Post-Graduation Report
Class of 2016
Executive Summary

Post-Graduation Report for the Class of 2016

The Career Development Center (CDC) is pleased to present the WPI Post-Graduation Report for the Class of 2016 including all degree levels (bachelor’s, master’s, and PhD) following standards set by the National Association of Colleges and Employers (NACE). For details on data collection and reporting, see the Methodology section of this report. Highlights of this report and other indicators of CDC activities and success of WPI graduates are outlined here:

Knowledge Rate

“First-Destination” career information was collected from 91.8% of all graduates for the class of 2016 (all degree levels). For bachelor’s degree graduates the knowledge rate was 94.3%, considerably higher than the national average of 80.2% among four-year, private, non-profit colleges and universities (see NACE).

Success Rate

For all degree levels combined the success rate increased by one percentage point over the previous year to 92.7%, and the success rate for bachelor’s degree graduates increased by two percentage points to 90.6%. The success rate is the proportion of graduates employed, in graduate school, serving in the military or volunteer service for whom career information was collected excluding those “Not Seeking”.

Average Starting Salary

The average starting salary for bachelor’s degree graduates increased slightly over last year to $66,977, this represents a 10% increase over the past three years. Typically only about one-third of employed graduates report salary information, these data are confidential and used only in aggregate to produce this report.

Princeton Review

For academic year 2015-2016, Princeton Review ranked WPI #10 nationally for “Best Career Placement”, #14 for “Best Career Services” and #19 for “Top Internship Opportunities”.

Payscale.com

Based on its own data collection independent of this report, Payscale.com ranked WPI 16th nationally for early career salary and 26th for educational ROI.

Student Satisfaction

82% of undergraduate students and 45% of graduate students interacted with the CDC last academic year. Student satisfaction with CDC services consistently exceeds the national average (see annual Universum survey, 2014-2016).

Employer Engagement

Last year 440 different companies recruited on-campus (career fairs, information sessions, and on-campus interviews) at WPI, and 95% of employers attending WPI career fairs rated them “above average” or “excellent”.

Methodology and Glossary of Terms

Methodology:

This report is based on data gathered for the graduating class of 2016 which includes students who received their degrees in October 2015, February 2016 or May 2016. Following standards established by the National Association of Colleges and Employers (NACE), the CDC gathers “first destination” career information from a variety of sources. Data collection begins for the class in September and concludes in December of the following year.

Students are asked to complete on-line surveys at various times during the year, students are also encouraged to complete paper surveys at the CDC, commencement regalia pick-up, commencement rehearsal and other events. In the fall, CDC conducts a phone campaign to non-responders, asks faculty and staff to provide information, and collects information using social media and other sources.

Typically about one-third of graduates who are employed provide salary information, these data are considered confidential and are used in aggregate to produce this report. To protect student privacy, average salaries are only reported for those degrees and fields of study where two or more students have reported salary information. In rare cases where only one student has reported a salary, the salary data is excluded from the report for that degree and field, but included for the calculation for average salary for that degree level. In all cases, average salary statistics are based on full-time regular employment.

Results for double majors are reported for each major to which their degree applies, however they are counted only once for aggregate statistics (for example, by class or degree level). In this report, NA (“not applicable”) indicates a particular degree is not offered, and zero (“0”) indicates no degree was granted for that class year.

Glossary of Terms:

Knowledge Rate  The proportion of graduates for whom at least some career information was collected

Success Rate  The proportion of graduates employed, in graduate school, serving in the military or volunteer service out of those graduates for whom at least some career information was collected excluding those “Not Seeking”

Employed Includes full-time, part-time, contract, entrepreneur, freelance, and post-graduation internships or fellowships, most WPI graduates who are employed fill standard full-time professional positions

Graduate School Enrollment in some form of graduate study (master or doctoral degree), professional school (law, medicine etc.) or continuing education

Military Active duty military service

Volunteer Service Includes community service such as Teach for America, Peace Corps, and similar programs

Seeking Graduates who have not yet secured any of the “Employed” options listed above

Employment Planning to Attend Graduates intending to pursue, but not yet enrolled in any of the “Graduate School” options listed above

Not Seeking Graduates not seeking employment, graduate school, military, or volunteer service options

Unknown Graduates for whom career information could not be reliably found
