure for China.

If you arrive at another time, you may take a taxi to the hotel. It may cost you CN\$150 (about US\$20). Just show the hotel name and address to the taxi driver. He or she will bring you to the hotel. Most taxi drivers take US dollars. You can always call Professor Rong to get help.

On June 17, all WPI students will go together with Professor Rong, co-advisors, and project partners of HUST students from Shanghai (or Nanjing, depending on the project groups) to Wuhan, where HUST is located. You will take a train to get there.

Medical Care

Hospitals can be found and medical services for students are available on the campus of HUST. The phone number for the Campus Hospital is +86-27-87543569. Dental services and mental health services are included in the medical service. When you travel in China, medical services are available in every major city. Try to get help from your project partners, co-advisors, and Professor Rong.

Shanghai Mental Health Center

600 Wanping Nan Lu
Shanghai, China
Telephone (86) (21) 64387250

Weather and Clothing

Wuhan is a hot place with high humidity. The high temperature may reach 100°F. Your attire at your sponsor sites should be informal in general, except for your final presentation.

Emergency Phone Numbers

	Office	Home	Cell

Area code is 508

BACKGROUND NOTES: U.S. STATE DEPARTMENT

OFFICIAL NAME:

[People's Republic of China](#)

Geography

Total area: 9,596,961 sq. km. (about 3.7 million sq. mi.).

Cities: Capital--Beijing. Other major cities--Shanghai, Tianjin, Shenyang, Wuhan, Guangzhou, Chongqing, Harbin, Chengdu.

Terrain: Plains, deltas, and hills in east; mountains, high plateaus, deserts in west.

Climate: Tropical in south to subarctic in north.

People

Nationality: Noun and adjective--Chinese (singular and plural).

Population (July 2009 est.): 1,338,612,968.

Population growth rate (2009 est.): 0.655%.

Health (2009 est.): Infant mortality *rate*--20.25 deaths/1,000 live births. Life *expectancy*--73.47 years (overall); 71.61 years for males, 75.52 years for females.

Ethnic groups: Han Chinese 91.5%; Zhuang, Manchu, Hui, Miao, Uyghur, Tujia, Yi, Mongol, Tibetan, Buyi, Dong, Yao, Korean, and other nationalities 8.5%.

Religions: Officially atheist; Daoist (Taoist), Buddhist, Christian 3%-4%, Muslim 1%-2%.

Language: Mandarin (Putonghua), plus many local dialects.

Education: Years compulsory--9. Literacy--90.9%.

Work force (2008 est., 808 million): Agriculture and *forestry*--43%; *services*--32%.

Government

Type: Communist party-led state.

Constitution: December 4, 1982; revised several times, most recently in 2004.

Independence: Unification under the Qin (Ch'in) Dynasty 221 BC; Qing (Ch'ing or Manchu)

Dynasty replaced by a republic on February 12, 1912; People's Republic established October 1, 1949.

Branches: Executive--president, vice president, State Council, premier. Legislative--unicameral National People's Congress. Judicial--Supreme People's Court.

Administrative divisions: 23 provinces (the P.R.C. considers Taiwan to be its 23rd province); 5 autonomous regions, including Tibet; 5 municipalities directly under the State Council.

Political parties: Chinese Communist Party, 73.1 million members; 8 minor parties under Communist Party supervision.

Economy

GDP (2008): \$4.222 trillion (exchange rate-based).

Per capita GDP (2007): \$2,459 (exchange rate-based).

GDP real growth rate (2008): 9.8%.

Natural resources: Coal, iron ore, petroleum, natural gas, mercury, tin, tungsten, antimony, manganese, molybdenum, vanadium, magnetite, aluminum, lead, zinc, uranium, hydropower potential (world's largest).

Agriculture: Products--Among the world's largest producers of rice, wheat, potatoes, corn, peanuts, tea, millet, barley; commercial crops include cotton, other fibers, apples, oilseeds, pork and fish; produces variety of livestock products.

Industry: Types--mining and ore processing, iron, steel, aluminum, and other metals, coal; machine building; armaments; textiles and apparel; petroleum; cement; chemicals; fertilizers; consumer products, including footwear, toys, and electronics; food processing; transportation equipment, including automobiles, rail cars and locomotives, ships, and aircraft; telecommunications equipment, commercial space launch vehicles, satellites.

Trade (2008): *Exports*--\$1.5 trillion: electrical and other machinery, including data processing equipment, apparel, textiles, iron and steel, optical and medical equipment. Main partners--United States 19.1%, Hong Kong 15.1%, Japan 8.4%, South Korea 4.6%, Germany 4% (2007). *Imports*--\$1.156 trillion: electrical and other machinery, oil and mineral fuels, optical and medical equipment, metal ores, plastics, organic chemicals. Main partners--Japan 14%, South Korea 10.9%, Taiwan 10.5%, U.S. 7.3%, Germany 4.7% (2007).

PEOPLE

Ethnic Groups

The largest ethnic group is the Han Chinese, who constitute about 91.5% of the total population. The remaining 8.5% are Zhuang (16 million), Manchu (10 million), Hui (9 million), Miao (8 million), Uyghur (7 million), Yi (7 million), Mongol (5 million), Tibetan (5 million), Buyi (3 million), Korean (2 million), and other ethnic minorities.

Language

There are seven major Chinese dialects and many subdialects. Mandarin (or Putonghua), the predominant dialect, is spoken by over 70% of the population. It is taught in all schools and is the medium of government. About two-thirds of the Han ethnic group are native speakers of Mandarin; the rest, concentrated in southwest and southeast China, speak one of the six other major Chinese dialects. Non-Chinese languages spoken widely by ethnic minorities include Mongolian, Tibetan, Uyghur and other Turkic languages (in Xinjiang), and Korean (in the northeast).

The Pinyin System of Romanization

On January 1, 1979, the Chinese Government officially adopted the pinyin system for spelling Chinese names and places in Roman letters. A system of Romanization invented by the Chinese, pinyin has long been widely used in China on street and commercial signs as well as in elementary Chinese textbooks as an aid in learning Chinese characters. Variations of pinyin also are used as the written forms of several minority languages.

Pinyin has now replaced other conventional spellings in China's English-language publications. The U.S. Government also has adopted the pinyin system for all names and places in China. For example, the capital of China is now spelled "Beijing" rather than "Peking."

Religion

Religion plays a significant part in the life of many Chinese. Buddhism is most widely practiced, with an estimated 100 million adherents. Traditional Taoism also is practiced. Official figures indicate there are 20 million Muslims, 15 million Protestants, and 5 million Catholics; unofficial estimates are much higher. While the Chinese constitution affirms religious toleration, the Chinese Government places restrictions on religious practice outside officially recognized organizations. Only two Christian organizations--a Catholic church without official ties to Rome and the "Three-Self-Patriotic" Protestant church--are sanctioned by the Chinese Government. Unauthorized churches have sprung up in many parts of the country and unofficial religious practice is growing. In some regions authorities have tried to control activities of these unregistered churches. In other regions, registered and unregistered groups are treated similarly by authorities and congregations worship in both types of churches. Most Chinese Catholic bishops are recognized by the Pope, and official priests have Vatican approval to administer all the sacraments.

Population Policy

With a population officially just over 1.3 billion and an estimated growth rate of about 0.6%, China is very concerned about its population growth and has attempted with mixed results to implement a strict birth limitation policy. China's 2002 Population and Family Planning Law and policy permit one child per family, with allowance for a second child under certain circumstances, especially in

rural areas, and with guidelines looser for ethnic minorities with small populations. Enforcement varies, and relies largely on "social compensation fees" to discourage extra births. Official government policy opposes forced abortion or sterilization, but in some localities there are instances of forced abortion. The government's goal is to stabilize the population in the first half of the 21st century, and current projections are that the population will peak at around 1.6 billion by 2050.

HISTORY

Dynastic Period

China is the oldest continuous major world civilization, with records dating back about 3,500 years. Successive dynasties developed a system of bureaucratic control that gave the agrarian-based Chinese an advantage over neighboring nomadic and hill cultures. Chinese civilization was further strengthened by the development of a Confucian state ideology and a common written language that bridged the gaps among the country's many local languages and dialects. Whenever China was conquered by nomadic tribes, as it was by the Mongols in the 13th century, the conquerors sooner or later adopted the ways of the "higher" Chinese civilization and staffed the bureaucracy with Chinese.

The last dynasty was established in 1644, when the Manchus overthrew the native Ming dynasty and established the Qing (Ch'ing) dynasty with Beijing as its capital. At great expense in blood and treasure, the Manchus over the next half century gained control of many border areas, including Xinjiang, Yunnan, Tibet, Mongolia, and Taiwan. The success of the early Qing period was based on the combination of Manchu martial prowess and traditional Chinese bureaucratic skills.

During the 19th century, Qing control weakened, and prosperity diminished. China suffered massive social strife, economic stagnation, explosive population growth, and Western penetration and influence. The Taiping and Nian rebellions, along with a Russian-supported Muslim separatist movement in Xinjiang, drained Chinese resources and almost toppled the dynasty. Britain's desire to continue its illegal opium trade with China collided with imperial edicts prohibiting the addictive drug, and the First Opium War erupted in 1840. China lost the war; subsequently, Britain and other Western powers, including the United States, forcibly occupied "concessions" and gained special commercial privileges. Hong Kong was ceded to Britain in 1842 under the Treaty of Nanking, and in 1898, when the Opium Wars finally ended, Britain executed a 99-year lease of the New Territories, significantly expanding the size of the Hong Kong colony.

As time went on, the Western powers, wielding superior military technology, gained more economic and political privileges. Reformist Chinese officials argued for the adoption of Western technology to strengthen the dynasty and counter Western advances, but the Qing court played down both the Western threat and the benefits of Western technology.

Early 20th Century China

Frustrated by the Qing court's resistance to reform, young officials, military officers, and students--inspired by the revolutionary ideas of Sun Yat-sen--began to advocate the overthrow of the Qing dynasty and creation of a republic. A revolutionary military uprising on October 10, 1911, led to the abdication of the last Qing monarch. As part of a compromise to overthrow the dynasty without a civil war, the revolutionaries and reformers allowed high Qing officials to retain prominent positions in the new republic. One of these figures, Gen. Yuan Shikai, was chosen as the republic's first president. Before his death in 1916, Yuan unsuccessfully attempted to name himself emperor. His death left the republican government all but shattered, ushering in the era of the "warlords" during which China was ruled and ravaged by shifting coalitions of competing provincial military leaders.

In the 1920s, Sun Yat-sen established a revolutionary base in south China and set out to unite the fragmented nation. With Soviet assistance, he organized the Kuomintang (KMT or "Chinese Nationalist People's Party"), and entered into an alliance with the fledgling Chinese Communist Party (CCP). After Sun's death in 1925, one of his proteges, Chiang Kai-shek, seized control of the KMT and succeeded in bringing most of south and central China under its rule. In 1927, Chiang turned on the CCP and executed many of its leaders. The remnants fled into the mountains of eastern China. In 1934, driven out of their mountain bases, the CCP's forces embarked on a "Long March" across some of China's most desolate terrain to the northwestern province of Shaanxi, where they established a guerrilla base at Yan'an.

During the "Long March," the communists reorganized under a new leader, Mao Zedong (Mao Tse-tung). The bitter struggle between the KMT and the CCP continued openly or clandestinely through the 14-year long Japanese invasion (1931-45), even though the two parties nominally formed a united front to oppose the Japanese invaders in 1937. The war between the two parties resumed after the Japanese defeat in 1945. By 1949, the CCP occupied most of the country.

Chiang Kai-shek fled with the remnants of his KMT government and military forces to Taiwan, where he proclaimed Taipei to be China's "provisional capital" and vowed to re-conquer the Chinese mainland. Taiwan still calls itself the "Republic of China."

The People's Republic of China

In Beijing, on October 1, 1949, Mao Zedong proclaimed the founding of the People's Republic of China (P.R.C.). The new government assumed control of a people exhausted by two generations of war and social conflict, and an economy ravaged by high inflation and disrupted transportation links. A new political and economic order modeled on the Soviet example was quickly installed.

In the early 1950s, China undertook a massive economic and social reconstruction program. The new leaders gained popular support by curbing inflation, restoring the economy, and rebuilding many war-damaged industrial plants. The CCP's authority reached into almost every aspect of Chinese life. Party control was assured by large, politically loyal security and military forces; a government apparatus responsive to party direction; and the placement of party members into leadership positions in labor, women's, and other mass organizations.

The "Great Leap Forward" and the Sino-Soviet Split

In 1958, Mao broke with the Soviet model and announced a new economic program, the "Great Leap Forward," aimed at rapidly raising industrial and agricultural production. Giant cooperatives (communes) were formed, and "backyard factories" dotted the Chinese landscape. The results were disastrous. Normal market mechanisms were disrupted, agricultural production fell behind, and China's people exhausted themselves producing what turned out to be shoddy, un-salable goods. Within a year, starvation appeared even in fertile agricultural areas. From 1960 to 1961, the combination of poor planning during the Great Leap Forward and bad weather resulted in one of the deadliest famines in human history.

The already strained Sino-Soviet relationship deteriorated sharply in 1959, when the Soviets started to restrict the flow of scientific and technological information to China. The dispute escalated, and the Soviets withdrew all of their personnel from China in August 1960. In 1960, the Soviets and the Chinese began to have disputes openly in international forums.

The Cultural Revolution

In the early 1960s, State President Liu Shaoqi and his protege, Party General Secretary Deng Xiaoping, took over direction of the party and adopted pragmatic economic policies at odds with Mao's revolutionary vision. Dissatisfied with China's new direction and his own reduced authority, Party Chairman Mao launched a massive political attack on Liu, Deng, and other pragmatists in the spring of 1966. The new movement, the "Great Proletarian Cultural Revolution," was

unprecedented in communist history. For the first time, a section of the Chinese communist leadership sought to rally popular opposition against another leadership group. China was set on a course of political and social anarchy that lasted the better part of a decade.

In the early stages of the Cultural Revolution, Mao and his "closest comrade in arms," National Defense Minister Lin Biao, charged Liu, Deng, and other top party leaders with dragging China back toward capitalism. Radical youth organizations, called Red Guards, attacked party and state organizations at all levels, seeking out leaders who would not bend to the radical wind. In reaction to this turmoil, some local People's Liberation Army (PLA) commanders and other officials maneuvered to outwardly back Mao and the radicals while actually taking steps to rein in local radical activity.

Gradually, Red Guard and other radical activity subsided, and the Chinese political situation stabilized along complex factional lines. The leadership conflict came to a head in September 1971, when Party Vice Chairman and Defense Minister Lin Biao reportedly tried to stage a coup against Mao; Lin Biao allegedly later died in a plane crash in Mongolia.

In the aftermath of the Lin Biao incident, many officials criticized and dismissed during 1966-69 were reinstated. Chief among these was Deng Xiaoping, who reemerged in 1973 and was confirmed in 1975 in the concurrent posts of Party Vice Chairman, Politburo Standing Committee member, PLA Chief of Staff, and Vice Premier.

The ideological struggle between more pragmatic, veteran party officials and the radicals re-emerged with a vengeance in late 1975. Mao's wife, Jiang Qing, and three close Cultural Revolution associates (later dubbed the "Gang of Four") launched a media campaign against Deng. In January 1976, Premier Zhou Enlai, a popular political figure, died of cancer. On April 5, Beijing citizens staged a spontaneous demonstration in Tiananmen Square in Zhou's memory, with strong political overtones of support for Deng. The authorities forcibly suppressed the demonstration. Deng was blamed for the disorder and stripped of all official positions, although he retained his party membership.

The Post-Mao Era

Mao's death in September 1976 removed a towering figure from Chinese politics and set off a scramble for succession. Former Minister of Public Security Hua Guofeng was quickly confirmed as Party Chairman and Premier. A month after Mao's death, Hua, backed by the PLA, arrested Jiang Qing and other members of the "Gang of Four." After extensive deliberations, the Chinese Communist Party leadership reinstated Deng Xiaoping to all of his previous posts at the 11th Party Congress in August 1977. Deng then led the effort to place government control in the hands of veteran party officials opposed to the radical excesses of the previous two decades.

The new, pragmatic leadership emphasized economic development and renounced mass political movements. At the pivotal December 1978 Third Plenum (of the 11th Party Congress Central Committee), the leadership adopted economic reform policies aimed at expanding rural income and incentives, encouraging experiments in enterprise autonomy, reducing central planning, and attracting foreign direct investment into China. The plenum also decided to accelerate the pace of legal reform, culminating in the passage of several new legal codes by the National People's Congress in June 1979.

After 1979, the Chinese leadership moved toward more pragmatic positions in almost all fields. The party encouraged artists, writers, and journalists to adopt more critical approaches, although open attacks on party authority were not permitted. In late 1980, Mao's Cultural Revolution was officially proclaimed a catastrophe. Hua Guofeng, a protege of Mao, was replaced as premier in 1980 by reformist Sichuan party chief Zhao Ziyang and as party General Secretary in 1981 by the even more reformist Communist Youth League chairman Hu Yaobang.

Reform policies brought great improvements in the standard of living, especially for urban workers and for farmers who took advantage of opportunities to diversify crops and establish village industries. Controls on literature and the arts were relaxed, and Chinese intellectuals established extensive links with scholars in other countries.

At the same time, however, political dissent as well as social problems such as inflation, urban migration, and prostitution emerged. Although students and intellectuals urged greater reforms, some party elders increasingly questioned the pace and the ultimate goals of the reform program. In December 1986, student demonstrators, taking advantage of the loosening political atmosphere, staged protests against the slow pace of reform, confirming party elders' fear that the current reform program was leading to social instability. Hu Yaobang, a protege of Deng and a leading advocate of reform, was blamed for the protests and forced to resign as CCP General Secretary in January 1987. Premier Zhao Ziyang was made General Secretary and Li Peng, former Vice Premier and Minister of Electric Power and Water Conservancy, was made Premier.

1989 Student Movement and Tiananmen Square

After Zhao became the party General Secretary, the economic and political reforms he had championed, especially far-reaching political reforms enacted at the 13th Party Congress in the fall of 1987 and subsequent price reforms, came under increasing attack. His proposal in May 1988 to accelerate price reform led to widespread popular complaints about rampant inflation and gave opponents of rapid reform the opening to call for greater centralization of economic controls and stricter prohibitions against Western influence. This precipitated a political debate, which grew more heated through the winter of 1988-89.

The death of Hu Yaobang on April 15, 1989, coupled with growing economic hardship caused by high inflation, provided the backdrop for a large-scale protest movement by students, intellectuals, and other parts of a disaffected urban population. University students and other citizens camped out in Beijing's Tiananmen Square to mourn Hu's death and to protest against those who would slow reform. Their protests, which grew despite government efforts to contain them, called for an end to official corruption, a greater degree of democracy, and for defense of freedoms guaranteed by the Chinese constitution. Protests also spread to many other cities, including Shanghai, Chengdu, and Guangzhou.

Martial law was declared on May 20, 1989. Late on June 3 and early on the morning of June 4, military units were brought into Beijing. They used armed force to clear demonstrators from the streets. There are no official estimates of deaths in Beijing, but most observers believe that casualties numbered in the hundreds.

After June 4, while foreign governments expressed horror at the brutal suppression of the demonstrators, the central government eliminated remaining sources of organized opposition, detained large numbers of protesters, and required political reeducation not only for students but also for large numbers of party cadre and government officials. Zhao was purged at the fourth plenum of the 13th Central Committee in June and replaced as Party General Secretary by Jiang Zemin. Deng's power was curtailed as more orthodox party leaders, led by Chen Yun, became the dominant group in the leadership.

Following this resurgence of conservatives in the aftermath of June 4, economic reform slowed until given new impetus by Deng Xiaoping's return to political dominance two years later, including a dramatic visit to southern China in early 1992. Deng's renewed push for a market-oriented economy received official sanction at the 14th Party Congress later in the year as a number of younger, reform-minded leaders began their rise to top positions. Hu Jintao was elevated to the Politburo Standing Committee at the Congress. Deng and his supporters argued that managing the economy in a way that increased living standards should be China's primary policy objective,

even if "capitalist" measures were adopted. Subsequent to the visit, the Communist Party Politburo publicly issued an endorsement of Deng's policies of economic openness. Though continuing to espouse political reform, China has consistently placed overwhelming priority on the opening of its economy.

Post Deng Leadership

Deng's health deteriorated in the years prior to his death in 1997. During that time, Party General Secretary and P.R.C. President Jiang Zemin and other members of his generation gradually assumed control of the day-to-day functions of government. This "third generation" leadership governed collectively with Jiang at the center.

In the fall of 1987, Jiang was re-elected Party General Secretary at the 15th Party Congress, and in March 1998 he was re-elected President during the 9th National People's Congress. Premier Li Peng was constitutionally required to step down from that post. He was elected to the chairmanship of the National People's Congress. The reform-minded pragmatist Zhu Rongji was selected to replace Li as Premier.

In November 2002, the 16th Communist Party Congress elected Hu Jintao, who in 1992 had been informally designated by Deng Xiaoping as the leading figure in the fourth generation leaders, the new General Secretary. A new Politburo and Politburo Standing Committee was also elected in November.

In March 2003, General Secretary Hu Jintao was elected President at the 10th National People's Congress. Jiang Zemin retained the chairmanship of the Central Military Commission. At the Fourth Party Plenum in September 2004, Jiang Zemin retired from the Central Military Commission, passing the Chairmanship and control of the People's Liberation Army to President Hu Jintao.

China is firmly committed to economic reform and opening to the outside world. The Chinese leadership has identified reform of state industries, the establishment of a social safety net, reduction of the income gap, protection of the environment, and development of clean energy as government priorities. Government strategies for achieving these goals include large-scale privatization of unprofitable state-owned enterprises, development of a pension system for workers, establishment of an effective and affordable health care system, building environmental requirements into cadre promotion criteria, and increasing rural incomes to allow for a greater role for domestic demand in driving economic growth. The leadership has also downsized the government bureaucracy.

The Chinese Communist Party's 17th Party Congress, held in October 2007, saw the elevation of key "fifth generation" leaders to the Politburo and Standing Committee, including Xi Jinping, Li Keqiang, Li Yuanchao, and Wang Yang. At the National People's Congress plenary held in March 2008, Xi was elected Vice President of the government, and Li Keqiang was elected Vice Premier.

GOVERNMENT

Chinese Communist Party

The 73.1 million member CCP, authoritarian in structure and ideology, continues to dominate government. Nevertheless, China's population, geographical vastness, and social diversity frustrate attempts to rule by fiat from Beijing. Central leaders must increasingly build consensus for new policies among party members, local and regional leaders, influential non-party members, and the population at large.

In periods of greater openness, the influence of people and organizations outside the formal party structure has tended to increase, particularly in the economic realm. This phenomenon is most

apparent today in the rapidly developing coastal region. Nevertheless, in all important government, economic, and cultural institutions in China, party committees work to see that party and state policy guidance is followed and that non-party members do not create autonomous organizations that could challenge party rule. Party control is tightest in government offices and in urban economic, industrial, and cultural settings; it is considerably looser in the rural areas, where the majority of the people live.

Theoretically, the party's highest body is the Party Congress, which traditionally meets at least once every 5 years. The 17th Party Congress took place in fall 2007. The primary organs of power in the Communist Party include:

- The Politburo Standing Committee, which currently consists of nine members;
- The Politburo, consisting of 25 full members, including the members of the Politburo Standing Committee;
- The Secretariat, the principal administrative mechanism of the CCP, headed by Politburo Standing Committee member and executive secretary Xi Jinping;
- The Central Military Commission;
- The Discipline Inspection Commission, which is charged with rooting out corruption and malfeasance among party cadres.

State Structure

The Chinese Government has always been subordinate to the Chinese Communist Party (CCP); its role is to implement party policies. The primary organs of state power are the National People's Congress (NPC), the President (the head of state), and the State Council. Members of the State Council include Premier Wen Jiabao (the head of government), a variable number of vice premiers (now four), five state councilors (protocol equivalents of vice premiers but with narrower portfolios), and 25 ministers, the central bank governor, and the auditor-general.

Under the Chinese constitution, the NPC is the highest organ of state power in China. It meets annually for about two weeks to review and approve major new policy directions, laws, the budget, and major personnel changes. These initiatives are presented to the NPC for consideration by the State Council after previous endorsement by the Communist Party's Central Committee. Although the NPC generally approves State Council policy and personnel recommendations, various NPC committees hold active debate in closed sessions, and changes may be made to accommodate alternate views.

When the NPC is not in session, its permanent organ, the Standing Committee, exercises state power.

Principal Government and Party Officials

President--Hu Jintao

Vice President--Xi Jinping

Premier, State Council--Wen Jiabao

State Councilors--Liu Yandong, Liang Guanglie, Ma Kai, Meng Jianzhu, Dai Bingguo

Secretary General--Ma Kai

NPC Chair--Wu Bangguo

Vice Premiers--Li Keqiang, Hui Liangyu, Zhang Dejiang, Wang Qishan

Politburo Standing Committee--Hu Jintao (General Secretary), Wu Bangguo, Wen Jiabao, Jia

Qinglin, Li Changchun, Xi Jinping, Li Keqiang, He Guoqiang, Zhou Yongkang

Other Politburo Members--Bo Xilai, Guo Boxiong, Hui Liangyu, Li Yuanchao, Liu Qi, Liu Yandong,

Liu Yunshan, Wang Gang, Wang Lequan, Wang Qishan, Wang Zhaoguo, Xu Caihou, Yu

Zhengsheng, Zhang Dejiang, Zhang Gaoli, Wang Yang

Chairman, Central Military Commission--Hu Jintao

Foreign Minister--Yang Jiechi

Going Global at WPI Handbook
9/9/2010

Use and adaptation welcome, but please acknowledge WPI and
Natalie Mello and tell us of your use (nmello@wpi.edu)

Minister of Commerce--Chen Deming
Minister of Finance--Xie Xuren
Minister of Agriculture--Sun Zhengcai
Minister of Information Industry--Li Yizhong
Minister of Public Security--Meng Jianzhu
Minister of State Security--Geng Huichang
Governor, People's Bank of China--Zhou Xiaochuan
Minister, State Development and Reform Commission--Zhang Ping
Ambassador to the United States--Zhou Wenzhong
Ambassador to the United Nations--Wang Guangya

POLITICAL CONDITIONS

Legal System

The government's efforts to promote rule of law are significant and ongoing. After the Cultural Revolution, China's leaders aimed to develop a legal system to restrain abuses of official authority and revolutionary excesses. In 1982, the National People's Congress adopted a new state constitution that emphasized the rule of law under which even party leaders are theoretically held accountable.

Since 1979, when the drive to establish a functioning legal system began, more than 300 laws and regulations, most of them in the economic area, have been promulgated. The use of mediation committees--informed groups of citizens who resolve about 90% of China's civil disputes and some minor criminal cases at no cost to the parties--is one innovative device. There are more than 800,000 such committees in both rural and urban areas.

Legal reform became a government priority in the 1990s. Legislation designed to modernize and professionalize the nation's lawyers, judges, and prisons was enacted. The 1994 Administrative Procedure Law allows citizens to sue officials for abuse of authority or malfeasance. In addition, the criminal law and the criminal procedures laws were amended to introduce significant reforms. The criminal law amendments abolished the crime of "counter-revolutionary" activity, although many persons are still incarcerated for that crime. Criminal procedures reforms also encouraged establishment of a more transparent, adversarial trial process. The Chinese constitution and laws provide for fundamental human rights, including due process, but these are often ignored in practice. In addition to other judicial reforms, the Constitution was amended in 2004 to include the protection of individual human rights and legally-obtained private property, but it is unclear how those provisions will be implemented. Although new criminal and civil laws have provided additional safeguards to citizens, previously debated political reforms, including expanding elections to the township level, and other legal reforms, including the reform of the reeducation through labor system, have been put on hold.

Human Rights

The China country reports in the State Department's 2008 Human Rights Practices and International Religious Freedom Reports noted China's well-documented and continuing abuses of human rights in violation of internationally recognized norms, stemming both from the authorities' intolerance of dissent and the inadequacy of legal safeguards for basic freedoms. Reported abuses have included arbitrary and lengthy incommunicado detention, forced confessions, torture, and mistreatment of prisoners as well as severe restrictions on freedom of speech, the press, assembly, association, religion, privacy, worker rights, and coercive birth limitation. China continues the monitoring, harassment, intimidation, and arrest of journalists, Internet writers, defense lawyers, religious activists, and political dissidents. The activities of non-governmental organizations (NGOs), especially those relating to the rule of law and expansion of judicial review, continue to be restricted. The Chinese Government recognizes five official religions--Buddhism, Islam, Taoism, Catholicism, and Protestantism--and seeks to regulate

religious groups and worship. Religious believers who seek to practice their faith outside of state-controlled religious venues and unregistered religious groups and spiritual movements are subject to intimidation, harassment, and detention. In 2009, the Secretary of State again designated China as a "Country of Particular Concern" under the International Religious Freedom Act for particularly severe violations of religious freedom.

At the same time, China's economic growth and reform since 1978 has dramatically improved the lives of hundreds of millions of Chinese, increased social mobility, and expanded the scope of personal freedom. This has meant substantially greater freedom of travel, employment opportunity, educational and cultural pursuits, job and housing choices, and access to information. In recent years, China has also passed new criminal and civil laws that provide additional safeguards to citizens. Village elections, though often procedurally flawed, have been carried out in over 90% of China's approximately one million villages.

We have conducted 12 rounds of human rights dialogue with China since Tiananmen. During 2003 and 2004, no progress was made on the commitments China made at the 2002 dialogue, and we declined to schedule another round at that time. In July 2009, the United States and China affirmed our commitment to cooperate and enhance human rights issues through our human rights dialogue and other initiatives on the basis of equality and mutual respect. Both sides agreed to hold the next human rights dialogue before the year ends.

Two significant and sensitive anniversaries were commemorated in 2009: March 10 marked the 50th anniversary of the 1959 Tibetan uprising, and June 4 marked the 20th anniversary of the crackdown on pro-democracy protests at Tiananmen Square in Beijing. On March 10, 2008, protests in Lhasa marking the 49th anniversary turned violent, and led to protests and unrest throughout Tibet and the majority-Tibetan areas in surrounding provinces. Several people have been tried and executed for their involvement in the riots, in which 19 people died, according to official news sources. Various other groups claim a much higher death toll.

On July 5, 2009, ethnic violence erupted in Urumqi in Xinjiang Uighur Autonomous Region. The unrest continued in the following days, with Chinese state media reporting over 150 deaths and more than 1,000 injured. There was a significantly increased security presence in Urumqi and its surrounding areas and subsequently some mosques in Xinjiang were closed.

ECONOMY

Economic Reforms

Since 1979, China has reformed and opened its economy. The Chinese leadership has adopted a more pragmatic perspective on many political and socioeconomic problems, and has reduced the role of ideology in economic policy. China's ongoing economic transformation has had a profound impact not only on China but on the world. The market-oriented reforms China has implemented over the past two decades have unleashed individual initiative and entrepreneurship. The result has been the largest reduction of poverty and one of the fastest increases in income levels ever seen. China today is the fourth-largest economy in the world. It has sustained average economic growth of over 9.5% for the past 26 years. In 2006 its \$2.68 trillion economy was about one-fifth the size of the U.S. economy.

In the 1980s, China tried to combine central planning with market-oriented reforms to increase productivity, living standards, and technological quality without exacerbating inflation, unemployment, and budget deficits. China pursued agricultural reforms, dismantling the commune system and introducing a household-based system that provided peasants greater decision-making in agricultural activities. The government also encouraged nonagricultural activities such as village enterprises in rural areas, and promoted more self-management for state-owned enterprises, increased competition in the marketplace, and facilitated direct contact between

Chinese and foreign trading enterprises. China also relied more upon foreign financing and imports.

During the 1980s, these reforms led to average annual rates of growth of 10% in agricultural and industrial output. Rural per capita real income doubled. China became self-sufficient in grain production; rural industries accounted for 23% of agricultural output, helping absorb surplus labor in the countryside. The variety of light industrial and consumer goods increased. Reforms began in the fiscal, financial, banking, price-setting, and labor systems.

By the late 1980s, however, the economy had become overheated with increasing rates of inflation. At the end of 1988, in reaction to a surge of inflation caused by accelerated price reforms, the leadership introduced an austerity program.

China's economy regained momentum in the early 1990s. During a visit to southern China in early 1992, China's paramount leader at the time, Deng Xiaoping, made a series of political pronouncements designed to reinvigorate the process of economic reform. The 14th Party Congress later in the year backed Deng's renewed push for market reforms, stating that China's key task in the 1990s was to create a "socialist market economy." The 10-year development plan for the 1990s stressed continuity in the political system with bolder reform of the economic system.

Following the Chinese Communist Party's Third Plenum, held in October 2003, Chinese legislators unveiled several proposed amendments to the state constitution. One of the most significant was a proposal to provide protection for private property rights. Legislators also indicated there would be a new emphasis on certain aspects of overall government economic policy, including efforts to reduce unemployment (now in the 8-10% range in urban areas), to rebalance income distribution between urban and rural regions, and to maintain economic growth while protecting the environment and improving social equity. The National People's Congress approved the amendments when it met in March 2004. The Fifth Plenum in October 2005 approved the 11th Five-Year Economic Program aimed at building a "harmonious society" through more balanced wealth distribution and improved education, medical care, and social security.

Agriculture

China is the world's most populous country and one of the largest producers and consumers of agricultural products. Over 40% of China's labor force is engaged in agriculture, even though only 10% of the land is suitable for cultivation and agriculture contributes only 13% of China's GDP. China's cropland area is only 75% of the U.S. total, but China still produces about 30% more crops and livestock than the United States because of intensive cultivation, China is among the world's largest producers of rice, corn, wheat, soybeans, vegetables, tea, and pork. Major non-food crops include cotton, other fibers, and oilseeds. China hopes to further increase agricultural production through improved plant stocks, fertilizers, and technology. Incomes for Chinese farmers are stagnating, leading to an increasing wealth gap between the cities and countryside. Government policies that continue to emphasize grain self-sufficiency and the fact that farmers do not own--and cannot buy or sell--the land they work have contributed to this situation. In addition, inadequate port facilities and lack of warehousing and cold storage facilities impede both domestic and international agricultural trade.

Industry

Industry and construction account for about 46% of China's GDP. Major industries are mining and ore processing; iron; steel; aluminum; coal, machinery; textiles and apparel; armaments; petroleum; cement; chemicals; fertilizers; consumer products including footwear, toys, and electronics; automobiles and other transportation equipment including rail cars and locomotives, ships, and aircraft; and telecommunications.

China has become a preferred destination for the relocation of global manufacturing facilities. Its strength as an export platform has contributed to incomes and employment in China. The state-owned sector still accounts for about 40% of GDP. In recent years, authorities have been giving greater attention to the management of state assets--both in the financial market as well as among state-owned-enterprises--and progress has been noteworthy.

Regulatory Environment

Though China's economy has expanded rapidly, its regulatory environment has not kept pace. Since Deng Xiaoping's open market reforms, the growth of new businesses has outpaced the government's ability to regulate them. This has created a situation where businesses, faced with mounting competition and poor oversight, will be willing to take drastic measures to increase profit margins, often at the expense of consumer safety. This issue acquired more prominence in 2007, with the United States placing a number of restrictions on problematic Chinese exports. The Chinese Government recognizes the severity of the problem, recently concluding that up to 20% of the country's products are substandard or tainted, and undertaking efforts in coordination with the United States and others to better regulate the problem.

Energy

Together with strong economic growth, China's demand for energy is surging rapidly. In 2003, China surpassed Japan to become the second-largest consumer of primary energy, after the United States. China is the world's second-largest consumer of oil, after the United States, and for 2006, China's increase in oil demand represented 38% of the world total increase in oil demand. China is also the third-largest energy producer in the world, after the United States and Russia. China's electricity consumption is expected to grow by over 4% a year through 2030, which will require more than \$2 trillion in electricity infrastructure investment to meet the demand. China expects to add approximately 15,000 megawatts of generating capacity a year, with 20% of that coming from foreign suppliers.

Coal makes up the bulk of China's energy consumption (70% in 2005), and China is the largest producer and consumer of coal in the world. As China's economy continues to grow, China's coal demand is projected to rise significantly. Although coal's share of China's overall energy consumption will decrease, coal consumption will continue to rise in absolute terms. China's continued and increasing reliance on coal as a power source has contributed significantly to putting China on the path to becoming the world's largest emitter of acid rain-causing sulfur dioxide and green house gases, including carbon dioxide.

The 11th Five-Year Program, announced in 2005, calls for greater energy conservation measures, including development of renewable energy sources and increased attention to environmental protection. Moving away from coal towards cleaner energy sources including oil, natural gas, renewable energy, and nuclear power is an important component of China's development program. China has abundant hydroelectric resources; the Three Gorges Dam, for example, will have a total capacity of 18 gigawatts when fully on-line (projected for 2009). In addition, the share of electricity generated by nuclear power is projected to grow from 1% in 2000 to 5% in 2030. China's renewable energy law, which went into effect in 2006, calls for 10% of its energy to come from renewable energy sources by 2020.

Since 1993, China has been a net importer of oil, a large portion of which comes from the Middle East. Net imports are expected to rise to 3.5 million barrels per day by 2010. China is interested in diversifying the sources of its oil imports and has invested in oil fields around the world. Beijing also plans to increase China's natural gas production, which currently accounts for only 3% of China's total energy consumption. Analysts expect China's consumption of natural gas to more than double by 2010.

In May 2004, then-Secretary of Energy Spencer Abraham signed a Memorandum of Understanding (MOU) with China's National Development and Reform Commission (NDRC) that launched the U.S.-China Energy Policy Dialogue. The dialogue has strengthened energy-related interactions between China and the United States, the world's two largest energy consumers. The U.S.-China Energy Policy Dialogue builds upon the two countries' existing cooperative ventures in high energy nuclear physics, fossil energy, energy efficiency and renewable energy and energy information exchanges. The NDRC and the Department of Energy also exchange views and expertise on Peaceful Uses of Nuclear Technologies, and we convene an annual Oil and Gas Industry Forum with China.

In July 2009, during the U.S.-China Strategic and Economic Dialogue, the two countries negotiated a Memorandum of Understanding (MOU) to Enhance Cooperation on Climate Change, Energy, and the Environment in order to expand and enhance cooperation between the two sides on clean and efficient energy, to protect the environment, and to ensure energy security.

Environment

One of the serious negative consequences of China's rapid industrial development has been increased pollution and degradation of natural resources. Many analysts estimate that China will surpass the United States as the world's largest emitter of carbon dioxide and other greenhouse gases in 2009. A World Health Organization report on air quality in 272 cities worldwide concluded that seven of the world's 10 most polluted cities were in China. According to China's own evaluation, two-thirds of the 338 cities for which air-quality data are available are considered polluted--two-thirds of them moderately or severely so. Respiratory and heart diseases related to air pollution are the leading cause of death in China. Almost all of the nation's rivers are considered polluted to some degree, and half of the population lacks access to clean water. By some estimates, every day approximately 300 million residents drink contaminated water. Ninety percent of urban water bodies are severely polluted. Water scarcity also is an issue; for example, severe water scarcity in Northern China is a serious threat to sustained economic growth and the government has begun working on a project for a large-scale diversion of water from the Yangtze River to northern cities, including Beijing and Tianjin. Acid rain falls on 30% of the country. Various studies estimate pollution costs the Chinese economy 7%-10% of GDP each year.

China's leaders are increasingly paying attention to the country's severe environmental problems. In 1998, the State Environmental Protection Administration (SEPA) was officially upgraded to a ministry-level agency, reflecting the growing importance the Chinese Government places on environmental protection. In recent years, China has strengthened its environmental legislation and made some progress in stemming environmental deterioration. In 2005, China joined the Asia Pacific Partnership on Clean Development, which brings industries and governments together to implement strategies that reduce pollution and address climate change. During the 10th Five-Year Plan, China plans to reduce total emissions by 10%. Beijing in particular invested heavily in pollution control as part of its campaign to host a successful Olympiad in 2008. Some cities have seen improvement in air quality in recent years.

China is an active participant in climate change talks and other multilateral environmental negotiations, taking environmental challenges seriously but pushing for the developed world to help developing countries to a greater extent. It is a signatory to the Basel Convention governing the transport and disposal of hazardous waste and the Montreal Protocol for the Protection of the Ozone Layer, as well as the Convention on International Trade in Endangered Species and other major environmental agreements.

The question of environmental impacts associated with the Three Gorges Dam project has generated controversy among environmentalists inside and outside China. Critics claim that erosion and silting of the Yangtze River threaten several endangered species, while Chinese officials say the dam will help prevent devastating floods and generate clean hydroelectric power

that will enable the region to lower its dependence on coal, thus lessening air pollution.

The United States and China are members of the Asia Pacific Partnership on Clean Development and Climate (APP). The APP is a public-private partnership of six nations--Australia, China, India, Japan, the Republic of Korea, and the United States--committed to explore new mechanisms to meet national pollution reduction, energy security and climate change goals in ways that reduce poverty and promote economic development. APP members have undertaken cooperative activities involving deployment of clean technology in partner countries in eight areas: cleaner fossil energy, renewable energy and distributed generation, power generation and transmission, steel, aluminum, cement, coal mining, and buildings and appliances.

The United States and China have been engaged in an active program of bilateral environmental cooperation since the mid-1990s, with an emphasis on clean energy technology and the design of effective environmental policy. While both governments view this cooperation positively, China has often compared the U.S. program, which lacks a foreign assistance component, with those of Japan and several European Union (EU) countries that include generous levels of aid.

Science and Technology

Science and technology have always preoccupied China's leaders; indeed, China's political leadership comes almost exclusively from technical backgrounds and has a high regard for science. Deng called it "the first productive force." Distortions in the economy and society created by party rule have severely hurt Chinese science, according to some Chinese science policy experts. The Chinese Academy of Sciences, modeled on the Soviet system, puts much of China's greatest scientific talent in a large, under-funded apparatus that remains largely isolated from industry, although the reforms of the past decade have begun to address this problem.

Chinese science strategists see China's greatest opportunities in newly emerging fields such as biotechnology and computers, where there is still a chance for China to become a significant player. Most Chinese students who went abroad have not returned, but they have built a dense network of trans-Pacific contacts that will greatly facilitate U.S.-China scientific cooperation in coming years. The U.S. space program is often held up as the standard of scientific modernity in China. China's small but growing space program, which successfully completed their second manned orbit in October 2005, is a focus of national pride.

The U.S.-China Science and Technology Agreement remains the framework for bilateral cooperation in this field. A 5-year agreement to extend the Science and Technology Agreement was signed in April 2006. The agreement is among the longest-standing U.S.-China accords, and includes over 11 U.S. Federal agencies and numerous branches that participate in cooperative exchanges under the Science and Technology Agreement and its nearly 60 protocols, memoranda of understanding, agreements, and annexes. The agreement covers cooperation in areas such as marine conservation, renewable energy, and health. Biennial Joint Commission Meetings on Science and Technology bring together policymakers from both sides to coordinate joint science and technology cooperation. Executive Secretaries meetings are held biennially to implement specific cooperation programs. Japan and the European Union also have high profile science and technology cooperative relationships with China.

Trade

The U.S. trade deficit with China reached \$268 billion in 2008. U.S. imports from China accounted for 16.1% of overall U.S. imports in 2008. At the same time, the share of many other Asian countries' imports to the United States and the U.S. trade deficit with the Asia-Pacific region as a whole have fallen. U.S. goods exports to China, which accounted for 5.5% of total U.S. exports in 2008, totaled \$71.5 billion, a 9.5% increase of \$16.2 billion from 2007 (\$55.3 billion). The top three U.S. exports to China in 2008 were electrical machinery (\$11.4 billion), machinery (\$9.7 billion), and aircraft (\$5.1 billion). In July 2009, Treasury Secretary Timothy Geithner met with

P.R.C. Vice Premier Wang Qishang in Beijing for the inaugural round of the Strategic and Economic Dialogue (for further details, please refer to the S&ED section below). In November 1991, China joined the Asia-Pacific Economic Cooperation (APEC) group, which promotes free trade and cooperation in the economic, trade, investment, and technology spheres. China served as APEC chair in 2001, and Shanghai hosted the annual APEC leaders meeting in October of that year.

China formally joined the WTO in December 2001. As part of this far-reaching trade liberalization agreement, China agreed to lower tariffs and abolish market impediments. Chinese and foreign businessmen, for example, gained the right to import and export on their own, and to sell their products without going through a government middleman. By 2005, average tariff rates on key U.S. agricultural exports dropped from 31% to 14% and on industrial products from 25% to 9%. The agreement also opens up new opportunities for U.S. providers of services like banking, insurance, and telecommunications. China has made significant progress implementing its WTO commitments, but serious concerns remain, particularly in the realm of intellectual property rights protection.

China is now one of the most important markets for U.S. exports: in 2008, U.S. exports to China totaled \$71.5 billion, a 9.5% increase of \$16.2 billion from 2007. U.S. agricultural exports have increased dramatically, totaling \$12.2 billion in 2009 and thus making China our fourth-largest agricultural export market. Leading categories include: soybeans (\$7.3 billion), cotton (\$1.6 billion), and hides and skins (\$859 million).

Export growth continues to be a major driver of China's rapid economic growth. To increase exports, China has pursued policies such as fostering the rapid development of foreign-invested factories, which assemble imported components into consumer goods for export, and liberalizing trading rights. In its eleventh Five-Year Program, adopted in 2005, China placed greater emphasis on developing a consumer demand-driven economy to sustain economic growth and address global imbalances.

The United States is one of China's primary suppliers of power generating equipment, aircraft and parts, computers and industrial machinery, raw materials, and chemical and agricultural products. However, U.S. exporters continue to have concerns about fair market access due to strict testing and standards requirements for some imported products. In addition, a lack of transparency in the regulatory process makes it difficult for businesses to plan for changes in the domestic market structure.

In April 2009, the United States and China announced that the Joint Commission on Commerce and Trade (JCCT) will continue to serve as the primary venue for the two countries to discuss trade issues. Under the Obama administration, the JCCT, which will be led by Commerce Secretary Gary Locke and U.S. Trade Representative Ron Kirk on the U.S. side and Vice Premier Wang Qishan on the Chinese side, will not only focus on discussing trade issues, but will also include broader issues such as healthcare and innovation and industrial policies.

Foreign Investment

China's investment climate has changed dramatically in a quarter-century of reform. In the early 1980s, China restricted foreign investments to export-oriented operations and required foreign investors to form joint-venture partnerships with Chinese firms. Foreign direct investment (FDI) grew quickly during the 1980s, but slowed in late 1989 in the aftermath of Tiananmen. In response, the government introduced legislation and regulations designed to encourage foreigners to invest in high-priority sectors and regions. Since the early 1990s, China has allowed foreign investors to manufacture and sell a wide range of goods on the domestic market, and authorized the establishment of wholly foreign-owned enterprises, now the preferred form of FDI. However, the Chinese Government's emphasis on guiding FDI into manufacturing has led to

market saturation in some industries, while leaving China's services sectors underdeveloped. China is now one of the leading FDI recipients in the world, receiving over \$80 billion in 2007 according to the Chinese Ministry of Commerce.

As part of its WTO accession, China undertook to eliminate certain trade-related investment measures and to open up specified sectors that had previously been closed to foreign investment. New laws, regulations, and administrative measures to implement these commitments are being issued. Major remaining barriers to foreign investment include opaque and inconsistently enforced laws and regulations and the lack of a rules-based legal infrastructure.

Opening to the outside remains central to China's development. Foreign-invested enterprises produce about half of China's exports, and China continues to attract large investment inflows. Foreign exchange and gold reserves were \$2.033 trillion at the end of 2008, and have now surpassed those of Japan, making China's foreign exchange reserves the largest in the world.

FOREIGN RELATIONS

Since its establishment, the People's Republic has worked vigorously to win international support for its position that it is the sole legitimate government of all China, including Hong Kong, Macau, and Taiwan. In the early 1970s, Beijing was recognized diplomatically by most world powers. Beijing assumed the China seat in the United Nations in 1971 and has since become increasingly active in multilateral organizations. Japan established diplomatic relations with China in 1972, and the United States did so in 1979. As of March 2008, the number of countries that had diplomatic relations with Beijing had risen to 171, while 23 maintained diplomatic relations with Taiwan.

After the founding of the P.R.C., China's foreign policy initially focused on solidarity with the Soviet Union and other communist countries. In 1950, China sent the People's Liberation Army into North Korea to help North Korea halt the UN offensive that was approaching the Yalu River. After the conclusion of the Korean conflict, China sought to balance its identification as a member of the Soviet bloc by establishing friendly relations with Pakistan and other Third World countries, particularly in Southeast Asia.

In the 1960s, Beijing competed with Moscow for political influence among communist parties and in the developing world generally. Following the 1968 Soviet invasion of Czechoslovakia and clashes in 1969 on the Sino-Soviet border, Chinese competition with the Soviet Union increasingly reflected concern over China's own strategic position.

In late 1978, the Chinese also became concerned over Vietnam's efforts to establish open control over Laos and Cambodia. In response to the Vietnamese invasion of Cambodia, China fought a brief border war with Vietnam (February-March 1979) with the stated purpose of "teaching Vietnam a lesson."

Chinese anxiety about Soviet strategic advances was heightened following the Soviet Union's December 1979 invasion of Afghanistan. Sharp differences between China and the Soviet Union persisted over Soviet support for Vietnam's continued occupation of Cambodia, the Soviet invasion of Afghanistan, and Soviet troops along the Sino-Soviet border and in Mongolia--the so-called "three obstacles" to improved Sino-Soviet relations.

In the 1970s and 1980s China sought to create a secure regional and global environment for itself and to foster good relations with countries that could aid its economic development. To this end, China looked to the West for assistance with its modernization drive and for help in countering Soviet expansionism, which it characterized as the greatest threat to its national security and to world peace.

China maintained its consistent opposition to "superpower hegemony," focusing almost

exclusively on the expansionist actions of the Soviet Union and Soviet proxies such as Vietnam and Cuba, but it also placed growing emphasis on a foreign policy independent of both the United States and the Soviet Union. While improving ties with the West, China continued to follow closely economic and other positions of the Third World nonaligned movement, although China was not a formal member.

In the immediate aftermath of Tiananmen crackdown in June 1989, many countries reduced their diplomatic contacts with China as well as their economic assistance programs. In response, China worked vigorously to expand its relations with foreign countries, and by late 1990, had reestablished normal relations with almost all nations. Following the collapse of the Soviet Union in late 1991, China also opened diplomatic relations with the republics of the former Soviet Union.

In recent years, Chinese leaders have been regular travelers to all parts of the globe, and China has sought a higher profile in the UN through its permanent seat on the United Nations Security Council and other multilateral organizations. Closer to home, China has made efforts to reduce tensions in Asia, hosting the Six-Party Talks on North Korea's nuclear weapons program, cultivating a more cooperative relationship with members of the Association of Southeast Asian Nations (ASEAN), and participating in the ASEAN Regional Forum. China has also taken steps to improve relations with countries in South Asia, including India. Following Premier Wen's 2005 visit to India, the two sides moved to increase commercial and cultural ties, as well as to resolve longstanding border disputes. The November 2006 visit of President Hu was the first state visit by a Chinese head of state to India in 10 years.

China has likewise improved ties with Russia, with Presidents Putin and Hu exchanging visits to Beijing and Moscow in April 2006 and March 2007. A second round of Russia-China joint military exercises was scheduled for fall 2007. China has played a prominent role in the Shanghai Cooperation Organization (SCO), a regional grouping that includes Russia and the Central Asian nations of Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan. Beijing has resolved many of its border and maritime disputes, notably including a November 1997 agreement with Russia that resolved almost all outstanding border issues and a 2000 agreement with Vietnam to resolve differences over their maritime border, though disagreements remain over islands in the South China Sea. Relations with Japan improved following Japanese Prime Minister Shinzo Abe's October 2006 visit to Beijing, and continued to improve under Prime Minister Yasuo Fukuda until his resignation in September 2008. Longstanding and emotionally charged disputes over history and competing claims to portions of the East China Sea remain sources of tension.

While in many ways Sudan's primary diplomatic patron, China has played a constructive role in support of peacekeeping operations in Southern Sudan and pledged 315 engineering troops in support of UN operations in Darfur, all of whom have been deployed. China has stated publicly that it shares the international community's concern over Iran's nuclear program and has voted in support of UN sanctions resolutions on Iran. Set against these positive developments has been an effort on the part of China to maintain close ties to countries such as Iran, Sudan, Zimbabwe, and Venezuela, which are sources of oil and other resources and which welcome China's non-conditional assistance and investment.

DEFENSE

Establishment of a professional military force equipped with modern weapons and doctrine was the last of the "Four Modernizations" announced by Zhou Enlai and supported by Deng Xiaoping. In keeping with Deng's mandate to reform, the People's Liberation Army (PLA), which includes the strategic nuclear forces, army, navy, and air force, has demobilized millions of men and women since 1978 and introduced modern methods in such areas as recruitment and manpower, strategy, and education and training.

Following the June 1989 Tiananmen crackdown, ideological correctness was temporarily revived

as the dominant theme in Chinese military affairs. Reform and modernization appear to have since resumed their position as the PLA's priority objectives, although the armed forces' political loyalty to the CCP remains a leading concern.

The Chinese military is in the process of transforming itself from a land-based power, centered on a vast ground force, to a smaller, mobile, high-tech military eventually capable of mounting limited operations beyond its coastal borders.

China's power-projection capability is limited but has grown over recent years. China has acquired some advanced weapons systems from abroad, including Sovremenny destroyers, SU-27 and SU-30 aircraft, and Kilo-class diesel submarines from Russia, and continued to develop domestic production capabilities, such as for the domestically-developed J-10 fighter aircraft. However, much of its air and naval forces continues to be based on 1960s-era technology. As the Defense Department's Quadrennial Defense Review, released February 2006, noted, the United States shares with other countries a concern about the pace, scope, and direction of China's military modernization. We view military exchanges, visits, and other forms of engagement are useful tools in promoting transparency, provided they have substance and are fully reciprocal. Regularized exchanges and contact also have the significant benefit of building confidence, reducing the possibility of accidents, and providing the lines of communication that are essential in ensuring that episodes such as the April 2001 EP-3 aircraft incident do not escalate into major crises. During their April 2006 meeting, President George W. Bush and President Hu agreed to increase officer exchanges and to begin a strategic nuclear dialogue between STRATCOM and the Chinese military's strategic missile command. U.S. and Chinese militaries are also considering ways in which we might cooperate on disaster assistance relief.

Nuclear Weapons. In 1955, Mao Zedong's Chinese Communist Party decided to proceed with a nuclear weapons program; it was developed with Soviet assistance until 1960. After its first nuclear test in October 1964, Beijing deployed a modest but potent ballistic missile force, including land- and sea-based intermediate-range and intercontinental ballistic missiles.

China became a major international arms exporter during the 1980s. Beijing joined the Middle East arms control talks, which began in July 1991 to establish global guidelines for conventional arms transfers, but announced in September 1992 that it would no longer participate because of the U.S. decision to sell F-16A/B aircraft to Taiwan.

China was the first state to pledge "no first use" of nuclear weapons. It joined the International Atomic Energy Agency (IAEA) in 1984 and pledged to abstain from further atmospheric testing of nuclear weapons in 1986. China acceded to the nuclear Non-Proliferation Treaty (NPT) in 1992 and supported its indefinite and unconditional extension in 1995. In 1996, it signed the Comprehensive Test Ban Treaty (CTBT) and agreed to seek an international ban on the production of fissile nuclear weapons material. To date, China has not ratified the CTBT.

In 1996, China committed not to provide assistance to un-safeguarded nuclear facilities. China became a full member of the NPT Exporters (Zangger) Committee, a group that determines items subject to IAEA inspections if exported by NPT signatories. In September 1997, China issued detailed nuclear export control regulations. China began implementing regulations establishing controls over nuclear-related dual-use items in 1998. China also has committed not to engage in new nuclear cooperation with Iran (even under safeguards), and will complete existing cooperation, which is not of proliferation concern, within a relatively short period. In May 2004, with the support of the United States, China became a member of the Nuclear Suppliers Group.

Based on significant, tangible progress with China on nuclear nonproliferation, President Bill Clinton in 1998 took steps to bring into force the 1985 U.S.-China Agreement on Peaceful Nuclear Cooperation.

Chemical Weapons. China is not a member of the Australia Group, an informal and voluntary arrangement made in 1985 to monitor developments in the proliferation of dual-use chemicals and to coordinate export controls on key dual-use chemicals and equipment with weapons applications. In April 1997, however, China ratified the Chemical Weapons Convention (CWC) and, in September 1997, promulgated a new chemical weapons export control directive. In October 2002, China promulgated updated regulations on dual-use chemical agents, and now controls all the major items on the Australia Group control list.

Missiles. Although it is not a member of the Missile Technology Control Regime (MTCR), the multinational effort to restrict the proliferation of missiles, in March 1992 China undertook to abide by MTCR guidelines and parameters. China reaffirmed this commitment in 1994, and pledged not to transfer MTCR-class ground-to-ground missiles. In November 2000, China committed not to assist in any way the development by other countries of MTCR-class missiles. However, in August 29, 2003, the U.S. Government imposed missile proliferation sanctions lasting two years on the Chinese company China North Industries Corporation (NORINCO) after determining that it was knowingly involved in the transfer of equipment and technology controlled under Category II of the Missile Technology Control Regime (MTCR) Annex that contributed to MTCR-class missiles in a non-MTCR country.

In December 2003, the P.R.C. promulgated comprehensive new export control regulations governing exports of all categories of sensitive technologies.

U.S.-CHINA RELATIONS

From Revolution to the Shanghai Communique

As the PLA armies moved south to complete the communist conquest of China in 1949, the American Embassy followed the Nationalist government headed by Chiang Kai-shek, finally moving to Taipei later that year. U.S. consular officials remained in mainland China. The new P.R.C. Government was hostile to this official American presence, and all U.S. personnel were withdrawn from the mainland in early 1950. Any remaining hope of normalizing relations ended when U.S. and Chinese communist forces fought on opposing sides in the Korean conflict.

Beginning in 1954 and continuing until 1970, the United States and China held 136 meetings at the ambassadorial level, first at Geneva and later at Warsaw. In the late 1960s, U.S. and Chinese political leaders decided that improved bilateral relations were in their common interest. In 1969, the United States initiated measures to relax trade restrictions and other impediments to bilateral contact. On July 15, 1971, President Nixon announced that his Assistant for National Security Affairs, Dr. Henry Kissinger, had made a secret trip to Beijing to initiate direct contact with the Chinese leadership and that he, the President, had been invited to visit China.

In February 1972, President Nixon traveled to Beijing, Hangzhou, and Shanghai. At the conclusion of his trip, the U.S. and Chinese Governments issued the "Shanghai Communique," a statement of their foreign policy views. (For the complete text of the Shanghai Communique, see the Department of State Bulletin, March 20, 1972.)

In the Communique, both nations pledged to work toward the full normalization of diplomatic relations. The United States acknowledged the Chinese position that all Chinese on both sides of the Taiwan Strait maintain that there is only one China and that Taiwan is part of China. The statement enabled the United States and China to temporarily set aside the "crucial question obstructing the normalization of relations"--Taiwan--and to open trade and other contacts.

Liaison Office, 1973-78

In May 1973, in an effort to build toward the establishment of formal diplomatic relations, the

United States and China established the United States Liaison Office (USLO) in Beijing and a counterpart Chinese office in Washington, DC. In the years between 1973 and 1978, such distinguished Americans as David Bruce, George H.W. Bush, Thomas Gates, and Leonard Woodcock served as chiefs of the USLO with the personal rank of Ambassador.

President Ford visited China in 1975 and reaffirmed the U.S. interest in normalizing relations with Beijing. Shortly after taking office in 1977, President Carter again reaffirmed the interest expressed in the Shanghai Communiqué. The United States and China announced on December 15, 1978, that the two governments would establish diplomatic relations on January 1, 1979.

Normalization

In the Joint Communiqué on the Establishment of Diplomatic Relations dated January 1, 1979, the United States transferred diplomatic recognition from Taipei to Beijing. The United States reiterated the Shanghai Communiqué's acknowledgment of the Chinese position that there is only one China and that Taiwan is a part of China; Beijing acknowledged that the American people would continue to carry on commercial, cultural, and other unofficial contacts with the people of Taiwan. The Taiwan Relations Act made the necessary changes in U.S. domestic law to permit such unofficial relations with Taiwan to flourish.

U.S.-China Relations Since Normalization

Vice Premier Deng Xiaoping's January 1979 visit to Washington, DC, initiated a series of important, high-level exchanges, which continued until the spring of 1989. This resulted in many bilateral agreements--especially in the fields of scientific, technological, and cultural interchange and trade relations. Since early 1979, the United States and China have initiated hundreds of joint research projects and cooperative programs under the Agreement on Cooperation in Science and Technology, the largest bilateral program.

On March 1, 1979, the United States and China formally established embassies in Beijing and Washington, DC. During 1979, outstanding private claims were resolved, and a bilateral trade agreement was concluded. Vice President Walter Mondale reciprocated Vice Premier Deng's visit with an August 1979 trip to China. This visit led to agreements in September 1980 on maritime affairs, civil aviation links, and textile matters, as well as a bilateral consular convention.

As a consequence of high-level and working-level contacts initiated in 1980, U.S. dialogue with China broadened to cover a wide range of issues, including global and regional strategic problems, political-military questions, including arms control, UN and other multilateral organization affairs, and international narcotics matters.

The expanding relationship that followed normalization was threatened in 1981 by Chinese objections to the level of U.S. arms sales to Taiwan. Secretary of State Alexander Haig visited China in June 1981 in an effort to resolve Chinese questions about America's unofficial relations with Taiwan. Eight months of negotiations produced the U.S.-China joint communiqué of August 17, 1982. In this third communiqué, the United States stated its intention to reduce gradually the level of arms sales to Taiwan, and the Chinese described as a fundamental policy their effort to strive for a peaceful resolution to the Taiwan question. Meanwhile, Vice President George H.W. Bush visited China in May 1982.

High-level exchanges continued to be a significant means for developing U.S.-China relations in the 1980s. President Reagan and Premier Zhao Ziyang made reciprocal visits in 1984. In July 1985, President Li Xiannian traveled to the United States, the first such visit by a Chinese head of state. Vice President Bush visited China in October 1985 and opened the U.S. Consulate General in Chengdu, the fourth U.S. consular post in China. Further exchanges of cabinet-level officials occurred between 1985-89, capped by President George H.W. Bush's visit to Beijing in February 1989.

In the period before the June 3-4, 1989 crackdown, a large and growing number of cultural exchange activities undertaken at all levels gave the American and Chinese peoples broad exposure to each other's cultural, artistic, and educational achievements. Numerous Chinese professional and official delegations visited the United States each month. Many of these exchanges continued after Tiananmen.

Bilateral Relations After Tiananmen

Following the Chinese authorities' brutal suppression of demonstrators in June 1989, the United States and other governments enacted a number of measures to express their condemnation of China's blatant violation of the basic human rights of its citizens. The United States suspended high-level official exchanges with China and weapons exports from the United States to China. The United States also imposed a number of economic sanctions. In the summer of 1990, at the G-7 Houston summit, Western nations called for renewed political and economic reforms in China, particularly in the field of human rights.

Tiananmen disrupted the U.S.-China trade relationship, and U.S. investors' interest in China dropped dramatically. The U.S. Government also responded to the political repression by suspending certain trade and investment programs on June 5 and 20, 1989. Some sanctions were legislated; others were executive actions. Examples include:

- The U.S. Trade and Development Agency (TDA)--new activities in China were suspended from June 1989 until January 2001, when President Clinton lifted this suspension.

- Overseas Private Insurance Corporation (OPIC)--new activities suspended since June 1989.

- Development Bank Lending/IMF Credits--the United States does not support development bank lending and will not support IMF credits to China except for projects that address basic human needs.

- Munitions List Exports--subject to certain exceptions, no licenses may be issued for the export of any defense article on the U.S. Munitions List. This restriction may be waived upon a presidential national interest determination.

- Arms Imports--import of defense articles from China was banned after the imposition of the ban on arms exports to China. The import ban was subsequently waived by the Administration and re-imposed on May 26, 1994. It covers all items on the Bureau of Alcohol, Tobacco, Firearms, and Explosives' Munitions Import List.

In 1996, the P.R.C. conducted military exercises in waters close to Taiwan in an apparent effort at intimidation, after Taiwan's former President, Lee Teng-huei made a private visit to the United States. The United States dispatched two aircraft carrier battle groups to the region.

Subsequently, tensions in the Taiwan Strait diminished, and relations between the United States and China have improved, with increased high-level exchanges and progress on numerous bilateral issues, including human rights, nonproliferation, and trade. Former Chinese president Jiang Zemin visited the United States in the fall of 1997, the first state visit to the United States by a Chinese president since 1985. In connection with that visit, the two sides reached agreement on implementation of their 1985 agreement on peaceful nuclear cooperation, as well as a number of other issues. President Clinton visited China in June 1998. He traveled extensively in China, and direct interaction with the Chinese people included live speeches, press conference and a radio show, allowing the President to convey first-hand to the Chinese people a sense of American ideals and values.

Relations between the United States and China were severely strained by the tragic accidental bombing of the Chinese Embassy in Belgrade in May 1999. By the end of 1999, relations began to gradually improve. In October 1999, the two sides reached agreement on humanitarian payments for families of those who died and those who were injured as well as payments for damages to respective diplomatic properties in Belgrade and China. Relations further cooled

when, in April 2001, a Chinese F-8 fighter collided with a U.S. EP-3 reconnaissance aircraft flying over international waters south of China. The EP-3 was able to make an emergency landing on China's Hainan Island despite extensive damage; the P.R.C. aircraft crashed with the loss of its pilot. Following extensive negotiations, the crew of the EP-3 was allowed to leave China 11 days later, but the U.S. aircraft was not permitted to depart for another 3 months.

Subsequently, the relationship gradually improved. President George W. Bush visited China in February 2002 and met with President Jiang Zemin in Crawford, Texas in October. President Bush hosted Premier Wen Jiabao in Washington in December 2003. President Bush first met Hu Jintao in his new capacity as P.R.C. President on the margins of the G-8 Summit in Evian in June 2003, and at subsequent international fora, such as the September 2004 APEC meeting in Chile, the July 2005 G-8 summit in Scotland, and the September 2005 UN General Assembly meetings in New York. President Bush traveled to China in November 2005, an official visit that was reciprocated in April 2006 when President Hu met with President Bush in Washington.

U.S. China policy has been consistent. For seven consecutive administrations, Democratic and Republican, U.S. policy has been to encourage China's opening and integration into the global system. As a result, China has moved from being a relatively isolated and poor country to one that is a key participant in international institutions and a major trading nation. The United States encourages China to play an active role as a responsible stakeholder in the international community, working with the United States and other countries to support and strengthen the international system that has enabled China's success. As then-Secretary of State Condoleezza Rice noted, "America has reason to welcome a confident, peaceful, and prosperous China. We want China as a global partner, able and willing to match its growing capabilities to its international responsibilities." Senior State Department officials engage in regular and intensive discussions with their P.R.C. counterparts through the U.S.-China Senior Dialogue. The Senior Dialogue covers the entire range of issues in the bilateral relationship, as well as global issues of shared concern.

China has an important role to play in global, regional, and bilateral counterterrorism efforts, and has supported coalition efforts in Afghanistan and Iraq. Following the September 11, 2001 terrorist attacks (9-11) in New York City and Washington, DC, China offered strong public support against terrorism and has been an important partner in U.S. counterterrorism efforts. Shortly after 9-11, the United States and China also commenced a counterterrorism dialogue. Inspections under the Container Security Initiative (CSI) are now underway at the major ports of Shenzhen, Shanghai, and Hong Kong. China has also agreed to participate in the Department of Energy's Megaports Initiative, a critical part of our efforts to detect the flow of nuclear materials. China voted in favor of UN Security Council Resolution 1373, publicly supported the coalition campaign in Afghanistan, and contributed \$150 million of bilateral assistance to Afghan reconstruction following the defeat of the Taliban. China participated in both the Iraq Neighbors and International Compact with Iraq meetings in 2007 and voiced strong support for the Government of Iraq following the country's December 2005 parliamentary elections. China has pledged \$25 million to Iraqi reconstruction and taken measures to forgive Iraq's sovereign debt to China.

The United States and China have cooperated with growing effectiveness on various aspects of law enforcement, including computer crime, intellectual property rights enforcement, human smuggling, and corruption. The most recent meeting of the U.S.-China Joint Liaison Group on law enforcement cooperation took place in Washington in June 2007.

China and the United States have also been working closely with the international community to address threats to global security, such as those posed by North Korea and Iran's nuclear programs. China has played a constructive role in hosting the Six-Party Talks and in brokering the February 2007 agreement on Initial Actions. The United States looks to Beijing to use its unique influence with Pyongyang to ensure that North Korea implements fully its commitments under the

September 2005 Statement of Principles. China has publicly stated that it does not want Iran to acquire nuclear weapons and has voted in support of sanctions resolutions on Iran at UN Security Council. On these and other important issues, such as the ongoing humanitarian crisis in Darfur, the United States expects China to join with the international community in finding solutions. China's participation is critical to efforts to combat transnational health threats such as avian influenza and HIV/AIDS, and both the United States and China play an important role in new multilateral energy initiatives, such as the Asia-Pacific Partnership.

While the United States looks forward to building a positive, cooperative, and comprehensive relationship with China--a message reiterated by President Barack Obama when he met with President Hu in April 2009 in London--there remain areas of potential disagreement. The United States does not support Taiwan independence and opposes unilateral steps, by either side, to change the status quo. At the same time, the United States has made it clear that cross-Strait differences should be resolved peacefully and in a manner acceptable to people on both sides of the Strait. At various points in the past several years, China has expressed concern about the United States making statements on the political evolution of Hong Kong and has stressed that political stability there is paramount for economic growth. The NPC's passage of an Anti-Secession law in March 2005 was viewed as unhelpful to the cause of promoting cross-Strait and regional stability by the United States and precipitated critical high-level statements by both sides.

U.S.-China Economic Relations

U.S. direct investment in China covers a wide range of manufacturing sectors, several large hotel projects, restaurant chains, and petrochemicals. U.S. companies have entered agreements establishing more than 20,000 equity joint ventures, contractual joint ventures, and wholly foreign-owned enterprises in China. More than 100 U.S.-based multinationals have projects in China, some with multiple investments. Cumulative U.S. investment in China was estimated at \$57 billion through the end of 2007, making the United States the sixth-largest foreign investor in China.

Total two-way trade between China and the United States grew from \$33 billion in 1992 to over \$386 billion in 2007. The United States is China's second-largest trading partner, and China is now the third-largest trading partner for the United States (after Canada and Mexico). U.S. exports to China have been growing more rapidly than to any other market. U.S. imports from China grew 5.1% in 2008 and accounted for 16.1% of overall U.S. imports in 2008, bringing the U.S. trade deficit with China to \$266.3 billion. Some of the factors that influence the U.S. trade deficit with China include:

- A shift of low-end assembly industries to China from the newly industrialized economies (NIEs) in Asia. China has increasingly become the last link in a long chain of value-added production. Because U.S. trade data attributes the full value of a product to the final assembler, Chinese value-added gets over-counted.

- Strong U.S. demand for Chinese goods.

- China's restrictive trade practices, which have included an array of barriers to foreign goods and services, often aimed at protecting state-owned enterprises. Under its WTO accession agreement, China is reducing tariffs and eliminating import licensing requirements, as well as addressing other trade barriers.

The U.S. approach to its economic relations with China has two main elements:

First, the United States seeks to fully integrate China into the global, rules-based economic and trading system. China's participation in the global economy will nurture the process of economic reform, encourage China to take on responsibilities commensurate with its growing influence, and increase China's stake in the stability and prosperity of East Asia.

Second, the United States seeks to expand U.S. exporters' and investors' access to the Chinese

market. As China grows and develops, its needs for imported goods and services will grow even more rapidly. The U.S. Government will continue to work with China's leadership to ensure full and timely conformity with China's WTO commitments--including effective protection of intellectual property rights--and to encourage China to move to a flexible, market-based exchange rate in order to further increase U.S. exports of goods, agricultural products, and services to the P.R.C.

U.S.-China Strategic and Economic Dialogue (S&ED)

During a discussion of U.S.-China relations and global issues of common interest at a bilateral meeting in April 2009, President Barack Obama and President Hu Jintao agreed to work toward a positive, cooperative, and comprehensive U.S.-China relationship for the 21st century. They established the U.S.-China Strategic and Economic Dialogue as the mechanism to advance that relationship.

The Strategic and Economic Dialogue (S&ED) provides a framework for the U.S. and China to open up paths of communication on global issues of common concern and deal with these challenges as responsible global stakeholders.

The S&ED brings together top political and economic leaders from both sides to identify opportunities for cooperation and engage in frank discussions of priorities for our bilateral relationship. It complements and adds additional force to the many existing bilateral dialogues that we have with China. The S&ED sets the tone and framework for these sub-dialogues, which incorporate the priorities developed at the S&ED. It was designed to meet once a year to give room for these sub-dialogues to produce results.

The dialogue enables us to work together to resolve our differences, to build trust, and to strengthen cooperation, all of which serves our common interest.

The strategic track of the S&ED consists of four pillars: 1) bilateral relations (people-to-people exchanges); 2) international security issues (nonproliferation, counterterrorism); 3) global issues (health, development, energy, global institutions); and 4) regional security and stability issues (Afghanistan/Pakistan, Iran, D.P.R.K.).

On July 27 and 28, 2009, the first Strategic and Economic Dialogue was held in Washington, DC and was led by four co-chairs: Secretary of State Hillary Rodham Clinton and Secretary of the Treasury Timothy Geithner, Vice Premier Wang Qishan, and State Councilor Dai Bingguo. The event provided an opportunity for over 20 officials of cabinet rank from each side to meet face-to-face and to discuss a range of substantive issues. This novel whole of government approach incorporates the full range of economic, regional, global, and environmental challenges that require action by both countries in order to attain progress.

The joint press release on the U.S.-China Strategic and Economic Dialogue documents more specifically the wide range of issues discussed and is located on the State Department website at <http://www.state.gov/r/pa/prs/ps/2009/july/126596.htm>.

Over the next year, the United States and China will be working on priority issues identified at the S&ED in our various bilateral initiatives with China, including several sub-dialogues and meetings between cabinet and sub-cabinet level officials. The results of these meetings will feed into the planning for the second S&ED to be hosted in Beijing in the early summer of 2010.

Chinese Diplomatic Representation in the United States

Ambassador--Zhou Wenzhong

In addition to China's [Embassy](#) in Washington, DC, there are Chinese Consulates General in Chicago, Houston, Los Angeles, New York, and San Francisco.

Embassy of the People's Republic of China
3505 International Place, NW
Washington, DC 20008
Tel.: (202) 328-2500

Consulate General of the People's Republic of China-New York
520 12th Avenue
New York, NY 10036
Tel.: (212) 868-7752

Consulate General of the People's Republic of China-San Francisco
1450 Laguna Street
San Francisco, California 94115
Tel.: (415) 563-4885

Consulate General of the People's Republic of China-Houston
3417 Montrose Blvd.
Houston, Texas 77006
Tel.: (713) 524-4311

Consulate General of the People's Republic of China-Chicago
100 West Erie St.
Chicago, Illinois 60610
Tel.: (312) 803-0098

Consulate General of the People's Republic of China-Los Angeles
502 Shatto Place, Suite 300
Los Angeles, California 90020
Tel.: (213) 807-8088

U.S. Diplomatic Representation in China

Ambassador--[Jon M. Huntsman](#)

In addition to the U.S. Embassy in Beijing, there are U.S. Consulates General in Chengdu, Guangzhou, Shanghai, Shenyang, and Wuhan.

American Embassy Beijing
No. 55 An Jia Lou Road
Beijing 100600
People's Republic of China

TRAVEL AND BUSINESS INFORMATION

The U.S. Department of State's Consular Information Program advises Americans traveling and residing abroad through Country Specific Information, Travel Alerts, and Travel Warnings.

Country Specific Information exists for all countries and includes information on entry and exit requirements, currency regulations, health conditions, safety and security, crime, political disturbances, and the addresses of the U.S. embassies and consulates abroad. **Travel Alerts** are

issued to disseminate information quickly about terrorist threats and other relatively short-term conditions overseas that pose significant risks to the security of American travelers. **Travel Warnings** are issued when the State Department recommends that Americans avoid travel to a certain country because the situation is dangerous or unstable.

For the latest security information, Americans living and traveling abroad should regularly monitor the Department's Bureau of Consular Affairs Internet web site at <http://www.travel.state.gov>, where the current [Worldwide Caution](#), [Travel Alerts](#), and [Travel Warnings](#) can be found. [Consular Affairs Publications](#), which contain information on obtaining passports and planning a safe trip abroad, are also available at <http://www.travel.state.gov>. For additional information on international travel, see <http://www.usa.gov/Citizen/Topics/Travel/International.shtml>.

The Department of State encourages all U.S. citizens traveling or residing abroad to register via the [State Department's travel registration](#) website or at the nearest U.S. embassy or consulate abroad. Registration will make your presence and whereabouts known in case it is necessary to contact you in an emergency and will enable you to receive up-to-date information on security conditions.

Emergency information concerning Americans traveling abroad may be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or the regular toll line 1-202-501-4444 for callers outside the U.S. and Canada.

The [National Passport Information Center](#) (NPIC) is the U.S. Department of State's single, centralized public contact center for U.S. passport information. Telephone: 1-877-4-USA-PPT (1-877-487-2778); TDD/TTY: 1-888-874-7793. Passport information is available 24 hours, 7 days a week. You may speak with a representative Monday-Friday, 8 a.m. to 10 p.m., Eastern Time, excluding federal holidays.

Travelers can check the latest health information with the U.S. Centers for Disease Control and Prevention in Atlanta, Georgia. A hotline at 800-CDC-INFO (800-232-4636) and a web site at <http://wwwn.cdc.gov/travel/default.aspx> give the most recent health advisories, immunization recommendations or requirements, and advice on food and drinking water safety for regions and countries. The CDC publication "Health Information for International Travel" can be found at <http://wwwn.cdc.gov/travel/contentYellowBook.aspx>.

Further Electronic Information

Department of State Web Site. Available on the Internet at <http://www.state.gov>, the Department of State web site provides timely, global access to official U.S. foreign policy information, including [Background Notes](#) and [daily press briefings](#) along with the directory of [key officers](#) of Foreign Service posts and more. The Overseas Security Advisory Council (OSAC) provides security information and regional news that impact U.S. companies working abroad through its website <http://www.osac.gov>

[Export.gov](#) provides a portal to all export-related assistance and market information offered by the federal government and provides trade leads, free export counseling, help with the export process, and more.

[STAT-USA/Internet](#), a service of the U.S. Department of Commerce, provides authoritative economic, business, and international trade information from the Federal government. The site includes current and historical trade-related releases, international market research, trade opportunities, and country analysis and provides access to the [National Trade Data Bank](#).

CHINA – CONSULAR INFORMATION SHEET

Americans planning travel to *China* should read [Intercountry Adoption - China](#), [Avian Flu Fact Sheet](#), [International Parental Child Abduction China](#) and [Worldwide Caution Travel Alert](#) available on the Department of State web site at <http://travel.state.gov>

December 31, 2009

COUNTRY DESCRIPTION: The People's Republic of China was established on October 1, 1949, with Beijing as its capital city. With well over 1.3 billion citizens, China is the world's most populous country and the fourth-largest country in the world in terms of territory. China is undergoing rapid, profound economic and social change and development. Political power remains centralized in the Chinese Communist Party. Modern tourist facilities are available in major cities, but many facilities in smaller provincial cities and rural areas are frequently below international standards. Read the Department of State [Background Notes on China](#) for additional information.

REGISTRATION/EMBASSY LOCATION: U.S. citizens living or traveling in China are encouraged to register with the nearest U.S. embassy or consulate at the [Department of State's travel registration page](#) in order to obtain updated information on local travel and security. U.S. citizens without Internet access may register directly with the nearest U.S. embassy or consulate. Registration is important; it allows the State Department to assist U.S. citizens in an emergency. Local embassy information is available below and at the [Department of State's list of embassies and consulates](#).

Beijing: [The U.S. Embassy](#) is located at No. 55 An Jia Lou Road, Chaoyang District, Beijing 100600. The American Citizen Services section can be contacted during regular business hours and for after-hours emergencies at (86) (10) 8531-4000 or by [e-mail](#). For detailed information please visit the U.S. Embassy website. The Embassy consular district includes the following provinces/regions of China: Beijing, Tianjin, Shandong, Shanxi, Inner Mongolia, Ningxia, Shaanxi, Qinghai, Gansu, Xinjiang, Hebei, Henan, Hubei, Hunan and Jiangxi. Chengdu: [The U.S. Consulate General in Chengdu](#) is located at Number 4, Lingshiguan Road, Section 4, Renmin Nanlu, Chengdu 610041; tel. (86)(28) 8558-3992, 8555-3119; after-hours emergencies (86)(28) 1370 8001 422, and [can be contacted via email](#). This consular district includes the following provinces/regions of China: Guizhou, Sichuan, Xizang (Tibet) and Yunnan, as well as the municipality of Chongqing. Guangzhou: The main office of [the U.S. Consulate General in Guangzhou](#) is located at Number 1 South Shamian Street, Shamian Island 200S1, Guangzhou 510133. The Consular Section, including the American Citizens Services Unit, is now located at 5th Floor, Tianyu Garden (II phase), 136-146 Lin He Zhong Lu, Tianhe District; tel. (86)(20) 8518-7605; after-hours emergencies (86)(20) 8121-8000; and may be [contacted by email](#). This consular district includes the following provinces/regions of China: Guangdong, Guangxi, Hainan and Fujian. Shanghai: The Consular Section of [the U.S. Consulate General in Shanghai](#) is located in the Westgate Mall, 8th Floor, 1038 Nanjing Xi Lu, Shanghai 200031; tel. (86)(21) 3217-4650; after-hours emergencies (86)(21) 6433-3936; [inquiries can be made via email](#). This consular district includes the following provinces/regions of China: Shanghai, Anhui, Jiangsu and Zhejiang. Shenyang: [The U.S. Consulate General in Shenyang](#) is located at No. 52, 14th Wei Road, Heping District, Shenyang 110003; tel. (86)(24) 2322-2374; after-hours U.S. citizen emergencies (86)(24) 137-0988-9307. [Inquiries about U.S. visas will not be answered via this emergency phone. Please contact the Consulate during normal business hours for such questions.] [Contact may be made via email](#). This consular district includes the following provinces/regions of China: Liaoning, Heilongjiang and Jilin.

ENTRY/EXIT REQUIREMENTS: A valid passport and visa are required to enter and exit China. The visa must have been obtained from a Chinese embassy or consulate before traveling to China. A U.S. citizen arriving without a valid passport and the appropriate Chinese visa will not be permitted to enter China and will be subject to a fine and immediate deportation at the traveler's expense. Travelers should not rely on Chinese host organizations claiming to be able to arrange their visas upon arrival. Chinese authorities have recently tightened their visa issuance policy, in some cases requiring personal interviews of U.S. citizens. Although a bilateral United States-China agreement provides for issuance of multiple-entry visas with validity of up to one year for tourists and business visitors, Chinese consulates often limit visas to only one entry. [Visit the Embassy of China's website for the most current visa information.](#) Visas are not required of U.S. citizens who hold air tickets to a final destination other than China, have booked seats on international airliners flying directly through China, and will stay in a transit city for less than 24 hours without leaving the airport. Persons transiting China on the way to and from Mongolia or North Korea or who plan to re-enter China from the Hong Kong or Macau Special Administrative Regions should be sure to obtain visas allowing more than one entry. Permits are required to visit Tibet as well as many remote areas not normally open to foreigners. A travel permit for Tibet can be obtained through local travel agents. Permits cost approximately *renminbi* (RMB) 100, are single-entry and valid for at most three months. Most areas in Tibet are not open for foreigners except Lhasa City and part of Shan Nan. Foreigners can be fined up to RMB 500, taken into custody, and deported for visiting restricted areas. For information about entry requirements and restricted areas, travelers may consult the Visa Office of the Embassy of China (PRC) at Room 110, 2201 Wisconsin Avenue, NW, Washington DC 20007, or telephone (202) 338-6688 and fax (202) 588-9760. [For a list of services and frequently asked visa questions and answers, travelers can view the Chinese Embassy's website.](#) There are Chinese consulates general in Chicago, Houston, Los Angeles, New York and San Francisco. The Chinese government has instituted a series of quarantine measures in response to the 2009-H1N1 Influenza. Implementation of the quarantine policies is decided by Chinese officials and sponsoring organizations and may vary by location. Travelers should check frequently with their tour group, sponsoring organization or hotel before traveling to China on what procedures will be in effect for them or their group. Travelers should be advised that host governments, including local authorities, determine the nature and appropriateness of the measures taken in public health matters.

In 2007, the Chinese government tightened its regulations for altering or renewing visas for individuals already in China. Visitors can no longer change tourist (L) and exchange (F) -type visas to other types and many applications must now be completed in person. There have also been reports that entry and exit violations are being more strictly enforced, with recent reports of police, school administrators and hotel staff checking to ensure that individuals have not overstayed their visas. Visitors are expected to register with the police within 24 hours of arrival in China. While hotels generally routinely register their guests with the police with no additional action being required from the guest, U.S. citizens planning on staying in private homes with family or friends must go to their local police station to register. The police have been stricter in the enforcement of this rule and have fined apartment companies, hotels and U.S. citizens for violations.

U.S. citizens are cautioned that Chinese immigration regulations require foreigners entering China to undertake only the activity for which their visas were issued. A change in the purpose of the visit requires permission in advance from the appropriate Chinese authorities. U.S. citizens who violate the terms of their Chinese visas, including overstays will be subject to a maximum fine of 5,000 RMB, departure delays, and possible detention. Travelers should note that international flights departing China are routinely overbooked, making reconfirmation of departure reservations and early airport check-in essential. An airport user fee for both international and domestic flights is now included in the cost of the ticket price. U.S. citizens are also required to have an exit visa to leave China. U.S. citizens who lose a passport must take into consideration the time needed to get a new passport and a new visa. Visas are issued by Chinese authorities and can take as long as 7 business days. In an effort to prevent international child abduction, many governments have

initiated new procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if they are not present. Having such documentation on hand, even if not required, may facilitate entry/departure. Dual-national U.S. citizens, particularly those with dual Chinese and United States nationality, should realize that entering China using their non-U.S. passport could mean that the Chinese Government may not afford them the consular protections to which they are entitled. While the U.S. Government will offer consular services to all U.S. citizens regardless of dual nationality, use of other than a U.S. passport to enter China can make it difficult for U.S. consular officers to assist dual-national U.S. citizens who have been arrested or who have other concerns with the Chinese Government. China does not recognize dual citizenship. U.S. Embassy and Consulate officials are often denied access to arrested or detained U.S. citizens who do not enter China using their U.S. passport. Lawful Permanent Residents of the United States who do not carry unexpired Permanent Resident Cards ("Green Cards") or other clear evidence that they may re-enter the United States will encounter delays departing from China. Lawful Permanent Residents should renew and update U.S. residence documentation prior to their departure from the United States.

China considers a child born within its borders to hold Chinese citizenship if one parent is a Chinese national, even if the child applies for and receives a U.S. passport while in China. In these cases, when parents want to travel overseas with their child, they should contact their local Public Security Bureau for information on obtaining a travel document (*lu xing zheng*).

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of China. There are several laws in place that do not permit those with HIV/AIDS to enter China, and long-term residents must obtain clearance from Chinese health authorities. [For further information about HIV/AIDS restrictions, contact the Embassy of China before traveling.](#)

Information about [dual nationality](#) or the [prevention of international child abduction](#) can be found on our website. For further information about customs regulations, please read our [Customs Information page](#).

THREATS TO SAFETY AND SECURITY: The Chinese Government will sometimes not authorize the travel of official U.S. personnel to certain areas of Tibet. These travel limitations may hinder the ability of the U.S. Government to provide assistance to private U.S. citizens in those areas. U.S. tourists are also sometimes not authorized to travel to certain parts of Tibet.

U.S. citizens visiting or residing in China are advised to take routine safety precautions. In particular, travelers should remain aware of their surroundings and of ongoing events. They should respect local police requirements prohibiting travel in some areas. Travelers should verify with U.S. tour operators that local guides being used are familiar with medical facilities and emergency medical evacuation procedures. Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones, and fax machines may be monitored, and personal possessions in hotel rooms, including computers, may be searched without the consent or knowledge of the traveler. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Foreign government officials, journalists, and business people with access to advanced proprietary technology are particularly likely to be under surveillance. Terrorism is rare in China, although a small number of bombings have occurred throughout the country. Recent bombings have generally been criminally motivated, frequently the result of commercial disputes and job layoffs. The vast majority of these local incidents related to disputes over land seizures, social issues or environmental problems. Some incidents have become large-scale and involved criminal activity, including hostage taking and vandalism. A few instances have been reported of local employees setting off explosives at their places of business after being terminated by their expatriate employers. U.S. employers conducting layoff negotiations should do so at a neutral site and always notify the local law enforcement authorities in advance. Business disputes in China are not always handled through the courts. Recently, incidents have increased of U.S. citizens being kidnapped or detained by workers or hired gangs for the specific purpose of extorting money, sometimes millions of dollars,

or intimidated for other gains. In the latter cases, the U.S. citizen is typically threatened with violence and detained at a factory, hotel, or private residence until payment is negotiated and delivered. Sometimes the U.S. citizen is physically assaulted or abducted.

Anyone entering into a contract in China should have it thoroughly examined, both in the United States and in China. Contracts entered into in the United States are not enforced by Chinese courts. Care should also be taken when entering into a lease for an apartment or house. There have been instances of foreigners involved in lease disputes being evicted from their apartments, and then prevented from re-entering, even to retrieve their belongings.

U.S. citizens doing business in China should be aware that if they become involved in a business and/or civil dispute, the Chinese government may prohibit them from leaving China until the matter is resolved. There are cases of U.S. citizens being prevented from leaving China for months and even years while their civil cases are pending. Civil cases may sometimes be regarded as criminal cases, and the defendant may be placed in custody. U.S. citizens and business owners should be aware that many intending migrants from China will try to enlist their assistance to secure a U.S. visa. In one common scheme, a PRC national contacts a U.S. business feigning interest in a particular product or service. The PRC national then asks for a formal letter from the U.S. company inviting him or her (alone or with colleagues) to come to the United States to discuss or finalize a purchase, or establish formal cooperation between the two companies. The PRC national will then use the invitation letter when he or she applies for a U.S. visa to show he/she has a legitimate purpose of travel. While many such requests may be legitimate, some are not. Oftentimes, the PRC national initiating the contact has no relationship to his/her claimed Chinese employer. In fact, it is not unusual for these individuals to be part of elaborate human smuggling syndicates. Visa sections at the U.S. Embassy and Consulates in China are regularly contacted by U.S. businesses that unwittingly have been used to facilitate illegal migration schemes.

For the latest security information, U.S. citizens traveling abroad should regularly monitor the Department of State's [Bureau of Consular Affairs' website](#), which contains current the [Travel Warnings and Travel Alerts](#) as well as the [Worldwide Caution](#).

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free within the U.S. and Canada, or by calling a regular toll line, 1-202-501-4444, from other countries. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

The Department of State urges U.S. citizens to take responsibility for their own personal security while traveling overseas. For general information about appropriate measures travelers can take to protect themselves in an overseas environment, see the Department of State's extensive tips and advice on [traveling safely abroad](#).

CRIME: While China's overall crime rate remains low, the Mission has observed a discernable increase in violent and nonviolent crime throughout the country in the past year. Some major metropolitan areas, including Shanghai, have reported an annual increase in certain types of crime compared to the same period in 2008. Senior Chinese officials have warned publicly that during the current economic downturn, the crime rate may increase.

Petty theft remains the most prevalent type of crime impacting Westerners. Pickpockets target tourists at sightseeing destinations, open-air markets, airports, and stores, often with the complicity of low-paid security guards. Violence against foreigners, while rare, is increasing. Over the past year, incidents of violence against foreigners, including stabbings and sexual assaults, have taken place, usually in urban areas where bars and nightclubs are located. Robberies, sometimes at knifepoint, have occurred in western China and more recently in Beijing. Historically, the use of firearms in the commission of a crime has been a rare event in China. However, with the declining economy, the Embassy has observed an uptick in gun-related crimes, including armed robberies of restaurants and banks. There have been some reports of robberies and assaults along remote mountain highways near China's border with Nepal.

Narcotics-related crimes are also on the rise in China. U.S. travelers should be aware that Chinese law enforcement authorities have little tolerance for illegal drugs and periodically conduct widespread sweeps of bar and nightclub districts targeting narcotics distributors and drug users. Expatriates from various countries, including dependents of diplomats, have been detained in such police actions.

It is illegal to exchange dollars for RMB except at banks, hotels, and official exchange offices. Due to the large volume of counterfeit currency in China, unofficial exchanges usually result in travelers losing their money and possibly facing charges of breaking foreign exchange laws. If detained by police under suspicion of committing an economic crime involving currency, travelers may be delayed for weeks or months while police investigate the allegations. In general, counterfeit currency is becoming a widespread problem. The Embassy receives regular reports of employees receiving fraudulent 100 and 50 RMB notes from ATMs and taxi drivers. ATM scams are also becoming more prevalent. Travelers should use ATMs that are physically attached to a bank and use Western banking institutions whenever possible.

There have been periodic instances in Beijing and elsewhere of mobs in bar districts attacking foreigners. Nationalism and anti-Western sentiment may flare up as a result of sensitive issues or current events. Disputes among Chinese citizens or between Chinese and foreigners can quickly escalate. Caution should be exercised when visiting bar districts late at night, especially on weekends. There have been reports of bar fights in which U.S. citizens have been specifically targeted due to their nationality. Simple arguments can turn into mob scenes and many times have resulted in the U.S. citizen being detained for hours for questioning with no right to an attorney or access to a consular officer at that stage. Bar fights are often punished by administrative detention in a local jail for up to two weeks, usually followed by deportation. Travelers should have small bills (RMB 10, 20 and 50 notes) for travel by taxi. Reports of taxi drivers using counterfeit money to make change for large bills are increasingly common, especially in Beijing and Guangzhou. Arguments with taxi drivers over fares or over choice of route usually are not easily resolved on the scene. In some cases, U.S. citizens who instigate such arguments have been detained for questioning and have not been released until the fare is paid or a settlement is reached and the U.S. citizen offers an apology. There has been an increase in the number of U.S. citizen falling victim to scams involving the inflation of prices for tea and other drinks. Normally, the scam involves young people who approach English-speaking tourists and ask to have a cup of tea with them to practice their English. When the bill comes for the tea, the charge has been inflated to an exorbitant amount. When the tourist complains, enforcers arrive to collect the money. A similar scam involves buying drinks for young women at local bars. Throughout China, women outside hotels in tourist districts frequently use the prospect of companionship or sex to lure foreign men to isolated locations where accomplices are waiting to rob them or to place them in compromising situations. Travelers should not allow themselves to be driven to bars or to an individual's home unless they know the person making the offer. Hotel guests should not open their room doors to anyone they do not know personally. The Embassy has received some reports of Internet fraud committed against U.S. citizens and intended to secure a visa to the United States or money. A common scenario involves a Chinese national hiring a consulting company to communicate with a U.S. citizen on his/her behalf. The intent of the Chinese national is not always clear; however, the business models of many of these consulting companies rely on the U.S. citizen ultimately sending money to the Chinese national for expenses, such as English study; however, the money goes to the consultant instead. The U.S. citizen may unwittingly carry on telephone conversations with a paid consultant posing as the romantic interest. In some cases, the U.S. citizen may travel to China to meet his/her Internet friend in person. A visa consultant accompanies the Chinese friend and presents the U.S. citizen with a demand for payment of thousands of dollars in fees. At times, when the U.S. citizen has refused to pay, s/he has been threatened with physical violence or unlawful detention. Another common scenario involves a Chinese person claiming he/she or a close family member has been kidnapped or had a large sum of money stolen and asking the U.S. citizen to wire him/her money. Recently, similar incidents have involved the "virtual" kidnapping of children. In these cases, a

scam artist sends the parents a text message claiming to have kidnapped the child and asking for money for the child's safe return. In such cases, contact the police and the child's school, as well as the Embassy or nearest consulate immediately before responding. To date, all such matters reported to the Embassy have been fraudulent. We remind U.S. citizens that no one should provide personal or financial information to unknown parties. For additional information on these types of scams, see the Department of State publication, [International Financial Scams](#). Relationship fraud via the Internet is also a growing industry. While many Chinese citizens are sincere in their desire to marry and live with U.S. citizens they meet over the Internet, some are not. It is important to remember that many Chinese view immigrant visas to the United States as having a great deal of value, and it is not uncommon for people to enter into relationships for the sole purpose of obtaining a visa. Unfortunately, the Embassy is unable to carry out investigations of relationships of this sort, but all U.S. citizens are urged to approach such Internet relationships with caution, and to be wary of situations which appear similar to that described above. U.S. visitors have encountered scams at the international airports in China whereby individuals appearing to work for the airport offer to take U.S. citizen tourists' bags to the departure area, but instead they carry the bags to another area and insist that the visitor pay an airport tax. Travelers should be advised that the airport tax is included in the price of the airline ticket. The airport police or security officers should be contacted if this happens. The U.S. Embassy is aware of reports that airport thefts and robberies of travelers in China are on the rise, specifically in the domestic airports of Beijing, Zhengzhou, Shenyang, Dalian, Qingdao and Taiyuan. Travelers should take only licensed taxi cabs when traveling to the airport. The Embassy has received reports of individuals taking unlicensed taxis or "black" cabs to the airport; after exiting the vehicle, the driver departs the scene with the individual's luggage still in the car. Additionally, some U.S. citizens report that they have been the victims of robberies while in their hotel rooms in tourist areas. Some U.S. citizens have been assaulted during these robberies. U.S. visitors to China should carry their passports with them out of reach of pickpockets. U.S. citizens with Chinese residence permits (*juliuzheng*) should carry these documents, and leave their passports in a secure location except when traveling. All U.S. citizens are encouraged to make photocopies of their passport bio-data pages and Chinese visas and to keep these in a separate, secure location, and to register with the U.S. Embassy or nearest Consulate General. (See Registration/Embassy Location information below).

The protection of patents, trademarks, copyrights, and trade secrets is essential to a well-developed economy. Intellectual property rights (IPR) are a crucial economic cornerstone for all nations. They represent the collective creative power of the people. Upholding IPR protection is one of the foremost ways to improve the living standards for all, promote national identity, and enhance cultural diversity. In many countries around the world, however, counterfeit and pirated goods are widely available. While consumers may be tempted by counterfeit goods' cheap price, purchasing such goods is, in essence, stealing another's creations. Buying such products may contribute to criminal activity such as slave and child labor, money laundering, and drug trafficking. Counterfeiting is not limited to knock-off bags and DVDs. Food, medicine, cosmetics, auto parts and many other everyday products also are illegally produced, sometimes putting consumers at risk of injury or even death. Counterfeiting and piracy are crimes. Bringing such products back to the United States is illegal and may result in forfeiture and/or fines. We strongly advise against knowingly purchasing pirated or counterfeit goods.

VICTIMS OF CRIME: If you are the victim of a crime abroad, you should contact the local police and the nearest U.S. embassy or consulate (see end of this sheet or see the [Department of State's list of embassies and consulates](#)). This includes the loss or theft of a U.S. passport. The embassy/consulate staff can, for example, help you find appropriate medical care, contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime are solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

China has a system similar to "911" in the United States which the Chinese can use to contact police or other emergency services. U.S. citizens can call 110 while in China to reach this service; however, there are rarely any English speakers working this hotline.

Please see our [information on victims of crime](#), including possible victim compensation programs in the United States.

CRIMINAL PENALTIES: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, [prosecutable in the United States](#).

In 2006, a Public Security Law went into effect in China that gives the police powers relating to the commission of a wide range of offenses, including the authority to detain and deport foreigners. The list of offenses has been expanded to include certain religious activities and prostitution-related crimes. U.S. citizens who are questioned by police should immediately notify the U.S. Embassy or the nearest consulate. Foreigners detained for questioning may not be allowed to contact their national authorities until the questioning is concluded. Foreigners who are detained pending trial have often waited over a year for their trial to begin. Foreigners suspected of committing a crime are rarely granted bail. Criminal punishments, especially prison terms, are much more severe than those in the United States. Several U.S. citizens currently incarcerated in China have been implicated in financial fraud schemes involving falsified bank or business documents, tax evasion schemes and assisting alien smuggling, including selling passports to provide aliens with travel documents. In the past, protesters detained for engaging in pro-Falun Gong activities have been quickly deported from China after being questioned. Several of these protesters say they were physically abused during their detention. In addition, they allege that personal property, including clothing, cameras, and computers have not always been returned to them upon their deportation. Chinese authorities report that while they have deported these foreigners quickly after public demonstrations in favor of the Falun Gong, future adherents who intentionally arrive in China to protest against Chinese policy may receive longer terms of detention and possibly face prison sentences. In one instance, a U.S. citizen Falun Gong practitioner traveling in China on personal business was detained and asked to provide information on other Falun Gong practitioners in the United States.

Political protest is not legal or permitted in China, except under extraordinary circumstances rarely encountered by foreigners. Travelers who have attempted to engage in political protest activities in public places have been quickly deported, in some cases at their own considerable expense and usually before the U.S. Embassy is made aware of the case. Participation in unauthorized political activities in China can also cause difficulty in applying for future visas to visit China.

Several U.S. citizens have been detained and expelled for passing out non-authorized Christian literature. Sentences for distributing this material may range from three to five years' imprisonment, if convicted. Chinese customs authorities have enforced strict regulations concerning importation into China of religious literature, including Bibles. Foreigners may import only a "reasonable" amount of religious literature, and only for personal use. Larger quantities will likely be confiscated, and other penalties may apply.

SPECIAL CIRCUMSTANCES: China shares a lengthy border with the Democratic People's Republic of Korea (North Korea), a country with which the United States does not maintain diplomatic or consular relations. U.S. citizens traveling along the China–North Korea border are asked to use caution as they will become subject to North Korean law upon entering the country, even if they do so inadvertently. For further information about travel to North Korea, please see the [North Korea Country Specific Information webpage](#).

U.S. citizens who rent apartments with gas appliances should be aware that, in some areas, natural gas is not scented to warn occupants of gas leaks or concentrations. In addition, heaters

may not always be well-vented, allowing excess carbon monoxide to build up in living spaces. Due to fatal accidents involving U.S. citizens, travelers are advised to ensure all gas appliances are properly vented or to install gas and carbon monoxide detectors in their residences. These devices are not widely available in China and should be purchased prior to arrival.

Chinese customs authorities may enforce strict regulations concerning temporary importation into or export from China of items such as antiquities, banned publications, religious literature (which may be imported for the visitor's personal use only), or vehicles not conforming to Chinese standards. It is advisable to contact the Embassy of China in Washington or one of China's Consulates in the United States for specific information regarding customs requirements. Some U.S. citizens report that items purchased in China and believed to be antiques or genuine gems are often later determined to be reproductions. Some travelers report that this occurs even at state-owned stores and museum stores. Travel agencies and tour guides will often escort tour groups to particular shops at which the travel agency or tour guide will share in the profit, and may claim to guarantee the "authenticity" of items sold in those shops. Travelers should be vigilant when purchasing items in China. China's customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. [ATA Carnet Headquarters, located at the U.S. Council for International Business](#), 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, or [send inquiries by e-mail](#).

ENGLISH TEACHERS/SECONDARY SCHOOL TEACHERS: Many U.S. citizens have enjoyed their teaching experience in China; others have encountered significant problems. Prospective teachers are encouraged to read the [Teaching in China Guide](#) on Embassy Beijing's American Citizen Services web site. To assist the Embassy in providing up-to-date information to prospective teachers, U.S. citizens experiencing problems should inform the Embassy by [e-mailing the American Citizens Services Unit](#) or by calling telephone (86) (10) 8531-4000.

DISASTER PREPAREDNESS: The southeast coast of China is vulnerable to strong typhoons, usually from July to September. Travelers planning a trip to China can obtain general information about natural disaster preparedness from the [U.S. Federal Emergency Management Agency \(FEMA\)](#). Additional information about currently active typhoons can be obtained on the [University of Hawaii tropical storm](#) page.

MEDICAL FACILITIES AND HEALTH INFORMATION: The standards of medical care in China are not equivalent to those in the United States. Medical facilities with international staffs are available in Beijing, Shanghai, Guangzhou and a few other large cities. Many other hospitals in major Chinese cities have so-called VIP wards (*gaogan bingfang*). These feature reasonably up-to-date laboratory and imaging facilities. The physicians in these centers are generally well-trained. Most VIP wards also provide medical services to foreigners and have English-speaking doctors and nurses. Generally, in rural areas, only rudimentary medical facilities are available, often with poorly trained medical personnel who have little medical equipment and medications. Rural clinics are often reluctant to accept responsibility for treating foreigners, even in emergency situations. Most hospitals in China will not accept medical insurance from the United States, with the exception of the following hospitals, which are on the [Blue Cross Blue Shield's worldwide network providers - overseas network hospitals' list](#): Hong Kong Adventist Hospital, Beijing United Family Hospital, Beijing Friendship Hospital, International Medical Center in Beijing, Peking Union Medical Center, and Shanghai United Family Hospital. Cash payment for services is often demanded before a patient is seen and treated, even in cases of emergency. Travelers will be asked to post a deposit prior to admission to cover the expected cost of treatment. Hospitals in major cities may accept credit cards for payment. Even in the VIP/foreigner wards of major hospitals, however, U.S. citizen patients have frequently encountered difficulty due to cultural, language, and regulatory differences. Physicians and hospitals have sometimes refused to supply U.S. patients with complete copies of their Chinese hospital medical records, including laboratory test results, scans, and x-rays. U.S. citizens who elect to have surgery or other medical services

performed in China should be aware that there is little legal recourse to protect consumers in cases involving medical malpractice. Travelers should note that commonly used U.S. medications are generally not available in China. Medications that bear the same or similar name to prescription medication from the United States are not always the same. U.S. citizens should carry their prescriptions from their doctors if carrying prescription medication into China for personal use. Ambulances often do not carry sophisticated medical equipment. Injured or seriously ill U.S. citizens may be required to take taxis or other immediately available vehicles to the nearest major hospital rather than waiting for ambulances to arrive. International SOS operates modern medical and dental clinics and provides medical evacuation and medical escort services in Beijing, Nanjing, Tianjin, Shekou and, as well as 24hr Alarm Centers in Beijing and Hong Kong. Through its clinics in Beijing (24 hours), Tianjin, Nanjing and Shekou, International SOS offers international standard family practice services, emergency medical services and a range of clinical services, though these can be expensive. For medical emergencies anywhere in mainland China, U.S. citizens can call the International SOS 24-hour "Alarm Center" in Beijing at telephone: (86) (10) 6462-9100 for advice and referrals to local facilities. International SOS Alarm Centers can also be contacted in Hong Kong at telephone: (852) 2528-9900 and in the United States at: (215) 942-8226. [For a full list of International SOS locations and phone numbers, consult the SOS website.](#) [The U.S. Embassy and Consulates in China maintain lists of local English-speaking doctors and hospitals](#), all of which are published on their respective American Citizens Services webpages.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's (CDC) hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the [CDC website](#). For information about outbreaks of infectious diseases abroad, consult the infectious diseases section of the [World Health Organization \(WHO\) website](#). The WHO website also contains additional health information for travelers, including [detailed country-specific health information](#).

Tuberculosis is an increasingly serious health concern in China. For further information, please [consult the CDC's information on TB](#).

H1N1 INFLUENZA PANDEMIC

The Chinese officials' response to the 2009-H1N1 influenza pandemic continues to evolve with the changing global situation. For the latest information on specific travel restrictions, quarantine measures applicable to all travelers in or entering/transiting the People's Republic of China, or other considerations please see the Embassy Website at <http://beijing.usembassy-china.org.cn/121009u.html>. For more information on travel safety and U.S. Government policy during a pandemic, please see the State Department's "Pandemic/Avian Influenza" and "Remain in Country" Fact Sheets at <http://travel.state.gov>. Further information about 2009-H1N1 Influenza, including steps you can take to stay healthy, can be found at the U.S. Centers for Disease Control website at <http://www.cdc.gov/h1n1flu/>, the U.S. Government Pandemic Influenza website at <http://www.flu.gov>, and the World Health Organization website at <http://www.who.int/csr/disease/swineflu/en/index.html>.

MEDICAL INSURANCE: The Department of State strongly urges U.S. citizens to consult their medical insurance company prior to traveling abroad to determine whether the policy applies overseas and whether it covers emergency expenses such as a medical evacuation. For more information, please see our [medical insurance overseas page](#).

TRAFFIC SAFETY AND ROAD CONDITIONS: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning China is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The rate of traffic accidents in China, including fatal accidents, is among the highest in the world. Driving etiquette in China is still developing, and the average Chinese driver has less than five

years' experience behind the wheel. As a result, traffic is often chaotic, and right-of-way and other courtesies are often ignored. Travelers to China should note that cars, bicycles, motorbikes, trucks, and buses often treat road signs and signals as advisory rather than mandatory. Vehicles traveling in the wrong lanes frequently hit pedestrians and bicyclists. Pedestrians should always be careful while walking near traffic. Most traffic accident injuries involve pedestrians or cyclists who are involved in collisions or who encounter unexpected road hazards (e.g., unmarked open manholes). Foreigners with resident permits can apply for PRC driver licenses; however, liability issues often make it preferable to employ a local driver. Child safety seats are not widely available in China. U.S. citizens who wish to ride bicycles in China are urged to wear safety helmets meeting U.S. standards. The number of U.S. citizens involved in serious and deadly traffic accidents in Beijing is increasing. The Embassy strongly encourages travelers to exercise special caution when crossing streets in China's cities as pedestrians do not have the right of way. Please note that many taxi cabs do not have functioning seatbelts for passengers. If seatbelts are available, visitors are strongly encouraged to use them to reduce the risk of injury. All drivers should be aware of the Chinese regulations regarding traffic accidents. Although a recent law states that drivers involved in a minor traffic accident should move their cars to the side of the road as soon as possible, in practice, the police often conduct investigations on the scene of the accident with the cars in their original positions. U.S. citizens who cannot express themselves clearly in Chinese should call the police as soon as possible after an accident and wait to move the cars until the police permit it. If called to an accident, the police may take 20 minutes or longer to arrive. Once the police arrive, they will complete a preliminary investigation and arrange a time for you to report to the police station responsible for processing the accident scene. The police will prepare a written report in Chinese, describing the circumstances of the accident. They will present the report to you either at the scene, or more likely at the police station, and ask you to sign it verifying the details of the accident. Do not sign the report unless your Chinese is good enough to completely understand the report and you find it totally accurate. If you either do not understand it or believe it is partly or wholly inaccurate, you may either:

1. Write a disclaimer on the report to the effect that you cannot read or understand the report and cannot attest to the accuracy thereof, but are signing it because of the police requirement that you do so, and then sign, or;
2. Write your own version of the accident, in English, on the police form and indicate that your signature only attests to the accuracy of the English version.

Most incidents (such as an accident) will draw a crowd. If involved in a traffic accident, stay calm; road altercations can turn violent quickly, and the safest course is to be conciliatory and wait for police. A crowd will usually move in very close to the accident and participants. In many cases the bystanders consider themselves to be an ad hoc jury. They may call for money, usually from RMB 100 to 1,000, to be paid by the party they consider at fault. The amount is not necessarily relevant to the amount of damage. A certain amount of bargaining is normal, even at accidents involving two Chinese parties. If you feel physically threatened, call the police immediately, as well as the Embassy or nearest consulate. If a traffic police booth is nearby, you may wish to leave the vehicle and walk there to await the arrival of the police accident team. Alternatively, you may walk to a shop, restaurant, or other location nearby in the immediate vicinity and wait for police. Your vehicle should not leave the scene of an accident. Your actions may serve to further incite the crowd if they perceive that you are fleeing to evade responsibility for your share of blame or payment of damages. The crowd may attempt to keep your vehicle at the accident scene by standing in the way or blocking the roadway with vehicles, bicycles and other objects.

Please refer to our [Road Safety page](#) for more information. Visit China's [national tourist office](#) website for more information and national authority responsible for road safety.

Please refer to our [Road Safety page](#) for more information. Also, we suggest that you visit the website of the China's [national tourist office](#) and national authority responsible for road safety.

AVIATION SAFETY OVERSIGHT: The U.S. Federal Aviation Administration (FAA) has assessed the government of China's Civil Aviation Authority as being in compliance with International Civil

Aviation Organization (ICAO) aviation safety standards for oversight of China's air carrier operations. Further information may be found on the [FAA's safety assessment page](#).

Section 4 – Transition Issues

Experiences in Transition

adapted from an article by Janet Bennett, Intercultural Communication Institute, Portland OR

Culture Surprise

Culture surprise are the reactions which occur shortly after arrival in a different culture when we see things that are different than we are used to. It usually occurs within the first few days after arrival as we become aware of superficial differences: modes of dress, signs in a different language, nonverbal behaviors.

Culture Stress

Culture stress manifests itself in the fatigue that occurs when we practice new behaviors in a different culture. This occurs as we respond to the behavior of the new culture and try to fit in by doing our own shopping, understanding comments made about us in the local language, learning to navigate public transportation and other attempts to adjust to the new culture.

Culture Shock

Culture shock is a state of loss and disorientation precipitated by a change in our environment that requires adjustment. It results from confronting values different from our own and from the loss of a familiar network and environment. It is a normal healthy reaction to the stress of living in a different culture. Everyone who has spent time living in another culture experiences some form of culture shock.

Symptoms of Culture Shock

Symptoms can be both physical and psychological, and can include: headaches, stomach aches, dizziness, rashes, nausea, irritability, insomnia or excessive sleepiness, depression, loneliness, withdrawal paranoia, anger, aggression, hatred, fear, crying, complaining, self-doubt, boredom, helplessness, confusion, and feelings of inadequacy. This list is not exhaustive.

Prescription for Culture Shock

adapted from an article by Bruce LaBrack, Summer Institute for Intercultural Communication

1. Understand the symptoms and recognize the signs of culture stress.
2. Realize that some degree of discomfort and stress is natural in a cross-cultural experience.
3. Recognize that your reactions are largely emotional and not easily subject to rational management.
4. Gather information *before* you go so at least the differences will be anticipated. Knowledge is power.
5. Look for the logical reasons behind host culture patterns. Discover why things are done the way they are.
6. Relax your grip on your normal culture and try to cheerfully adapt to new rules and roles.
7. Don't give in to the temptation to disparage what you do not like or understand. It probably won't change.
8. Identify a support network among peers, team members, other students and faculty advisor. Use this network, but do not rely on it exclusively.
9. Understand that this is a passing phase of what will be, in retrospect, a time of great learning and personal growth.
10. Give yourself quiet time, some private space, and don't be too hard on yourself.

In preparation to return home

“In a sense, it is the coming back, the return, which gives meaning to the going forth. We really don't know where we've been until we come back to where we were - only where we were may not be as it was because of who we've become, which, after all is why we left.” - Bernard, *Northern Exposure*

Reentry Challenges and Suggestions

adapted from articles by Dr. Bruce LaBrack, School of International Studies, University of the Pacific

There are lots of reasons to look forward to going home, but there are also a number of psychological, social and cultural aspects that prove difficult - often because they are unanticipated. Re-entry into your home culture can be both as challenging and frustrating as living overseas, mostly because our attitude toward going home is that it should be a simple matter of getting resettled, resuming earlier routines, and reestablishing your relationships. Research has shown that re-entry has its own set of special social and psychological adjustments which can be facilitated by being aware of the process and following some advice from those who have already returned.

Interviewing students who have been through the experience of off-campus study generated the following list of issues and suggestions. Their advice is to take the process seriously by being realistic and thinking about it and your possible reactions.

Prepare for the adjustment process and allow enough time

The more you think about what is to come, and know how returning home is both similar to and different from going away, the easier the transition will be. Anticipating is useful. The process of re-entry will take time, just like adjusting to the new culture did. Give yourself time to relax and reflect on what is going on around you, how you are reacting to it, and what you might like to change.

Overcoming boredom

After all the newness and stimulation of your time away, a return to family, friends, and old routines (however nice and comforting) can seem very dull. It is natural to miss the excitement and challenges which characterize project work off-campus, but it is up to you to find ways to overcome such negative reactions - remember a bored person is also boring.

“No one wants to hear”

One thing you can count on upon your return: no one will be as interested in hearing about your adventures as you will be in sharing those experiences. This is not a rejection of you or your achievements, but simply the fact that once others have heard the highlights, any further interest on their part is probably unlikely because they have no frame of reference for your experiences. Be realistic in your expectations of how fascinating your journey is going to be for everyone else. Be brief.

Cultivate sensitivity and interest

Showing an interest in what others have been doing while you have been gone is the surest way to reestablish your rapport. Much frustration can be avoided if you become as good a listener as a talker.

You can't explain

Even when given a chance to explain all the things you saw, felt and experienced while off-campus, it is likely to be at least a bit frustrating to relay them coherently. It is very difficult to

convey this kind of experience to people who do not have similar frames of reference, no matter how sympathetic they are as listeners. You can tell people about your trip, but you may fail to make them understand exactly how or why you felt a particular way. It's okay.

Reverse homesickness

Just as you probably missed home for a time after leaving campus, it is just as natural to experience some "reverse" homesickness for the people, places and things that you grew accustomed to while away from WPI. Feelings of loss are an integral part of returning from an off-campus sojourn and must be anticipated and accepted as a natural result of study away.

Beware of comparisons

Making comparisons between cultures is natural, particularly after residence abroad; however, the tendency to be an "instant expert" is to be avoided at all costs.

Relationships have changed

It is inevitable that when you return you will notice that some relationships with friends and family will have changed. Just as you have altered some of your ideas and attitudes while away, the people at home are likely to have experienced some changes as well. These changes may be positive or negative, and may seem even trivial to you, but expecting no change is unrealistic. The best preparation is flexibility, openness, minimal preconceptions, and tempered optimism.

Feelings of alienation

Sometimes the reality of being back home is not as natural or enjoyable as the place you had imagined. When real daily life is more demanding than you remembered, it is natural to feel some alienation, see faults you never noticed before, or even become quite critical of everyone and everything for a time. Mental comparisons are fine, but keep them to yourself until you regain both your cultural balance and a balanced perspective.

Remain flexible

Keeping as many options open as possible is an essential aspect of a successful return home. Attempting to re-socialize totally into old patterns and networks can be difficult, but remaining isolated and aloof is counterproductive.

Loss/compartmentalization of experience

Being home, along with the pressures of schoolwork, family and friends, often combine to make returnees worried that somehow that will "lose" the experience; somehow becoming compartmentalized like souvenirs only occasionally taken out and looked at. You do not have to let that happen. Maintain your contacts. Talk to people who have experiences similar to yours. Practice your skills. Remember your hard work and the fun you had while off-campus. There are lots of people on campus who have gone through their own re-entry and have had experiences similar to yours. Seek out other returned students from other sites, and look into becoming involved with the Global Ambassadors.

APPENDIX A - WPI OFF-CAMPUS STUDY TRAVEL INFORMATION FORM

WPI Off-Campus Study Travel Information Form

You must attach a copy of your travel itinerary provided by your travel agent or airline, in addition to completing this form. No handwritten itineraries will be accepted.

All students intending to complete a project at a WPI project site are asked to provide the IGSD with information about their travel arrangements. This will notify the faculty advisor, on-site coordinator and IGSD staff of your expected arrival date and time and alert them if a problem arises. *For some sites* this information is needed in order to arrange to have students met at the airport.

You must bring your passport into the IGSD to be scanned, unless you are participating in a project program within the U.S.

Name:	Site:	Term:
Arrival Date on site:	Arriving from (city):	
Mode of travel (air, train, bus, car):		
If traveling by air:		
Airline:	Flight Number:	Airport Destination:
Departure time:	Arrival time:	
Scheduled return date:		
Airline:	Flight Number:	Airport Destination:
Departure time:	Arrival time:	
If you plan to travel independently either before or after the program, please tell us your tentative plans:		

London Project Center Only

Bus Transportation: _____ **Yes** _____ **No**

(PLEASE MAKE SURE YOU CHECK ONE OF THESE OPTIONS FOR TRANSPORTATION FROM HEATHROW AIRPORT TO IES)

APPENDIX B - OFF-CAMPUS STUDENTS' HEALTH UPDATE AND RECORDS RELEASE FORM

Name _____ Project Site _____ Term _____

All students traveling off-campus to participate in a WPI program are required to carry medical insurance that is valid at the program site for the entire length of the program. Please verify this with your insurance company and list the name of your carrier and your policy number.

Carrier _____ Policy Number: _____

Do you have any medical conditions that could affect you while off-campus of which you would like to make the IGSD aware? (i.e. epilepsy, diabetes, depressive episodes, etc.) Also, please list any changes in your health not noted on your medical records on file with WPI Health Services.

Are you allergic to any medications? If so, please list them.

List any prescription medicines you are currently taking.

When traveling off-campus it is a good idea to take a supply of your prescription medications sufficient to last for the length of the trip. Prescription medicines should always be kept in the original containers with the prescription label to avoid problems with customs. It is also important to take along a copy of the prescription from your physician, clearly written, in generic terms, and with an indication of the condition being treated.

In the event of an emergency, please contact:

1. Name _____ Relationship to Student _____

Address _____

email _____

Cell Phone #: _____

Home Telephone: _____ Work Telephone: _____

2. Name _____ Relationship to Student _____

Address _____

email _____

Cell Phone #: _____

Home Telephone: _____ Work Telephone: _____

I hereby authorize WPI health services to release my medical records to the Interdisciplinary and Global Studies Division in the event of a medical emergency while studying off-campus. *I hereby acknowledge that it is my responsibility to contact my health insurance provider to determine that I am covered while at an off-campus project site.*

Signature _____ Date _____

APPENDIX C - ATC TEAM FORM
(One Per Team)

After you have turned in this completed form to the IGSD, at least one member of your group (although we suggest the entire group come so that the entire group takes equal responsibility for the equipment) is required to go to the ATC and reserve a laptop BEFORE pick-up on the specified date.

Project Site: _____

Pickup person: _____

Return person: _____

names of
team members: _____

If you can not pick up and return this PC within the specified dates, then you will need to make alternative arrangements: the ATC can *not* accommodate you.

E term dates: **pick up on or after:** **6/21/2010**
 Return on or before: **8/26/2010**

A term dates: **pick up on or after:** **8/11/2010**
 Return on or before: **10/26/2010**
