# Worcester Water

## Our Most Valuable Resource

**Kimberly Abraham & Kevin Scherer**  
Worcester DPW&P Water Operations

**Thursday, January 19, 2017**

**5:00 pm, Higgins Lab 116**

**Refreshments**

Are you aware that Massachusetts is in a historic drought? Did you know droughts can happen in winter? Has the drought made you wonder about where Worcester water comes from? How is the quality measured and what is done to assure that it is safe and pure? What sustainability efforts has the water department taken to ensure that the water keeps flowing?

Please join Kimberly Abraham and Kevin Scherer from the Worcester Department of Public Works & Parks to learn about the journey that a drop of water takes from our watershed to our faucets, and to learn what is necessary to assure that safe, good tasting water is always there when we turn on the tap.
