Project Lead the Way

Before Arriving at WPI:

Please note: If the device you are bringing to WPI is managed by your school, these steps may need to be performed prior to leaving your school if IT support from your school is needed.

- If your institution supports it, join the eduroam wireless network before departing your school.
- Perform Operating System security updates, patches, etc.
- Perform Endpoint Protection updates (anti-virus, anti-malware, etc.)
- Ensure you have a local administrator account username and password that is known by you.
- Identify firewalls and VPNs installed on your device and understand that they may need to be disabled to operate on the WPI network.
- Install any Project Lead the Way software prerequisites

At WPI:

- Connect device to the WPI wireless network in one of these ways:
  - via eduroam, if your institution supports it
  - Sponsored Guest Wireless provided by PLTW
- Configure device for IP printing
  - Information will be provided by the WPI ITS Reps onsite

Support Notes:

- WPI ITS will provide initial support onsite for laptops and tablets required by the PLTW program. Services include:
  - Wireless setup
  - Printer setup
- Personal devices can connect to the WPI Sponsored Guest Wireless, however WPI ITS will not be able to support these devices.
- Notify the WPI ITS Service Desk in Gordon Library immediately if the device is lost, stolen, or compromised.
