

ALLOY CHEMISTRY-MICROSTRUCTURE-PROPERTIES INTERACTIONS IN ALUMINUM DIE CASTING ALLOYS

Contents

| | | |
|--|----|-----------------|
| Preface | 1 | |
| Chapter 1: Introduction | 3 | |
| Chapter 2: Specimen Production and Test Procedures | 7 | |
| 2.1 Alloy chemistry | 9 | |
| 2.2 Die casting process | 12 | |
| 2.3 Material characterization | 12 | |
| Cooling curves | | |
| Differential thermal analysis | | |
| Microstructure analysis | | |
| 2.4 Property measurement | 13 | |
| Mechanical property tests | 13 | |
| Room Temperature Tensile test | | |
| Elevated Temperature Tensile test | | |
| Fatigue test | | |
| Impact test | | |
| Wear resistance test | | |
| Hardness test | | |
| Physical property measurement | 16 | |
| Specific gravity measurement | | |
| Thermal conductivity measurement | | |
| Electrical conductivity measurement | | |
| Chapter 3: Atlas of Alloy Microstructures and Properties | 17 | |
| Optical and SEM micrographs of Alloy 1 – 24 | | following p. 91 |
| Chapter 4: Analysis of alloy chemistry, Microstructure and properties | 93 | |
| 4.1 Microstructure | 95 | |
| 4.1.1 DTA Curves, Cooling Curves and Cooling Rate Analysis | 95 | |
| 4.1.2 Phase Analysis | 96 | |
| Effect of Cooling Rate on Microstructures via EDX and Micrography | | following p. 96 |
| 4.1.3 Microstructure Characteristics | 97 | |

This book is published by NADCA, publication #215. It can be purchased on the web <http://www.diecasting.org/publications> or by calling NADCA at (847) 292-3600.

| | |
|--|------------------|
| 4.2 Effect of alloy chemistry on properties | 98 |
| 4.2.1 Statistical data analysis | 98 |
| 4.2.2 Effect of alloy chemistry on room temperature tensile properties | 98 |
| 4.2.3 Effect of alloy chemistry on room temperature tensile properties | 105 |
| 4.2.4 Effect of alloy chemistry on fatigue life | 117 |
| 4.2.5 Effect of alloy chemistry on impact resistance | 121 |
| 4.2.6 Effect of alloy chemistry on wear resistance | 123 |
| Microstructures of Fracture Surfaces of Test Specimens | Following p. 124 |
| 4.2.7 Effect of alloy chemistry on hardness | 125 |
| 4.2.8 Effect of alloy chemistry on thermal conductivity | 127 |
| 4.2.9 Effect of alloy chemistry on electrical conductivity | 129 |
