# WORCESTER POLYTECHNIC INSTITUTE NINETEENTH ANNUAL INVITATIONAL MATH MEET <br> October 18, 2006 <br> TEAM EXAM QUESTION SHEET 

1. In Pascal's triangle, for the first $\mathbf{n}$ rows, the quotient of the number of integers which are not 1 to the number of integers that are 1 is what?
2. If $\log _{2}\left(\log _{3}\left(\log _{4}(x)\right)\right)=\log _{3}\left(\log _{4}\left(\log _{2}(y)\right)\right)=\log _{4}\left(\log _{2}\left(\log _{3}(\mathrm{z})\right)\right)=0$ then what is the sum of $x+y+z$ ?
3. What is the value of the real number $x$ such that $64^{x-1}$ divided by $4^{x-1}$ is $\mathbf{2 5 6} \mathbf{2}^{2 x}$ ?
4. The square of an integer is called a perfect square. If $\mathbf{x}$ is a perfect square, what is the next largest perfect square?
5. If $\mathbf{r}$ is positive and the line $\mathbf{x}+\mathbf{y}=\mathbf{r}$ is tangent to the curve $\mathbf{x}^{2}+\mathbf{y}^{2}=\mathbf{r}$ then what is the value of $\mathbf{r}$ ?
6. Assume that $\mathbf{p}$ is a positive integer such that $\mathbf{2}^{\mathbf{p}}-\mathbf{1}$ is prime. Consider the number $\mathbf{n}=\mathbf{2}^{\mathrm{p}-1}\left(2^{\mathrm{p}}-\mathbf{1}\right)$. What is the sum of all divisors of $\mathbf{n}$ ? (not including $\mathbf{n}$ itself)
7. Find the smallest positive integer such that

$$
\sqrt{n}-\sqrt{n-1}<.01
$$

8. A semicircle of radius 4 is formed into a cone by attaching the two radii together. What is the volume of the resulting cone?
9. Find a value for $\mathbf{b}$ so that the following system has solutions

$$
\begin{aligned}
& x+2 y+2 z=1 \\
& x-y+3 z=3 \\
& x+11 y-z=b
\end{aligned}
$$

10. A triangle in $\mathrm{R}^{3}$ is determined by the points $\mathbf{Q}_{1:}(2,1,7), \mathbf{Q}_{2:}(5, \mathbf{x}, 7)$ and $\mathbf{Q}_{\mathbf{3}}(5,5,19)$. Find values for $\mathbf{x}$ so that the triangle $\mathbf{Q}_{\mathbf{1}} \mathbf{Q}_{\mathbf{2}} \mathbf{Q}_{\mathbf{3}}$ is a right triangle.
11. The sum of all but one of the interior angles of a convex polygon is $\mathbf{2 5 7 0}$. What is the size of the remaining angle?
12. A number is selected at random from the set of natural numbers. What is the probability that the number is divisible by 3 , not divisible by 5 and divisible by either 4 or 6 ?
13. Where are the foci for the conic section described by the following equation?

$$
9 x^{2}-54 x+16 y^{2}+160 y+337=0
$$

14. It is possible to place positive integers into the 21 vacant squares into the $5 \times 5$ square shown below so that the numbers in each row and each column form arithmetic sequences. Find the number that must occupy the empty square marked by an $\mathbf{X}$.

|  |  |  | $X$ |  |
| :--- | :--- | :--- | :--- | :--- |
|  | 74 |  |  |  |
|  |  |  |  | 186 |
|  |  | 103 |  |  |
| 0 |  |  |  |  |

TEAM EXAM ANSWER SHEET

| QUESTION | ION ANSWER | SCORE | QUESTION | ON ANSWER | SCORE |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | $\left(n^{2}-3 n+2\right) /(4 n-2)$ |  | 8 | $8 \pi \sqrt{3 / 3}$ or $8 \pi / \sqrt{3}$ |  |
| 2 | 89 |  | 9 | $b=-5$ |  |
| 3 | $x=-1 / 3$ |  | 10 | $\mathrm{x}=1,5,-5 / 4,41$ |  |
| 4 | $\mathrm{x}+2 \mathrm{sqrt}(\mathrm{x})+1$ |  | 11 | $130^{\circ}$ |  |
| 5 | $\mathbf{r}=2$ |  | 12 | 2/15 |  |
| 6 | n |  | 13 | ( $3+/-\mathrm{sqrt}(7),-5$ ) |  |
| 7 | 2501 |  | 14 | 142 |  |
