WPI Main Campus Electrical Service Upgrade Project

April 15, 2020

Main Campus Electrical Service Upgrade Project

April 20th – July 17th

We are replacing the WPI Main Campus Electrical Service in partnership with National Grid (Ngrid).

The majority of the construction will be contained within fenced areas that will progress in a phased manner beginning at the corner of West St. & Salisbury St.; up West St. in the grass areas off the pedestrian path; past the Fountain to the end of Stratton; around Stratton up to the Power House.

Brief sidewalk and road closures will take place during the duration of the work and will be communicated in advance.

An associated full-day campus power shutdown on Saturday, July 17th will impact all WPI campus buildings inside of Salisbury Street, Boynton Street, Institute Road, & Park Ave (except for the Recreation Center and Park Ave Garage).

Worcester Polytechnic Institute

WPI Main Campus Switch Gear Project July 17th Power Shutdown
