Work, Identity, and Opportunity in the Age of AI

Worcester Polytechnic Institute
Unity Hall 4th Floor | Worcester, MA

Saturday,
October 24th, 2026

8:30 AM to
5:00 PM

AI is changing how we work. What does that mean for your future?

Join students from across disciplines and institutions for a one-day applied AI experience exploring how work, skills, career pathways, and opportunity are changing.

Work with real workforce and labor-market data, collaborate across disciplines, and develop an insight, recommendation, or solution for real-world decision-makers.

All Students Are Welcome

You **do not need** to be an AI expert or computer scientist.

Open to undergraduate and graduate students across **all disciplines**.

Business. Economics. Engineering. Data Science. Sociology. Public Policy. Humanities. Education. Computer Science. Design. And more!

No prior coding or AI experience is required

The Studio Experience

Compete for Gift Card Prizes

Winning teams will receive individual gift card awards and a winner's certificate.

Present at the MA State House

Selected winning teams will present their work at the Human Edge Roundtable on November 17th.

Earn a Digital Credential

Add to your LinkedIn, resume or portfolio as recognition of an applied, interdisciplinary AI experience.

Show How You Think

Industry leaders see students working in real time: collaborating across disciplines, interpreting data, navigating ambiguity, and presenting ideas.

Meet Leaders Shaping the Future of Work and AI

Engage with leaders from industry, workforce, government, and higher education throughout the Studio.

Featured leaders and organizations include:
State Senator Michael Moore · Worcester City Manager Eric Batista · Lightcast · The Burning Glass Institute
