

WPI Research Experience for Undergraduates in Industrial Mathematics and Statistics June 1- July 29, 2022

Students work in teams on **real problems** that come **directly** from business and industry. They work closely with a company representative to define the problem and to develop solutions of immediate value to the company. They are guided by a faculty advisor to maintain a clear focus on the mathematical issues at the core of the project.

The REU program at WPI will answer questions like:

- **What is the role of a mathematician in business and industry?**
- **What is it like to work with technical experts on a problem that requires significant mathematics but also must satisfy real-world constraints?**

Each participant will receive a \$5000 stipend and housing for the program, along with support to defray the cost of travel to Massachusetts.

To apply and to obtain more details go to <http://www.wpi.edu/+CIMSREU>
Reviewing applications until March 31, 2022
Applications will be reviewed until all positions are filled.

Funded by the National Science
Foundation Award DMS1757685 &
the Center for Industrial Mathematics
and Statistics (CIMS)
