

Do you enjoy...

Solving complex problems?

Working collaboratively?

Numbers? Graphs? Reasoning?

Patterns? Funny Jokes?

(That "Extrema" humor!)

Math presentations and games?

Meeting people?

Exploring theoretically infinite possibilities?

$$B \lim_{x \rightarrow 1} \frac{ctgx - 2}{2\sqrt{1-x^3}}$$

$$S_3 = \begin{bmatrix} 1 & 0 & 0 \\ 1 & 0 & 1 \\ 0 & 0 & 1 \end{bmatrix}$$

$$\phi = \sqrt{\dots}$$

$$\pi \approx 3,1415$$

$$P = r^2 \pi$$

$$\Delta t = T - \frac{3a}{x}$$

$$(x+y)^2 = \left(\frac{y}{2}\right)^2 \frac{\Delta x}{\Delta y}$$

$$8x = 4 - 3y$$

$$y = 2x^2 + 3x$$

$$f = \frac{\sqrt{x+a^2}}{x}$$

$$P = \sum_{i=0}^{\infty} X_i^i$$

$$e = 2,79$$

$$e = \cos x$$

$$y = \frac{\Delta x}{\Delta z}$$

$$\ln = \sqrt{axb}$$

$$\sin a = \frac{b}{c}$$

$$\sum = n-1$$

$$\phi = \sqrt{\frac{\sum (x-m)^2}{n}}$$

$$S = \int_2^{10} 5t dt$$

$$\frac{\Delta x}{\Delta y} = \lim_{\Delta y \rightarrow 1} \frac{\Delta x + 2}{\Delta y - 1}$$

$$1 - 3y^2$$

$$(x+a)^2 = x^2 + 2ax + a^2$$

$$X_{1/2} = \frac{b \pm \sqrt{a-c}}{\sqrt{2a}}$$

Then join the WPI...
