International and Global Studies Minor

Global Environments Paths

Associated Project Centers: All international project centers
Description: This is for students interested in the environmental aspects of other societies and international relations.

A global project and three courses from the humanities and arts or social science requirements may count towards the minor. Double-counted courses may be counted anywhere across the International and Global Studies “core” or “electives.” Students must take the senior seminar (INTL 4100) and two other courses for this minor that do not count for another degree requirement.

Here are several examples of a Global Environments track. These are merely examples and the courses you choose could be different.

1 unit International and Global Core
   INTL 1100 Introduction to International and Global Studies
   ID 2050 Social Science Research for the IQP
   INTL 4100 Senior Seminar in International and Global Studies

1 unit International and Global Electives (pick any 3 courses)
   ENV 1100 Introduction to Environmental Studies
   ENV 2600 Environmental Problems in the Developing World
   ENV 250X Growth, Development and Environmental Justice in China
   ENV 200X Climate Change: Vulnerability and Mitigation
   GOV 2312 International Environmental Policy
   GOV 2319 Global Environmental Politics
   ECON 2117 Environmental Economics
   EN 2237 Literature and the Environment
   HI 2401 U.S. Environmental History
   HI 2403 Global Environmental History
   HI 3317 Topics in Environmental History (check with instructor)
   HI 2921 Topics in Modern European History
   PY 2717 Philosophy and the Environment

IQP at an Overseas Project Center

Reminder: There are many ways to mix and match courses to count for International Studies. This is just one possible course trajectory. You don’t need to follow a “track” to do the minor.
Also Please Note: Many HU 3900 Inquiry Seminars fall into this category but can’t count toward an International Studies major or minor. Consult the instructor for options.
