THE WPI PRESS

OBTAINING RIGHTS AND PERMISSIONS

As the author, you are legally responsible for obtaining permissions to use copyrighted material created or owned by others and for complying with privacy and libel laws. We cannot offer legal advice; however, these guidelines serve as a broad aid for our authors. You also are responsible for preparing acknowledgments and credit lines for illustrations, paying permissions fees, and, eventually, providing complimentary copies when they have been requested as a condition of permission.

Because the permissions-seeking process can be protracted, begin writing for permissions when you sign your contract with The WPI Press. Please discuss with your editor about what permissions are necessary to obtain.

In writing for permission, please use our sample permission request letters as templates. It is essential the rights granted not be restricted (e.g., that they are not limited to the North American market, or not exclude digital/electronic editions), as restrictions of rights will limit the market for your book and the way in which it can be sold. If a rights holder restricts the rights granted, please contact the rights holder again to see whether world rights for all editions of the work (including digital/electronic) might be reasonably negotiated. If rights holders are hesitant to allow digital/electronic use, you might underscore that digital/electronic editions of works are simply digitized versions of the book, typically sold to academic libraries, and that The WPI Press is a nonprofit, scholarly publisher.

For previously published material, direct your written requests to the publisher, not to the author. The publisher often contractually controls the rights to reprint material, even when the copyright appears in the author’s name.

Unsure whether permission is required for a particular item? Check with your editor before seeking permission. Unnecessarily requesting permission endangers the principle of fair use and may result in otherwise avoidable fees.

We will ask that you complete a Permissions Log. Completing this log and returning it with your final manuscript helps us to move forward as quickly as possible. Along with the log, you will need to provide photocopies of letters or forms granting you permission for the use of copyrighted material so that we are aware of any special requirements regarding cropping and to wording and placement of credit are fulfilled. (Copy both sides if there is any writing on the back. Keep the original letters for your files.)

**No manuscript will move forward for copyediting until all necessary permissions have been obtained**, so it is crucial that any final permissions issues be resolved and all permissions letters be on hand by the time you submit your final manuscript to your Press editor.
Permission versus Acknowledgment

Consider the relationship between permission and acknowledgment. Permission is granted by a rights holder for the use of copyrighted material (published or unpublished, text or image) that does not fall within fair-use guidelines. Acknowledgment is your printed recognition of the contribution of material not your own, even if you are using material in the public domain or material covered by fair-use guidelines. Simply put, materials requiring permission always require acknowledgment; other materials warrant only acknowledgment.

Fair and Unfair Use of Copyrighted Material

It is necessary to secure written permission to quote previously published written or illustrative material if it is still in copyright and if your use exceeds fair use. Most brief quotes from previously published work that are incorporated into your scholarly argument and properly cited will fall under fair use. However, please see below for additional clarification.

The “fair use” of properly attributed copyrighted material is permitted by law, but the extent and limits of fair use itself are not defined by word count alone. Section 107 of the Copyright Act of 1976 states that four factors are to be considered in determining fair use:

1. the purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
2. the nature of the copyrighted work;
3. the amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
4. the effect of the use upon the potential market for or value of the copyrighted work.

Therefore, in scholarly work, brief excerpts from published sources may generally be used for criticism or comment without permission if the source is cited. Although, do not quote at such length from another source as to weaken its value. Consider proportion here: To use 500 words from a 5,000-word essay may exceed fair use, whereas quoting 500 words from a work of 50,000 probably does not. Quoting briefly from published prose sources is allowed by fair use; using whole chapters is not.

Reprinting Your Own Work

If you are reprinting your own material from a collective work published after January 1, 1978, you need to request permission from the publisher only if you transferred your rights to that material by an express written agreement. Whether or not you need a formal permission letter, please list such previous publication in a paragraph in your acknowledgments. Provide us with a photocopy of a statement from the publisher indicating the copyright is in your name, the copyright has been transferred to you, or permission is being granted for publication in your current manuscript. If a chapter in the present manuscript does not entirely duplicate text you published previously (e.g., a journal article or a chapter in an edited volume), we need to know
approximately what percentage of the present chapter is contained in the previous publication. Indicate the date of your signed contract for the earlier publication.

If after signing your contract with the Press you wish to publish any portion of your manuscript in another venue, contact your editor at the Press.

**Manuscript Materials**

Both copyright protection and the principle of fair use apply to manuscript materials, including letters. If permission to quote from unpublished materials is necessary, it should be obtained from both the owner of the literary rights (the author, author’s heirs, or designated representative) and the owner of the property (the possessor, often a repository), if these rights are held separately. The custodian of the collection—usually a librarian or archivist—is the reliable source of information, including on what permissions must be sought and from whom.

**Government Documents**

Government documents, including state and local jurisdictions, are in the public domain and may be freely reproduced or quoted.

**Interviews**

You do not need an interviewee’s permission to publish an interview that you record since spoken words are not protected by copyright, and you hold the copyright to your own transcription or recording.

However, it is ideal to obtain a release that shows the subject understands she/he may be quoted in a published work. If an interviewee is named in your book, you need a written release indicating that the interviewee consents to being named. Should the interviewee wish to remain anonymous, you must ensure the person is not identifiable, taking care to change a number of personal characteristics in your text. In addition, be careful not to include material from your interview that might be grounds for a claim of invasion of privacy or of libel.

**Illustrations**

Obtaining permission for illustrations is perhaps even more laborious and potentially more expensive than for text. As with manuscript materials, there are two separate and distinct legal protections for illustrations: one is extended to the owner (library, archives, other institution, or private individual) of the item, and the other is extended to the holder of the copyright (if there is one, normally the photographer or artist or that person’s heirs).

Consider this: That a photograph or other piece of visual art carries no copyright notice does not necessarily mean it is in the public domain. It is your responsibility to determine its status from the institution holding it. The institution in turn should alert you if further permission is required from the owner of publishing rights, that is, the copyright holder. However, again, if in doubt whether permission is required for a particular image, please check with your Press before seeking permission.
Redrawn Maps and Other Graphics

If an existing map is used as a “base” map, for basic geographic reference, but the redrawn map is substantially and substantively changed—is altogether different in final form—the use of the original map is likely to be considered fair use. Yet, if the redrawn map reproduces much of the same information as the original, even if redrawn or adapted, if the original map is under copyright, permission for adapting that material will need to be sought from the copyright holder. The same holds true for charts, figures, and other graphics that have been redrawn.

Photograph Releases

If you plan to use a photograph taken in a private place of a person who is identifiable in the photo, you must obtain a written release. In addition, if an identifiable person in a photo might be harmed or embarrassed by your use, a written release is necessary. And if you plan to use an image for commercial purposes (e.g., on a book jacket, if the photo does not illustrate the book’s editorial content), you will also need a release.

Work-for-Hire

Did you hire a cartographer, illustrator, photographer, or translator to provide graphics or translated text for your work? If so, the copyright is yours. No permission is required from that person; however, you do need a written contract stating that the material was created as a work-for-hire, and it must be clear that the work was created specifically for you—at your direction and at your expense. If an employee creates a work within the scope of his or her employment (e.g., a cartographer working for your university library system), that work is also considered made for hire.
