RECEIVING THE COLLECTION KIT
The home collection kit will be sent to the student’s location from Quest Diagnostics, which will provide the kits and process the results.

Completed tests must be shipped back to Quest the same day specimens are collected and cannot be shipped on the weekends.

COMPLETING THE COLLECTION
The student should follow the instructions carefully.

1. First, register and request a kit by visiting https://my.questforhealth.com
2. Once on the registration site, enter the registration code: WPI
3. Review and agree to the Terms of Service and Consent to testing
4. Confirm their information with their Unique ID (their student ID)
5. Confirm or update their information and order their testing kit

The kit package and video will include detailed instructions for how to self-collect a specimen with a shallow nasal swab and how to package and send it back to Quest Diagnostics for processing.

RETURNING THE SPECIMEN
After collecting the nasal specimen, the kit should be returned by 3 p.m. the same day in the provided packaging to the nearest FedEx location. Next-day air priority shipping is provided for each test.

The specimen MUST be shipped the same day it is collected and MUST be shipped Monday through Friday. Do not put the test in a FedEx Drop Box on a Saturday or Sunday. If a drop box is used, please ensure the test is dropped off by 3 p.m. so specimens do not sit overnight and become potentially invalid. The kit will be sent to a Quest testing facility, and results will be available in about seven days.
