## Renewable Energy and Power Systems

Renewable Energy Innovation Laboratory (<http://labs.wpi.edu/renewable-energy-lab/>) emphasizes all aspects of innovations in renewable energy systems for the conversion, delivery, and its use in electrical form. Our aim is to contribute in expanding the utilization of renewable energy resources in the world by addressing technical challenges impeding their utilization, including reducing their cost, and improving their overall efficiency, operation, control, integration and reliability. Our objective is also to commercialize and transfer our developed technologies to market.
