

**Target Audience:** PK-16 educators, student-teachers

## Course Description:

This course explores how AI can shape the future of K–12 STEM education by providing educators with the skills and tools to effectively incorporate AI into their teaching. Participants will discover how AI can enhance learning experiences, simplify administrative tasks, and develop critical thinking and problem-solving abilities in students. The course will also discuss the strengths and current limitations of existing AI technologies, providing practical advice on their appropriate use and the safeguards educators need to consider. Through interactive workshops, case studies, and discussions on ethical implications, the course focuses on making AI accessible and actionable for educators of all experience levels. No prior experience with AI is required. The course is designed as a virtual, interactive, and collaborative experience.

## This course awards:

► **PDP Certificate, 24 PDP's** – awarded upon completion of the 4-day course and submission of coursework

**OR**

► **Graduate Credit, 3 graduate credits** (in lieu of PDPs)– awarded upon completion of the 7-day course & submission of course assignments

## Course Information:

PDP only Option	Graduate Credit Option*
